3 homes and cattle. Well does not appear capable of producing 0.24 cfs per Lewis Rounds.

9/25/2003

Met with Brent Call and Harvey Thiel, who submitted 8/6/2003 affidavit. When asked about the number of head of cattle he recalled at the Casper farm when he was a kid, he said that there were "about 20 head, which was considered a pretty big herd in those days."

Brent said there is a 3 HP pump in the 80' well and a 1.5 HP pump in the 60' well. At the time of filing, two 1.5 HP pumps were claimed.

9/25/2003

25-11813

Brent said he bought the place back in 1960 and brought about 400 or 500 head with him. He said that he expanded over the years and in the years leading up to 1987 he had up to 1500 head.

Brent also irrigates about an acre of lawn. There are 3 homes on the property served by the 2 wells.

The first home was there in the late 1800's or early 1900's. It has been torn down and replaced by another home. The trailer home was there in 1961, and Brent's home was built in 1969.

$$Q = \frac{3 \text{ HP} \times 0.60 \times 8.814}{10' + (2.31 \times 30) + 10'} = 0.18 \text{ cfs}$$

The second well was put in around 1961. Brent said the most cattle he's ever had on the property during the summer when the lawn is being irrigated is 250 head.

Brent said these are
hand dug wells. He
moved there in 1960.
He was concerned that
he couldn't come up
with date going back
to 1895.

$$81.0 - \frac{418.8 \times 0.0 \times 94}{0.1 + (0.3 \times 1.5) + 10} = 0$$

trust. 12/1 found nothing more than hand all
property all was done with the rest of his
pink in some of the same of pink
about 0.5 in between
