Procedural Background

The above-captioned water right was claimed in the SRBA, pursuant to state law, by the United States Department of the Interior, Bureau of Land Management. Objections were filed by the State of Idaho and the United States. On June 5, 2000, the State of Idaho and the United States filed a Standard Form 5, which, among other things, amended the basis of the claim from state law to a federal reserve water right based upon Public Water Reserve 107 (PWR 107). Because of the federal reserve basis for the claim, IDWR did not sign the SF-5.

On May 24, 2002, the United States filed a *Motion for Summary Judgment* in this and numerous other subcases involving PWR 107 claims. At the hearing on the United States' *Motion* (July 19, 2002), this Special Master ruled that the legal issues raised by the State of Idaho have previously been addressed by the SRBA District Court and the Idaho Supreme Court, and the only issue that remains with respect to the PWR 107 claims is for the United States to make a showing as to the underlying factual basis for the claims as required by Idaho Code section 42-1411A(14). Further, this Special Master ruled that because the State's objection raised only legal issues, and because all legal issues have been addressed and disposed of, that the State of Idaho is dismissed as a party

to the subcases that were the subject of the United States' May 24, 2002 *Motion for Summary Judgment*.

On August 21, 2002, a hearing was held on this and other subcases pursuant to Idaho Code 42-1411A(14), which requires the United States to demonstrate a *prima facie* showing of the existence of the claimed federal reserve water right. In conjunction with that hearing, the United States filed an *Affidavit of Frederic W. Price* and an *Affidavit of Deena M. Teel*. This Special Master also took sworn testimony of Frederic Price.

Findings of Fact and Conclusions of Law

Based upon the file and record in this subcase, and the evidence presented at the August 21, 2002 hearing on the matter, this Special Master makes the following findings of fact and conclusions of law:

1. Prior to April 17, 1926, the subject water source was located on unreserved federal public domain land.
2. Prior to April 17, 1926, no water rights had been established pursuant to state law for the use of the water from the subject water source.
3. On April 17, 1926, President Coolidge executed Public Water Reserve 107, which withdrew the 40 acre tract of land upon which the subject water source is located from the public domain. The tract of land withdrawn is described as the "place of use" element on the attached *Special Master's Recommendation*.
4. The subject water source consists of a spring or water hole of the type contemplated by Public Water Reserve 107.
5. Contemporaneously with the withdrawal of the land, President Coolidge impliedly reserved enough water to fulfill the primary purpose of the land reservation.
6. The minimum amount of water necessary to fulfill the primary purpose of the land reservation is the amount set forth in the "quantity" element on the attached *Special Master's Recommendation*.
7. The United States has satisfied its burden under Idaho Code section 42-1411A(14) as to the nature and existence of the claimed federal reserve water right.

8. The elements of the federal reserve water right are set forth on the attached *Special Master's Recommendation*.

Recommendation

Therefore, in accordance with the foregoing, IT IS RECOMMENDED that water right 51-12157 be decreed as set forth in the attached *Special Master's Recommendation*.
