Counsel for the United States of America

**IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS**

In Re SRBA	)	Subcase No. 65-22206
	)	
Case Number: 39576	)	AFFIDAVIT OF WALTER B. ROGERS
_____	)	

State of: IDAHO
County of: ADA

Walter B. Rogers, being first duly sworn upon oath, deposes and says:

1. I am currently employed by the United States Department of Agriculture, Forest Service (Forest Service), as the District Ranger on the Lowman Ranger District of the Boise National Forest. I have been employed by the Forest Service for 32 years.

2. As part of my assigned duties and responsibilities as the District Ranger on the Lowman Ranger District I am familiar with use at Deadwood Guard Station.

3. I have reviewed the reserved water right claim, as amended and attached as Exhibit 1, submitted by the Forest Service for Deadwood Guard Station (Claim).

4. The Claim was prepared by Forest Service personnel as part of their normal duties. I verified the legal locations as set forth and described in Exhibit 1 and have personal knowledge that the location of the point of diversion and point of use and source of the water supply are true and correct as described in Exhibit 1.

5. The Claim is situated wholly within National Forest System lands. It is currently utilized by the Forest Service at Deadwood Guard Station to manage National Forest System lands.

6. The Claim is necessary for the administration of the National Forest pursuant to the Organic Administration Act of 1897, 16 U.S.C. § 475 *et seq.*, for the purposes of securing favorable conditions of water flow and to furnish a continuous supply of timber.

7. The United States filed this Claim for use in association with Deadwood Guard Station, an Administrative Site located in a remote part of the Boise National Forest. The administrative site includes two dwellings, a garage, a warehouse, five trailer pads and other capital improvements. It is used every year by the Forest Service to administer National Forest resource management programs. Personnel utilize water at this site for administrative purposes. Occupation and use of Deadwood Guard Station is essential to the overall administration of

Forest Service programs on this part of the Boise National Forest. Personnel use this site to administer National Forest System(NFS) resource management programs, primarily recreation. However, a requirement of the recreation person housed at this location is that they are initial attack qualified for fire because fire prevention, suppression of small fires, initial attack and reporting of large fire is an important element in the recreation managers responsibilities. Administration of NFS programs, such as recreation, and presence in the area serves to protect the forest from depredations and destruction. This serves to ensure continued viability of the resources on surrounding federally reserved NFS land. This directly contributes to watershed protection, preservation of timber stands and to the maintenance of and improving watershed conditions, timber production and favorable conditions of water flow.

8. Based upon personal experience and knowledge, discussions with Forest Service personnel and review of relevant Forest Service records, including but not limited to, on-site inspection records, water has been historically, and is presently utilized at Deadwood Guard Station in quantities up to and including 0.03 c.f.s. during the period of January 1 through December 31, as described in Exhibit 1.

9. Based upon the forgoing, I have personal knowledge of the following elements of the reserved water right claim:

a. The name and address of the claimant is:
