STOCKWATER CLAIMS

JARED BEDKE

Jared Bedke called Jeanie Robertson March 12, 2004 to discuss the email I sent to him on March 10, 2004 regarding the splitting of Bruce Bedke's stockwater claims into smaller units.

He clarified his request sent to Jeanie by email on February 25, 2004 that claims 45-10492 and 45-10500 [claimed in the name of Bruce Bedke] be split into 668 separate de minimus claims of .02 cfs each and his request that Bruce Bedke's portions of 45-10325, 45-10327, 45-10329, 45-10330, 45-10332 (reported) 45-10333, 45-10334, 45-10335 & 45-10336 [originally claimed in the name of Winslow Whitely, Ray Bedke, Gary Poulton & Bruce Bedke] be split into 658 separate de minimus claims of .02 cfs each.

Jared stated that the only way they would have enough water for their cows would be to have over 1000 claims for .02 cfs each. He further stated a concern that if they did not have a water right on each 10-acre tract of land someone else could come in and claim a water right on that property. Jeanie and I told Jared that we would discuss his request with others at IDWR and get back to him.

I asked Jared to explain why the claimed PODs for Worthington Spring were not anywhere near the location of Worthington Spring on the USGS Quad map. He told me that, as locally known, Worthington Spring was a stream that arose from three springs in section 27 (claimed as Ward Springs 1, 2 & 3). The springs sank and then resurfaced directly north of the Worthington Springs identified on the USGS Quad, which was really just Granite Creek. I told him that according to the claim, Worthington Spring started and ended in Section 19 even farther north than where he was indicating. He said that was an unnamed stream.

I asked Jared about South Fork Blue Hill Creek, which was claimed but does not appear on the USGS quad. He said that locally Blue Hill has a south and north fork, but he realized that the USGS quad did not recognize that.

Jared,

We haven't be able to receive clear direction yet on how to proceed with your claims. We have set up a meeting with several folks here at IDWR to discuss them next Thursday (3/18). Thank you for your phone call, it did resolve a couple of questions I had about what stream was which. Your recall of the maps was amazing.

Jared,

Jeanie Robertson received the information you emailed and has asked me to assist her in organizing your stockwater claims (see numbers below). Thank you for identifying all of the 10-acre parcels. We would like to group the claims by: 1) Type of diversion - a) instream, b) developed spring, c) pipeline system to troughs, 2) Sources grouped within a sub-basin - for example, the instream uses from streams and springs tributary to Blue Hill as opposed to those tributary to Beaverdam, or all the troughs linked by one pipeline system, and 3) Private or Public lands

In the past it has been helpful for the claimants to identify the springs, troughs, instream reaches and pipelines on USGS Quadrangle maps and then meet with us to organize the uses by type and location. I know that your grazing association has been in contact with IDWR several times in the past years, and so you may already have prepared those kinds of maps. Please contact me to set up an appointment when you have had a chance to review some maps and we can break out the claims as necessary. Meanwhile, I'll review what we have here and try to identify any questions I have. We are hoping to have our report mailed the first of April, so please email or give me a call as soon as you can.

Jeannie, Here are our conversions from the original large filings to the smaller de minimus format.

Here is what we would like for the other elements of each filing.

Claimants: Bruce Bedke, Jared Bedke
Priority Date: April 1, 1872
Basis of Claim: Vested

I am attaching 2 separate Excel files, both contain different filings that have been converted from the original large filings to de minimus descriptions.

If you have any questions please email me at: jbedke@starband.net or call at: 208 862-3697.

Thank you,
Jared.
