

A25-02030 Summary 11/11/03

General Comments Please see comments for all Lombard claims in A25-00229.

This is based on a license for 10 acres of irrigation and domestic. The claim includes irrigation and stockwater.

The lands I found that could be irrigated ("D2" on the map in A25-00229) are about 25 acres. It looks like in most years only about 10 acres are actually able to be irrigated.

Ownership Appears to be correct

POD Irrigation POD is a split in the creek @ Waypoint 19, IOTM
711,147 E 228,623 N.

One stockwater POD is a developed spring that supplies a trough. Waypoint 20, IOTM 711,341 E 228,820 N.

One stockwater POD is a pond, Waypoint 21, 711,539 E 228,943 N.

A25-02030 Summary p2 11/11/03

POU The claimed POU is 10 acres, and likely represents actual irrigation in most years. You may wish to consider inviting an enlargement claim for the additional irr. land "A₂" on the map in A25-00229.

Overlap possible overlap w/ A25-00229 on the lower end. See summary in that file.

Conflict None noted unless USFWS has a competing claim.

Priority Per license

Quantity Per license. In some years greater Q than licensed is probably enjoyed, you may wish to invite a ben. use claim?

Water Use . Claimed uses are correct. Note livestock use is an accomplished change from the license.
