STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

Case No. 39576

) Subcase: SEE ATTACHED EXHIBIT A
)
) SPECIAL MASTER REPORT AND
) RECOMMENDATIONS
)
) FINDINGS OF FACT AND
) CONCLUSIONS OF LAW

I. PROCEDURAL BACKGROUND

The above-captioned water rights were claimed in the SRBA as "dual based" claims, pursuant to state law and as federal reserve water rights pursuant to Public Water Reserve 107, by the United States Department of the Interior, Bureau of Land Management. An objection was filed by the State of Idaho.

On May 24, 2002, the United States filed a *Motion for Summary Judgment* in these and numerous other subcases involving PWR 107 claims. At the hearing on the United States' *Motion* (July 19, 2002), this Special Master ruled that the legal issues raised by the State of Idaho have previously been addressed by the SRBA District Court and the Idaho Supreme Court, and the only issue that remains with respect to the PWR 107 claims is for the United States to make a showing as to the underlying factual basis for the claims as required by Idaho Code section 42-1411A(14). Further, this Special Master ruled that because the State's objection raised only legal issues, and because all legal issues have been addressed and disposed of, that the State of Idaho is dismissed as a party to the subcases that were the subject of the United States' May 24, 2002 *Motion for Summary Judgment*.

On August 21, 2002, a hearing was held on these and other subcases pursuant to Idaho Code 42-1411A(14), which requires the United States to demonstrate a *prima facie* showing of the existence of the claimed federal reserve water rights. In conjunction with that hearing, the United States filed an *Affidavit of Frederic W. Price* and an *Affidavit of Deena M. Teel*. This Special Master also took sworn testimony of Frederic Price.

II. FINDINGS OF FACT AND CONCLUSIONS OF LAW

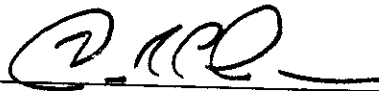

Based upon the file and record in these subcases, and the evidence presented at the August 21, 2002 hearing on the matter, this Special Master makes the following findings of fact and conclusions of law:

1. Prior to April 17, 1926, the subject water source for each of these water rights was located on unreserved federal public domain land.
2. Prior to April 17, 1926, no water rights had been established pursuant to state law for the use of the water from each of the water sources.
3. On April 17, 1926, President Coolidge executed Public Water Reserve 107, which withdrew the 40 acre tract of land upon which each of the water sources are located from the public domain. The tracts of land withdrawn are described as the "place of use" element on each of the attached *Special Master Recommendations*.
4. Each of the subject water sources consists of a spring or water hole of the type contemplated by Public Water Reserve 107.
5. Contemporaneously with the withdrawal of the land, President Coolidge impliedly reserved enough water to fulfill the primary purpose of the land reservation.
6. The minimum amount of water necessary to fulfill the primary purpose of the land reservation for each of the water rights is the amount set forth in the "quantity" element on the attached *Special Master Recommendations*.
7. The United States has satisfied its burden under Idaho Code section 42-1411A(14) as to the nature and existence of the claimed federal reserve water rights.
8. The elements of the federal reserve water rights are set forth on the attached *Special Master Recommendations*.

III. RECOMMENDATION

Therefore, based on the file and record herein, IT IS RECOMMENDED that the water rights listed on Exhibit A each be decreed as a federal reserve water right with the elements as set forth in the attached *Special Master Recommendations for Partial Decrees Pursuant to I.R.C.P. 54(b) for each of the water rights*. It is further recommended that the concomitant state-law water right claims not be confirmed in any partial or final decree.

Dated September 17, 2002.

Case No. 39576

) Subcase: SEE ATTACHED EXHIBIT A
)
) SPECIAL MASTER REPORT AND
) RECOMMENDATIONS
)
) FINDINGS OF FACT AND
) CONCLUSIONS OF LAW

I. PROCEDURAL BACKGROUND

The above-captioned water rights were claimed in the SRBA as "dual based" claims, pursuant to state law and as federal reserve water rights pursuant to Public Water Reserve 107, by the United States Department of the Interior, Bureau of Land Management. An objection was filed by the State of Idaho.

On May 24, 2002, the United States filed a *Motion for Summary Judgment* in these and numerous other subcases involving PWR 107 claims. At the hearing on the United States' *Motion* (July 19, 2002), this Special Master ruled that the legal issues raised by the State of Idaho have previously been addressed by the SRBA District Court and the Idaho Supreme Court, and the only issue that remains with respect to the PWR 107 claims is for the United States to make a showing as to the underlying factual basis for the claims as required by Idaho Code section 42-1411A(14). Further, this Special Master ruled that because the State's objection raised only legal issues, and because all legal issues have been addressed and disposed of, that the State of Idaho is dismissed as a party to the subcases that were the subject of the United States' May 24, 2002 *Motion for Summary Judgment*.

On August 21, 2002, a hearing was held on these and other subcases pursuant to Idaho Code 42-1411A(14), which requires the United States to demonstrate a *prima facie* showing of the existence of the claimed federal reserve water rights. In conjunction with that hearing, the United States filed an *Affidavit of Frederic W. Price* and an *Affidavit of Deena M. Teel*. This Special Master also took sworn testimony of Frederic Price.

II. FINDINGS OF FACT AND CONCLUSIONS OF LAW

Based upon the file and record in these subcases, and the evidence presented at the August 21, 2002 hearing on the matter, this Special Master makes the following findings of fact and conclusions of law:

1. Prior to April 17, 1926, the subject water source for each of these water rights was located on unreserved federal public domain land.
2. Prior to April 17, 1926, no water rights had been established pursuant to state law for the use of the water from each of the water sources.
3. On April 17, 1926, President Coolidge executed Public Water Reserve 107, which withdrew the 40 acre tract of land upon which each of the water sources are located from the public domain. The tracts of land withdrawn are described as the "place of use" element on each of the attached *Special Master Recommendations*.
4. Each of the subject water sources consists of a spring or water hole of the type contemplated by Public Water Reserve 107.
5. Contemporaneously with the withdrawal of the land, President Coolidge impliedly reserved enough water to fulfill the primary purpose of the land reservation.
6. The minimum amount of water necessary to fulfill the primary purpose of the land reservation for each of the water rights is the amount set forth in the "quantity" element on the attached *Special Master Recommendations*.
7. The United States has satisfied its burden under Idaho Code section 42-1411A(14) as to the nature and existence of the claimed federal reserve water rights.
8. The elements of the federal reserve water rights are set forth on the attached *Special Master Recommendations*.

III. RECOMMENDATION

Therefore, based on the file and record herein, IT IS RECOMMENDED that the water rights listed on Exhibit A each be decreed as a federal reserve water right with the elements as set forth in the attached *Special Master Recommendations for Partial Decrees Pursuant to I.R.C.P. 54(b) for each of the water rights*. It is further recommended that the concomitant state-law water right claims not be confirmed in any partial or final decree.

Dated September 17, 2002.
