

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA

Case No. 39576

Subcase Nos.: 31-184

STANDARD FORM 5

STIPULATED ELEMENTS OF A
WATER RIGHT

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The parties and IDWR agree and stipulate that the following language should be added as an additional General Provision for Basin 31 in addition to the "Connected Sources in Basin 31 (Conjunctive Management General Provision)" already recommended.

No dam or other obstruction to the natural flow of Camas Creek or its tributaries shall be maintained so as to divert water from the channel of the stream, except through ditches, canals or other works provided with head gates, control works and measuring devices. Holders of water rights to divert water from Camas Creek or any of its tributaries, their successors, agents, servants and employees are hereby perpetually enjoined and restrained from maintaining in any stream or slough, or permitting to exist within such stream or slough where the same traverses their respective lands, or any land owned or controlled by them, any obstruction to the flow of water, except in connection with the diversion of water through head gates equipped with measuring devices. In case any water right holder shall fail to remove any obstruction from the natural channel of Camas Creek or any of its tributaries within 7 days after receiving notice from the watermaster, who has determined that the obstruction interferes with water delivery, the watermaster may authorize a water user to remove such obstruction in accordance with applicable law. The expense thereof shall be the responsibility of the water right holder requesting the removal.
