SPECIAL MASTER'S REPORT
FOR WATER RIGHT: 32-10744

Order Rescinding Order of Reference

- A. Special Master Thomas R. Cushman retired on June 30, 2004. Therefore, the Court finds it appropriate to rescind the Order of Reference to Thomas R. Cushman in the above subcase.
- B. The Court, with Judge John M. Melanson presiding, will proceed in the above subcase in the same fashion as specified in *Administrative Order 1* for proceedings by Special Masters.
- C. If the Court finds it necessary, the above subcase may be referred to another Special Master at a later date.

Special Master's Report

The above-captioned water right was claimed by the United States, Department of Interior, Bureau of Land Management (United States) as a dual-based stockwater right meaning the right was claimed as a federal-reserved water right pursuant to Public Water Reserve (PWR) 107 and alternatively as a state-law based right.

An Objection was filed by the State of Idaho. On December 11, 2003, a trial was held on this and other claims pursuant to Idaho Code 42-1411A(12), which requires the United States to demonstrate a *prima facie* showing of the existence of the claimed federal reserve water right. In conjunction with that trial, the United States filed affidavits, which were admitted into evidence. According to the minute entry from the trial, Special Master Thomas Cushman found that the above right was a valid PWR 107 Federal Reserve water right. However, no *Special Master's Report* was issued.

Based on the Special Master's minute entry, the Court concludes the following:

1. Prior to April 17, 1926, the subject water source the claim was located on unreserved federal public domain land.

2. Prior to April 17, 1926, no water rights had been established pursuant to state law for the use of the water from the subject water source for the claim.

3. On April 17, 1926, President Coolidge executed Public Water Reserve 107, which withdrew the 40 acre tract of land upon which the subject water source for the claim is located from the public domain. The tract of land withdrawn for each claim is described as the "place of use" element on the attached *Special Master's Recommendation*.

4. The subject water source for the claim consists of a spring or water hole of the type contemplated by Public Water Reserve 107.

5. Contemporaneously with the withdrawal of the land, President Coolidge impliedly reserved enough water to fulfill the primary purpose of the land reservation for the claim.

6. The minimum amount of water necessary to fulfill the primary purpose of the land reservation is the amount set forth in the "quantity" element on the attached *Special Master's Recommendation* for the claim.

7. The United States has satisfied its burden under Idaho Code section 42-1411A(12) as to the nature and existence of the claimed federal reserve water right for the claim.

8. The elements of the federal reserved water right for the claim are set forth on the attached *Special Master's Recommendation*.

III. RECOMMENDATION

Therefore, based on the file and record herein, IT IS RECOMMENDED that the above-captioned water right be decreed as a federal reserved water right with the elements as set forth in the attached *Special Master's Recommendation for Partial Decree Pursuant to I.R.C.P. 54(b)*. It is further recommended that to the extent any concomitant state-law water right was claimed in the alternative for the above-captioned right, that said right not be confirmed in any partial or final decree.
