CONDITIONS OF APPROVAL AND REMARKS

1. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
5. The right holder shall measure and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code.
- * 6. Rights 45-02379, 45-02692 and 45-04043 when combined shall not exceed a total diversion rate of 9.22 cfs from all points of diversion, a total annual maximum diversion volume of 3913.6 af at the field headgate, and the irrigation of 985.7 acres.
- ** 7. Right 45-02379 is limited to the irrigation of 280 acres within the place of use described above in a single irrigation season.
- ** 8. Right 45-02692 is limited to the irrigation of 270 acres within the place of use described above in a single irrigation season.
- ** 9. Right 45-04043 is limited to the irrigation of 705.7 acres within the place of use described above in a single irrigation season.
10. Approval of Transfer 5192 does not confirm Claimed Right A45-04043.
11. The period of use for the irrigation described in this approval for Right 45-02692 may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

RE: Application for Transfer (45-02379,-04015,-04043,-02692)

Dear Mr. Critchfield,

The application for transfer proposes to tie three wells with all the groundwater rights together into a common permissible place of use over your farm located east of Oakley. The land is located within parts of Section 35 (T12S,R22E), Sections 2 and 11 (T13S, R22E). **Note that this farm is located within the boundaries of the Oakley-Kenyon Critical Groundwater Area (closed on 01/19/1962).**

"Expansion" of an existing ground water right in a critical ground water area is allowed by §42-1416B, IDAHO CODE, if the "expansion" occurred prior to the commencement of the Snake River Basin Adjudication (11/19/87). This section of the code allows for an increase in the number of acres irrigated under a valid ground water right without any increase in the rate of diversion, or volume of water diverted. In addition, this section of code states that the priority date of the "expansion" right shall be June 30, 1985.

Currently, there are three different wells that are used to supply irrigation water. In addition, there are Oakley Canal shares that are co-mingled with the groundwater. One of the three wells, (#3), is covered by the licensed rights, 45-02379 and 45-02692. The two Snake River Basin Adjudication Claims, based on two statutory claims filed in 1989, are for an additional diversion (well #1) and additional acres.

A summary of the two LICENSES and two STATUTORY claims is as follows:

<u>Right #</u>	<u>Well #</u>	<u>Rate</u>	<u># Acres</u>	<u>Priority Date</u>
45-02379	3	2.02 cfs	280 ac	06/05/1951
45-04015	1	5.34 cfs	320 ac	10/01/1951
45-04043	1	5.60 cfs	597 ac	06/18/1953
45-02692	3	1.60 cfs	270 ac	03/28/1963

The two groundwater licenses appear to be straight forward other than the slight acre overlap between the two rights.

Page 2
Critchfield Proposed Transfer
10 July 1997

In order to substantiate the two statutory claims, additional documentation is needed. Please submit evidence that the groundwater well (#3) was used to irrigate the lands in 1951 (45-04015) and 1953 (45-04043), as claimed. Also, what lands were irrigated in 1953? Was there something there before 1953? What was the water level? Please see the enclosed "Evidence of Priority" a guide to sources which may constitute proof of the priority date.

The application for transfer proposes to add the newest well, #2. Again, documentation to substantiate the diversion point is necessary.

All the dated material you submit to our office will be necessary to verify the development of the claims. Additional information regarding historical use will be most helpful, i.e. the canal water used to irrigate the land.

I appreciate your patience and perseverance to clarify all the above items. If you have any questions, please don't hesitate to call me.

Sincerely,

A handwritten signature in cursive script that reads "Georgia Satterlee".

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

Draw a map or attach a USGS map indicating the new point(s) of diversion and/or the new place of use for rights described in part 1. Clearly depict the land by section, township and range number.

M E M O T O F I L E

FROM: Georgia Satterlee
DATE: 09 January 1998
RE: Transfer per 45-02379,-02692,-04043

Proposal of transfer is to add a diversion point, combining the above rights and to create a permissible place of use. The land is irrigated by co-mingled groundwater and Oakley Canal shares pumped from a pond. The pond is located in the NWNWNE $\frac{1}{4}$ of Section 2, T13S, R22E.

The SESE $\frac{1}{4}$ of Section 35, T12S, R22E is owned by the Critchfields. With exception of the licensed right, 45-04272, that calls to only 7 acres (SESESE $\frac{1}{4}$ Section 35), the majority of the quadrant (34 acres) has been irrigated with Oakley Canal shares and groundwater. With the addition of SESE $\frac{1}{4}$ of Section 35, the total irrigated land is 909 acres.

- The combined rights are limited to the irrigation of 875 acres in a single irrigation season.
- The right holder shall install flow measurement ports or other measuring devices as specified by the Department at each point of diversion.
- All rights when combined shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre.
- Approval of this transfer does not confirm the right claimed under 45-04043.
- Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
