SRBA CLAIMS AT BUCKHORN RANCH

JOE TUGAW

Joe Tugaw came into the office November 14, 2003 to discuss his various claims. At that time we went over my recommendations for ground water and for surface water at his Buckhorn Ranch property.

He agreed with my recommendations for ground water as they were based upon his 1996 transfer #4065 and upheld the 1980 Golden Valley decree. He also agreed with my recommendation for surface water from Robber Gulch Creek, Buckhorn Creek and Mtn Meadows Creek, which were recommended on specific POU's and mostly overlapped by ground water.

Mr. Tugaw stated that water use on the ranch had changed somewhat since 1987 but that it did not encompass any more acres as far as he could tell. He is planning to install different pivots and preparing to change the irrigated place of use slightly from that identified in my recommendation. He asked about filing a transfer to do that. I told him that he could file a transfer at any time and should, especially if he wanted it approved in time to use his new pivots by next spring.

RE: Snake River Basin Adjudication (SRBA)
Preliminary Recommendations

Dear Joe:

I have completed preliminary recommendations of your irrigation water rights both at the farm on Dry Creek and on the farm on Buckhorn Creek. Following is a summary of the rights as I propose to recommend them.

Farm at Dry Creek

Surface Water Claims:

45-487B	2.08 cfs	Priority - 1879	Dry Creek
45-491	2.60 cfs	1884	Dry Creek
45-492	.08 cfs	1884	Dry Creek
45-493	.08 cfs	1885	Dry Creek
45-495	.90 cfs	1908	Deer Creek
45-496B	2.40 cfs	1908	Dry Creek

In addition to the above, I find that you are entitled to file a claim for 0.37 cfs of right 45-488, priority date 1884. This decreed right had the same original place of use as 45-487 and should be split using the same acreage proportions.

Ground water Claims:

45-2449	2.80 cfs	1953
45-2486	3.9 cfs	1954

The ground water rights combined are limited to the irrigation of 347 acres and a total diversion volume of 1388 acre feet per annum.

Surface and ground water rights when combined are limited to the 402.8 acres actually found irrigated within Sections 1 and 12, T12S, R19E, using 1987 aerial photos

Pursuant to Transfer 2604, a portion of the 347 acres under right 45-2449 may be irrigated within a permissible place of use of 546.8 acres. This permissible place of use includes acres located within Sections 1 and 12, T12S, R19E, and Section 10, T12S, R20E. However, acres dried up within Sections 1 and 12 to enable irrigation in Section 10 cannot be irrigated with any other water right. Any and all additional conditions found on transfer 2604 remain in effect.

Buckhorn Ranch

Surface Water claims:

45-2057	2.00 cfs	1909 Buckhorn Creek
	1.68 cfs	1909 Robber Gulch Creek
45-2321	3.50 cfs	1954 Buckhorn and Robber Gulch Creeks
45-4212	1.20 cfs	1899 Mountain Meadow Creek

Buckhorn and Robber Gulch Creeks are appurtenant to 380 acres
Mountain Meadow Creek is appurtenant to 60 acres

Ground water Claims:

45-2283	1.64 cfs	1948
45-2322	3.33 cfs	1950
45-2575	.55 cfs	1959

Ground water rights are appurtenant to a combined total of 773.2 acres and limited to a combined diversion rate of 5.52 cfs and annual diversion volume of 1663 acre feet. Ground water rights are subject to the conditions of Decree No. 9818 dated 6-25-1980.

Surface and ground water rights combined are limited to the irrigation of a total of 771 acres.

* * *

I have also found water right 45-4213 that has not been filed on in the SRBA. It is for irrigation and domestic use at your cabin located at Fuller Pasture in the South Hills. It appears that you and Jeanie prepared a claim but it was never signed nor was the \$75.00 filing fee paid. After you have completed the filing I can review and recommend the water right.

In addition to your claims for irrigation use, I have reviewed and recommended a number of your stockwater claims in the Dry Creek and Cottonwood Creek drainages. Claims filed for stockwater in the Rock Creek drainage and identified in basin 45 have been renumbered to basin 47 and will be included with IDWR's Director's Report for that basin.

I have enclosed maps based upon 1987 aerial photos of your farms with the irrigated acreages outlined. To discuss your irrigation and stockwater claims, and file the additional rights mentioned above, please call to make an appointment with me here at the office.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Vikie', written in dark ink.

RE: Recommendation of Claim No: **45-2057 & 45-2321**

45-2057 was issued in 1956 but the field exam was conducted in 1913. It awarded 2 cfs of Buckhorn Creek from a point of diversion once located at a reservoir in the NWNW Section 25 and 1.68 cfs of Robber Gulch Creek from a point of diversion located in the NWNW Section 36. Robber Gulch Creek was diverted by ditch to the west and into Buckhorn Creek and then into the same reservoir. 184 acres of land was found irrigated and another 139 were found to be prepared but not irrigated at the time of the field exam.

45-2321 was issued in 1958 and the field exam conducted in 1957. There seems to be an error in the PLS identification of the points of diversion. The original sketch submitted by the applicant identified the existing ditches in the correct tracts, however using what was then current maps, the Department suggested a change in the legal descriptions to different sections. The permit application and field exam remarks indicate that the 3.5 cfs licensed under this right is the entire spring flood of the two creeks. The place of use was found to be 380 acres which overlapped both the POU licensed under 45-2057 above, and also overlapped ground water right 45-2322 licensed for 275 acres.

The reservoir once in the NWNW Section 25 is no longer identified as such in the current USGS quad, and not listed as a current point of diversion. It appears that Robber Gulch water is no longer injected into the Buckhorn channel but now flows north in a separate ditch. The PODs claimed in the SRBA included the inaccurate point of diversion in Section 34 listed in licensed right 45-2321. I located the SRBA recommended points of diversion using the licensing field exams, 1962 aerial photos and current USGS quadrangle maps.

According to GIS calculations, combined rights 45-2057, 45-2321, 45-2322, 45-2283, 45-2575 and 45-4212 irrigate a total of 769 acres.

Water Right Claim Number A45-0205.
