The grazing association amended the priority date on the above claims to 4-1-1872.

We discussed the issues concerning claiming stockwater uses as falling into three general categories. 1. In-stream use; 2. A developed spring at the source; and 3. A developed spring/stream with a significant delivery system, primarily a pipeline stocktank system. I indicated that many of their claims may have to be revisited, maybe even additional claims filed.

We reviewed the rights sent to the court and they took objection forms home to complete and send out.

We also discussed the federal filings for stockwater and I showed them the USFS maps that were provided for department review. They indicated that they may wish to object to many of those rights. I suggested that they contact the court to determine the procedure required to file multiple objections. I generated a selection file BEDKE-BLM-CHECK for claims in TNS 15S & 16S; RNG 21E; and parts of 14S. I then deleted F records and decreed rights that appeared to be irrigation rights. I used that selection file to generate a number list for his review. Jeanie Robertson assisted me in this process.
