

To whom it may concern:

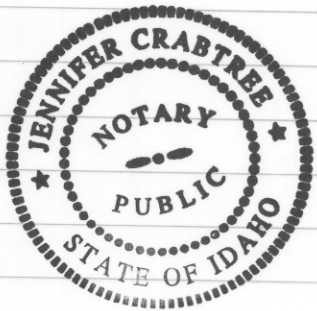

In the year 1962 when I was a junior in high school I remember irrigating pasture and some grain from the spring that is referred to as Tarvel's spring. It runs from my father's farm through the OLSEN Ranch ground and down to the willow creek canyon.

We used a farmal "M" tractor with a Berkley pump and a quarter mile line of sprinkler pipe. We dammed the spring and pumped water from June until the flow decreased later in the year, and years after.
