RE: Protest of claim A45-10336

Dear Mr. & Mrs. Austin:

I am writing to acknowledge receiving your letter of protest. This right has not yet been recommended to the court for eventual decree, and therefore, is not open for objection. I will include your information with the claim file for consideration at the time the claim is reviewed in preparation for recommendation to the court.

In addition, I have an appointment with one of the Bedkes soon and will make the concern known at that time. This claim could be amended by the claimants in the near future, though I cannot require them to do so. If the claim is not amended and the land is recommended in their claim you may then file an objection. IDWR anticipates filing a report that would include this claim late in the year 2000.

Thank you for your interest in the matter and please contact us if you have other questions.

Sincerely,

Douglas Jones, P.E.

Subject: Protest of Adjudication Claim for Water Right A45-10336

1. This protest is filed regarding that portion of water right A45-10336 described as NW/NW/SE, Sec. 14, T 15S, R 21E, Cave Gulch Creek.
2. The reason for the protest is that the point of diversion claimed is on private property owned by Carl F. and Barbara V. Austin.
3. The persons claiming this point of diversion have no legal access to this property and the filing is false in that this portion of the filing is not in their grazing unit, and their cattle have no right of access and would have to cross fence lines onto private land they do not own.
4. The place of use described as the NWSE of Sec. 14, T 15S, R 21E is likewise private property which they do not own and to which they have no legal access.
5. The following exhibits are provided:
 - Exhibit A. Copy of deed showing the ownership of NWNWSE Sec 14, T 15S, R 21E and the NWSE Sec. 14, T 15S, R 21E
 - Exhibit B. Copy of a portion of the Blue Hill Quadrangle, with the private land shown in red and the disputed point of diversion shown by cross-hatching and the disputed point of use shown by diagonal lining.
 - Exhibit C. Copy of the water right claim A45-10336 with the contested point of diversion highlighted in orange.
 - Exhibit D. Copy of the water right A45-10336 showing the contested point of use and the false statement regarding location in their grazing allotment, both highlighted in orange.
6. We respectfully request that the portion of water right A45-10336 involving the NWSE Sec. 14, T 15S R 21E, be declared null and void as it is an attempt to obtain a water right on private land which the claimants do not own, do not have a right of access to, and which is not within their grazing unit despite their claims to the contrary.

The grazing association amended the priority date on the above claims to 4-1-1872.

We discussed the issues concerning claiming stockwater uses as falling into three general categories. 1. In-stream use; 2. A developed spring at the source; and 3. A developed spring/stream with a significant delivery system, primarily a pipeline stocktank system. I indicated that many of their claims may have to be revisited, maybe even additional claims filed.

We reviewed the rights sent to the court and they took objection forms home to complete and send out.

We also discussed the federal filings for stockwater and I showed them the USFS maps that were provided for department review. They indicated that they may wish to object to many of those rights. I suggested that they contact the court to determine the procedure required to file multiple objections. I generated a selection file BEDKE-BLM-CHECK for claims in TNS 15S & 16S; RNG 21E; and parts of 14S. I then deleted F records and decreed rights that appeared to be irrigation rights. I used that selection file to generate a number list for his review. Jeanie Robertson assisted me in this process.
