Subject: Re: gps coordinates for city of idaho falls

ID falls PIR for well
location...

Attached is a list of your Idaho Falls PWS wells that have GIS differentially corrected location information. I included data for decimal degrees and for degrees, minutes, seconds (DMS). Please note that the DMS fields are concatenated with the first two digits for degrees, the second two for minutes and the last two before the decimal point for seconds. After the decimal point are fractions of a second.

Also note that our database does not allow for negative numbers. I will leave it to you experts to figure out which way from the prime meridian the longitudinal numbers are indicating.

Dear Jason,

Could you please provide me with the GPS coordinates of the City of Idaho Falls wells for the purpose of verifying locations for the Snake River Basin Adjudication? IDTM (meters) is preferred but lat and long would work as well. Please call me at 525-7161 if you have further questions. Thanks so much for your help.
