RE: Evidence of Priority

RESPONSE DEADLINE

APRIL 1, 1993

Dear Claimant:

The Notice of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will at a later date conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

Please find enclosed a computer printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

SPECIAL NOTE: The Department will not recommend the Notice be decreed by the court as claimed if no evidence of a priority date is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement must be in the form of a notarized affidavit.

Please submit the required evidence supporting the priority date by April 1, 1993, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.

MEMO TO FILE

From: Vikie Hancock

1/22/04

RE: Recommendation of Claim Nos: 45-11066 & 45-11092
LITTLE CEDAR CANYON CREEK

Note that these two rights were filed by separate parties who, at the time of claims taking, each owned a part of the place of use for Little Cedar Creek, although delivery was made using a common system which also included Cottonwood Creek. At the time the SRBA recommendation was created the entire place of use was owned by one party.

Claimed Priority for both claims is 1924.

Per affidavit of Ralph Poulton:

- Use began by Poulton family in 1924
- All of water in creek was used to irrigate the farm
- POD was at mouth of creek (or canyon) and conveyed around the hill to the Warm Creek ditch

As documented in the 1953 Poulton v Foster decree, in 1953 four Poulton families owned 16 forty-acre tracts [640 acres] which became part of the Warm Spring Ranch currently owned by John Beukers. Using 1962 aerial photo it was determined that a maximum of 496 acres would have been irrigated within the 640 acres circa 1924.

In 1965 Poulton's 640 acres were combined with property owned by Simon Baker: the S½ S7, E½ S20, E½NE S29. This is the entire farm now owned by John Beukers and included in the permissible place of use for these rights.

Aerial photos also show that additional acres may have been irrigated from Little Cedar Canyon Creek along with the expanded use of Big Cottonwood Creek (see 45-13614 & 45-13615), as both surface water sources were combined in one conveyance system at the farm. No expansion or enlargement claims have been filed for this source as of this date.

Two points of diversion were documented by Brockway Engineering: SWSE S6 and NESW S5, T13S, R21E. And the capacity of the ditches supported the total claimed diversion rates under 45-11066 & 45-11092.

Vikie,

That sounds reasonable to me regarding the additional point of diversion on Little Cedar. I wasn't really able to define the specific location of another point of diversion since the whole drainage is intercepted and appears to run in a multitude of minor channels...perhaps you can devise a remark to indicate that? After seeing the size of the main channel, and the log-jams from past spring flows I tend to think that improvements to reduce ditch losses might provide a significant amount of water each year—at least early in the season.

Kirk didn't stop by for notarization of the affidavit as he indicated, and I haven't been able to get him together with a notary. I apologize for the delay, but hopefully after the hectic holidays he will be able to stop by to get that finalized. I don't think there is a problem, just a matter of busy schedules.

Jason,

Thank you for the information, analysis and exhibits on the Beukers diversion works from Little Cedar Canyon Creek. It looks like you went out there just in time, weather-wise.

It appears to me that, although the ditch may have a larger capacity, the 12 inch pipe conveying water under the dirt road in the SENE of Section 6 would limit the delivery capacity to approximately 4.0 cfs, figuring a velocity of 5 ft per second. If during times of high flows, excess water traveled down the poorly defined channel to the Cottonwood Ditch and therefore made additional water available to the water user through that route, a second point of diversion should be added to the claim in the NESW Section 5.

I can prepare an amended claim for the Beukers to sign if you and your client agree that it would represent the manner in which water was most probably historically diverted from the creek.

Any news from Woodhouse regarding the affidavit on the well for 45-2572?

Dear Vikie:

I have completed my examination of the Little Cedar Creek drainage and it is my conclusion that a total of 6 cfs is a reasonable claim on the flow associated with SRBA claims 45-11066, 45-13537 & 45-13538.

Initially a flood frequency and magnitude estimate was performed based on the overall drainage area of Little Cedar Canyon. Using the procedure developed by the USGS in Open File Report 81-909 a 2 year return flood was calculated to be 15cfs.

A field examination to determine the potential carrying capacity of the diversion and ditch system reveals a significant channel developed and maintained that is capable of passing 74 cfs according to Mannings equation and survey data taken 12/16/03.

Based on my field examination, it appears that the location of the earthwork diversion is in the SWSE of Section 6 in T.13 S, R. 21 E. Additionally, the ditch that delivers the surface water from Cottonwood Creek traverses the length of the mouth of Little Cedar Canyon so any and all other flow emanating from Little Cedar Creek is also intercepted and delivered to the same lands covered under the Cottonwood Creek Rights.

If you have any questions please feel free to contact me.

Sincerely,

Jason C. Helms, EIT

Water Use

AFFIDAVIT

State of Idaho

County of Cassia

Ralph (Kelly) Poulton

being first duly sworn,

deposes and says:

I have seen ~~all the~~ water diverted from the mouth of Little Cedar around the mountain and into the Warm Creek ditch and to the ranches owned by George, Lafe, Raymond and Richard Poulton, ranches commonly known as the Warm Creek Ranches. I first remember it in 1923 or 24 when my family moved to Warm Creek. In 1942 I acquired the Lafe Poulton interest. In the late fifties or early sixties Simon Baker acquired the Raymond and Richard interest. In about 1985 The Wood or Woods Corporation acquired control of all of this property.
