IDAHO FALLS ID 83402

Dear Mr. Dustin:

At your request please find enclosed the Notice of Claim for A25-04200 and the map showing point of diversion.

The well is on the north side of the building. The GPS reference location is E0007688 A0011949. It supplies water for inside use and to irrigate 0.6 acres of turf and shrubs.

The ball field located west of the meetinghouse is flood irrigated by surface water from a canal and ditch system.

If you require additional information or if you have questions please call me.

Sincerely,
NATURAL RESOURCE SECTION

Re: Water Right Adjudication Claim(s) A25-04200, A25-12346

Dear Water User:

Idaho Department of Water Resources (IDWR) is reviewing claims to water rights in the Snake River Basin Adjudication in your area. Water Resources Field Services has been retained to do field inspections to aid the Department in making correct recommendations to the court. In the next weeks and months I will be contacting you to make an appointment to look at your diversion works and uses of water.

The purpose of the visit is to photograph and locate the wells for the Coltman Ward and the Garfield Ward buildings. Please forward this letter to appropriate local contact persons, and let me know whom I may contact.

I look forward to helping make sure your water right recommendation is correct. Please contact me if there is a particular time that would be convenient for you. You may call in the evenings, or leave a message on the answering machine.

Sincerely,

Bryce A. Contor

To whom it may concern:

10/13/03

The Garfield LDS Meetinghouse was constructed in 1952 at which time the well was installed.

The present meetinghouse has an attendance of 179 people in three different sessions for a total attendance of 537.

There are 5 toilets, 2 urinals, and 10 sinks for a total of 17 fixtures.

Sincerely,

November 25, 2002

Dear Brother Pincock,

I have reviewed the documentation that was sent to me regarding the use of the well at the Garfield meetinghouse. (5069270) The meetinghouse measurement is 19,336 sq. ft.. Exterior turf and shrub area that is watered from the well is 25,740 sq.ft..

The aerial depiction of the property showing areas being irrigated is accurate.

However the location of the wellhead is inaccurate. It is now located on the north side of the building. It's GPS reference location is E0007688 A0011949.

There is a ball field to the west which is flood irrigated from the ditch.

Sincerely,

Monte Keppner
