# I. PROCEDURAL BACKGROUND

The above-captioned water rights were claimed by the United States, Department of Interior, Bureau of Land Management as dual-based stockwater rights, meaning the rights were claimed as federal reserved water rights pursuant to Public Water Reserve (PWR) 107 and alternatively as state-law based rights. Notice of the elements of each claim was reported by the Idaho Department of Water Resources. Objections were filed by the State of Idaho regarding whether the claimed right met the criteria for a federal reserved right pursuant to PWR 107. Objections were filed by the claimant as to the reported legal descriptions.

On September 17, 1999, objections were filed to the above water rights by Pickett Ranch & Sheep Co, Western Stockgrowers Assoc., Joe Tugaw, Michael Poulton, Gary Poulton, Karl Bedke, Jared Bedke, Scott Bedke, Bruce Bedke, Jerry Hoagland and Joyce Livestock Company. On August 29, 2002, the parties filed a *Stipulation and Joint Motion for Order Approving Stipulation, Notice of Withdrawal of Objections and Responses* filed by Mr. Norman Semanko for Bruce Bedke et al, *Notice of Withdrawal of Objections and Responses* filed by Mr. Norman Semanko for Western Stockgrowers et al. On September 18, 2002, an *Order Dismissing Objections and Responses with Prejudice; and Order Dismissing Parties* was issued. On March 11, 2003, the State of Idaho and the United States filed a *Stipulation to Resolve*

*Objections.* An *Order Dismissing Objections and Dismissing the State of Idaho as a Party* was issued on June 30, 2003.

On June 8, 2004, a *Standard Form 5/Amended Claim* signed by the claimant with IDWR concurrence was filed. The *SF5* resolved the United States' objection, and stated that the rights were still claimed on a dual basis. An *Order Rescinding Order of Reference to Thomas R. Cushman* was entered on June 9, 2004, stating Judge John M. Melanson would proceed in the above subcases in the manner specified by *Administrative Order 1* for Special Masters. No objections were filed to the *Amended Director's Report*.

On August 18, 2004, a trial was held on these claims pursuant to Idaho Code 42-1411A(12), which requires the United States to demonstrate a *prima facie* showing of the existence of the claimed federal reserve water right. In conjunction with that trial, the United States filed affidavits, which were admitted into evidence, for each claimed right to meet its burden.

## II. FINDINGS OF FACT AND CONCLUSIONS OF LAW

Based upon the file and record in this subcase, and the affidavits presented at the hearing on the matter, this Special Master makes the following findings of fact and conclusions of law:

1. Prior to April 17, 1926, no water rights had been established pursuant to state law for the use of the water from the subject water source for each claim.
3. On April 17, 1926, President Coolidge executed Public Water Reserve 107, which withdrew the 40 acre tract of land upon which the subject water source for the claims is located from the public domain. The tract of land withdrawn for each claim is described as the "place of use" element on the attached *Special Master's Recommendations*.
4. The subject water sources for the claims consist of a spring or water hole of the type contemplated by Public Water Reserve 107.
5. Contemporaneously with the withdrawal of the land, President Coolidge impliedly reserved enough water to fulfill the primary purpose of the land reservation for each claim.
6. The minimum amount of water necessary to fulfill the primary purpose of the land reservation is the amount set forth in the "quantity" element on the attached *Special Master's Recommendation* for each claim.
7. The United States has satisfied its burden under Idaho Code section 42-1411A(12) as to the nature and existence of the claimed federal reserve water right for each claim.

8. The elements of the federal reserved water right for each claim are set forth on the attached *Special Master's Recommendation*.

### III. RECOMMENDATION

Therefore, based on the file and record herein, IT IS RECOMMENDED that the above-captioned water rights be decreed as a federal reserved water right with the elements as set forth in the attached *Special Master's Recommendation for Partial Decree Pursuant to I.R.C.P.*

*54(b)*. It is further recommended that to the extent any concomitant state-law water rights were claimed in the alternative for the above-captioned rights, that said right not be confirmed in any partial or final decree.

Dated August 23 2004. .
