A25-00056E / A25-00061A Summary 9/27/03

I couldn't contact owner but stopped by and found him home, he was with me during inspection.

- 1) Ownership is correct per change of ownership filed 1/2003. New phone numbers:

Note: Ownership also applies to A25-00061A, from

paper file it is not clear that was done.

- 2) POD is correct on layout. Two 5-lip pumps lift water $\approx$ 8 feet into ditch. GPS

POD can only serve the south 2 40 acre parcels. N. parcel is irrigated from N by ditch. Claimant is a new owner and did not operate the farm. Likely N ditch comes from Anderson Canal or another Canal. Farm also has Enterprise shares.

- 4) POU is correct per layout.

A25-00056E / A25-00061A Summary p2

5) Overlap. Enterprise shares.

6) Proposal. From other claimants it appears there is a formal or informal arrangement for exchanges, allowing canal w. shares to be delivered via Willow Creek & allowing Willow Creek rights to be served by Snake River water from canals. Though N side of Pou could physically only be irrigated from claimant's POD if a pressurized system were installed, I propose recommending full Pou if supported by decree & reasonable accomplished transfer if needed.

6) Photos of POD & Pou.
