ATTACHMENT A
63-3614

1. Ownership, Quantity, Place of Use. The Idaho Department of Water Resources (IDWR) has recommended this right in the name of the United States Department of Interior, Bureau of Reclamation (Reclamation). However, New Dry Creek Ditch Company (New Dry Creek) is the owner of 1,296 acre feet of this water right based upon the fact that this portion of the right was perfected by beneficial use on lands within New Dry Creek's boundaries, and is therefore appurtenant to those lands. New Dry Creek's position is in accordance with Idaho Law, the Reclamation Act of 1902, 43 U.S.C. § 372, and is supported by case law holding that a water right developed under the Reclamation Act is appurtenant to the land, and the landowners are the owners of the water right. *Ickes v. Fox*, 300 U.S. 82 (1937). Consistent with these authorities, New Dry Creek has filed SRBA Claim no. 63-3614D, seeking a decree of 1,296 acre feet of this water right in New Dry Creek's name, appurtenant to lands within New Dry Creek's boundaries. Issuance of such a decree to New Dry Creek will require that 1,296 acre feet not be included in the decree for Water Right Number 63-3614.

In the alternative, at a minimum under these authorities, New Dry Creek is the beneficial owner of the water right and Reclamation holds only nominal legal title. If the court decrees the water right to Reclamation in this manner the decree must state that Reclamation holds legal title in name only, and New Dry Creek is the beneficial owner of 1,296 acre feet, appurtenant to lands within New Dry Creek's boundaries.

2. Purpose and Period of Use. Consistent with the License for this water right, the decree must specifically provide that this water right may be utilized to generate power as and when water is released from Anderson Ranch Reservoir for irrigation use. The period of use for Power from Storage, Municipal from Storage and Industrial from Storage must be limited to the same period of use as Irrigation from Storage.

In addition, in order to properly define and administer this water right, there must be: a remark which provides that any change to the elements of this water right requires a transfer pursuant to Idaho law; a remark which requires New Dry Creek's approval of any change to New Dry Creek's portion of this right (1,296 acre feet); and a remark which requires that uncontracted space be made available for irrigation use.
