

Matt Mann 10/29/03 7AM 538 7894

- 1) Upper dam on Posey Creek washed out $\approx$ mid 1980's. Repaired 10 years ago. In the interim Matt enjoyed full flow of Posey Creek.
- 2) Until 1970's there was a headgate @ dam in Gardner's yard that allowed water to go south. It kept washing out so Mann's rebuilt dam w/o headgate.
- 3) Due to quarrel between Morris & Gardner, the ditch that comes around the south did not get maintained & water didn't reach Gardner. I'm unclear on how long this occurred. About 45 years ago Matt & Gary began to lease the Poulsen pasture (now Gardner) & they restored the ditch at that time.
- 4) Currently there is some Posey Creek flow around the North side from springs & runoff early in the year & Matt still uses that water.
- 5) Matt will put this in a letter & send to me

Dam on Posey Creek - Historically almost
all water went around N side
till about 15 yrs. Bonnie Gardner
used S. of driveway only.

Matt's claim - flood only, before
dam 80% went to Matt's piece.

Maybe 10-11 yrs - not 15 - Kim
Morris Duvor - 5 yrs before Forrest Mann
died, he died 5 yrs ago.

Before the dam was built w/ the
bulldozer the only water that went
south was diverted by a hand-dug
diversion. Forrest Mann's bulldozer
was used to do the work.
