OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

NO LAWFUL APPROPRIATION SHOWN: There are a number of circumstances in which a claim is proposed to be disallowed on this basis. This is most commonly included for a claim based on beneficial use or posted notice that is PROPOSED to be disallowed because the right claimed is not within an exception to the mandatory permit statute, and beneficial use of water prior to the mandatory permit statute was not confirmed. This is also included where a claim is PROPOSED to be disallowed because the claim is to water that is not public water subject to appropriation. This is also included where a right was determined not to exist in a prior adjudication.

NO LAWFUL APPROPRIATION SHOWN.

EXPLANATORY MATERIAL: Beneficial Use

RE: Recommendation of Claim No: 45-13744 - a portion of 45-10333

Evidence of priority exists in the form of USFS license 45-7594 which has a priority date of 4/1/1986. See copy of license and field exam in file.

Per a Stipulated Agreement signed by the other claimants of original claim 45-10333, Scott Bedke, Karl Bedke and Mike Poulton, their portion [45-13743] was recommended with a 1986 priority date.

As Bruce Bedke did not sign the above mentioned stipulated agreement, no vehicle exists for my recommending the licensed development date of 1986 for his beneficial use claim.* In addition, he continues to assert an 1872 priority date for his portion [45-13744] of the original claim. 1872 could only represent use by the cattle at the spring source prior to construction of the pipeline, however the claim did not list the location of the spring as a place of use. Since the claimed place of use only identified the trough locations, and the troughs did not exist in 1872, claim 45-13744 is being disallowed.

*The mandatory permit statute for surface water has been in effect since 5/19/1971.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.

RE: WATER RIGHT NOS. 45-7549, 45-7591, 45-7594, 45-7595, & 47-8032

Dear Ms. Curtis:

We have reviewed the proposed applications listed above for amendment accuracy as requested in your letter of April 20. The first three of these proposed amendments are not completely correct as written because of minor land description and location discrepancies. These discrepancies are described for each proposed amendment as follows:

45-7549 is a small stockwater pond (West Goose Creek Pond #2) located in, and collecting water from a spring in the SWNESE, Sec. 18, Township 16S, Range 19E, as shown on the attached map, although it is close to the center of the SE quarter of that Section. Also, please correct the place of use to the NESE of that Section. There is a pond located at Rattlesnake Spring that, according to our records, was constructed in 1940, but that is not the pond nor source intended with this application.

45-7591 is for the development of a headbox, pipeline to a trough, and a stockwater pond to collect water from Meadow Spring in the SENESW, Sec. 6, Township 16S, Range 19E, as shown on the attached map. This location is in the same 40-acre, quarter-quarter section as in the original application. The original map was intended to be correct, as the place name, Meadow Spring, appears on the USGS quad map correctly, but the trough symbol was misplaced by that printed place name.

45-7594 is for the development of a headbox and pipeline to an adjacent trough, and to four more troughs over about two and one-half miles, for water from Chalk Spring and an unnamed spring as shown on the attached map. The proposed amendment goes a long way to show the correct description as opposed to the original application, but one of the five troughs is mis-described, and diversion location for the unnamed spring (or Chalk Spring II) is not given. There is no trough in the SWSE, Sec. 36, Township 15S, Range 20E; the trough is in the NWSE of that Section 36. The primary water source, Chalk Spring, is correctly located in the NWNENE of Section 25, but the identified secondary source should also be included in the SWNENE of Section 25.

The grazing association amended the priority date on the above claims to 4-1-1872.

We discussed the issues concerning claiming stockwater uses as falling into three general categories. 1. In-stream use; 2. A developed spring at the source; and 3. A developed spring/stream with a significant delivery system, primarily a pipeline stocktank system. I indicated that many of their claims may have to be revisited, maybe even additional claims filed.

We reviewed the rights sent to the court and they took objection forms home to complete and send out.

We also discussed the federal filings for stockwater and I showed them the USFS maps that were provided for department review. They indicated that they may wish to object to many of those rights. I suggested that they contact the court to determine the procedure required to file multiple objections. I generated a selection file BEDKE-BLM-CHECK for claims in TNS 15S & 16S; RNG 21E; and parts of 14S. I then deleted F records and decreed rights that appeared to be irrigation rights. I used that selection file to generate a number list for his review. Jeanie Robertson assisted me in this process.
