RE: SRBA Claim no. 25-13117

Dear Mr. Carlsen:

We apparently filed the above numbered claim for Mr. J. Robb Brady about September 15, 1989. In May of 1991, we received a letter from you requesting documentation to establish the priority. I see that we responded with a letter and some additional documentation about May 22, 1991.

Recently Mr. Brady contacted us and asked if everything that needed to be done had been done with respect to his well. In our discussion, I suggested that even though the company he thought had drilled the well and provided the pump equipment had gone out of business (Snake River Equipment), the records might very well have been transferred to another well driller such as Andrew Well Drilling. Mr. Brady contacted Andrew Well Drilling and was able to secure some additional information, including an invoice dated August 6, 1949, showing the drilling of a well for Robb Brady to the depth of 174 feet and a certain amount of 8 inch well casing. They also found a second invoice dated July 18, 1978 indicating the deepening of the well from 174 feet to 220 feet. There is also the equivalent of a well log for the deepening effort in 1978. In any event, we are enclosing copies of Mr. Brady's transmittal letter and all of the records he was able to obtain from Andrew Well Drilling, which we would appreciate having you keep in the file related to this claim in case it is needed in the future.

Thank you for kind attention to this matter.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Kent W. Foster".

Dear Kent:

To provide more confirmation on our resident well at 314 E. Sunnyside Road as you suggested, I contacted Andrew Well Drilling which provided me with significant information. I am enclosing copies of their records.

The office manager for Andrew Well Drilling was able to find the original well record of 1949 when Rose and I were renting a home at 557 L street before we built on our acreage on Sunnyside Road. I believe we bought the property in either 1947 or 1948 and built in 1949. Moreover, the office manager, Margot Stewart, was a Notary Public and, as you see, certified the record on front of the document. I recall that Snake River Equipment provided the 1949 pump system, and may have dug it, too, as I indicated before in a letter to the Water Resource Dept. in 1991. I am gathering that when the Snake River Equipment went out of business, they transferred records to Andrew Well Drilling.

She also found a record when Andrew Well Drilling deepened our well in 1978 from 174 feet, the original depth recorded in 1949, to 200 feet, with another page of corroborative information on the deepening project.

I am enclosing these copies for our water rights file in your office. When the city of Idaho Falls comes to widen Sunnyside Road expected this year, I plan to oppose any proposal to hook onto the city water pipe on Sunnyside Road. Love my well and its hard water.

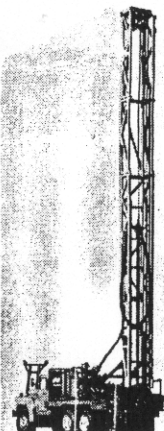

Unless you tell me otherwise, I believe this record is sufficient additional proof to go with our well filing with the Idaho Department of Water Resources under the adjudication process.

Have to tell you, the editing desk did all too many changes on our editorial on the water situation editorial, especially eliminating the data that Idaho's irrigable acres will really not grow unless new technology allows farmers to tap new, deeper wells at now marginal places at costs they can operate. Anyhow, if you have any comments or corrections, like to know.

Many thanks for your help.

Our Best

Robb Brady
