A25-00062 / A25-00170 Summary 9/18/03

- 1) POB appears to be correct on map but double-check w/ GPS - I couldn't tell how far east we drove to reach it.

GPS 676,629 E 279,947 N
waypoint 62.

- 2) POB appears to be correct on layout. Note my marks. Hillside is currently sprinkled but claimant says it used to be gravity irrigated from Farmers Friend ditch on hillside above, since removed.

- 3) Overlap. These rights are overlapped with Farmers Friend shares.

- 4) Photos. 2 photos of headgate, 1 of pump, one of flume that carries water to N side of creek, 2 of POB.

- 5) Combined diversion rate per acre. Claimants request a Hubble analysis to justify combined diversion rate > 0.02 cfs/acre. This is especially important for the Willow Creek water because it is cut off early in the season. When the

Ownership is correct

page 2

Summary 9/18/03

Water is available it is important to spread it across as much land as possible to store moisture in the soil profile for later in the season. Claimants state this is deep soil capable of storing significant water.

This is a legitimate agricultural practice for hay and grain (or other deep rooted crops). All the POU is in hay and grain this year. I propose recommending the diversion rates supported by the decree w/o limitation.

Byrne A. Connor

A25-00062 / A25-00170 Field Notes

- Per Deavold Ferguson, Mrs. Ferguson, Kim Ferguson, mapped POD & POA are correct. Deavold & Kim accompanied me to POD.
- Flume carries water to N. Side - See photos
- Photos 2 of headgate
GPS 676629 E 279947 N
Waypoint 62
- Pump water hillside & house lawn. Originally watered from Farmer's Friend ditch which was on the hill, now it has been removed.
- Photos 2 of POA, 1 of pump,
one of flume.
- Claimants request Hobble analysis for
 > 1" / acre - deep soil, water
 cuts off early - strap in soil for
 later.

A25-00062 / A25-00170 Contact log

9/11/03 16:45 522-3127

Mrs. Ferguson says Mr. Ferguson
will be there @ 11171 Ferguson 1:30 - 2:30
Road before is 95th North PM approx
Ferguson road $\frac{1}{2}$ mile, go south
about $1\frac{1}{2}$ mile 2 story end of Road.

9/15/03 Mr & Mrs Ferguson

- 1) Map of POA & POD appears correct. See maps for notation of direction ditches run.
- 2) Farmers Friend Water also used on this POA.
