

3/5/2004

25-2169, 25-2170

Talked with Jack Lance re: above claims. He said that they switched from a 40 HP to a 100 HP pump when they expanded the system in order to irrigate $5\frac{1}{2}$ of SW $\frac{1}{4}$ of sec 35, 5N 37E (Roxine Stone enlargement claim 25-10900). Well depth is 105' and static water level is about 4'. Affidavit in 25-10900 says that enlargement took place in 1985.

He will call me back to let me know if he wants Stone's claim to be recommended as an enlargement, which would put a portion of his water on her land. Stone and Lance would have to be shown as WR owners on all 3 claims.

25-2169

Met with Jack Lance at his office. He said that license 25-2169 had been transferred from a gravel pit to the well which is described by 25-2170. However no transfer was found. It appears that the only action taken was the amending of claim 25-2169 to reflect a change in point of diversion.

Jack mentioned that the P/D was moved because sometimes the gravel pit went dry and there was no water available for use. It does not appear that the gravel pit has been used for irrigation since 1971, when the well was drilled.

7 Recommend forfeiture of WR based on ?
non-use from 1971 through present.
