RE: SRBA CLAIMS IN THE SOUTHERN REGION

Dear Judy:

The attached is a list of our clients for whom we filed claims in the SRBA, and who by signing and returning a letter to our office, have requested that we continue to represent them in the adjudication process.

The claims highlighted identify those we filed in your region. Please check these claims and make certain that we are shown on your computer as representative, in order for us to receive the mailings from the department and perform the required service for our clients in a timely manner.

Yours truly,

Crystal Vincent

COMMUNICATION DOCUMENTATION

From: Vikie Hancock

July 20, 2004

Regarding:

Customer:

45-463

Milner Irrigation District

I spoke with Julie Conrad of Milner Irrigation District on June 21st and asked her if there were any discussion there about corrections to the company's service boundary as it currently looked.

She said there was some concern about a man named Ray Seymour who had told them he was going to file on some spill water from a canal that technically ran outside of their service area, but which naturally drained back into their service area. The company did not want Mr. Seymour to appropriate the water and thought they may need to amend their boundary to include this small corner located in the SWNE Section 04, T11S, R21E.

A check of the data base found no SRBA claim or new permit for water in this location. Eventually I spoke to the IDWR agent who had spoken to Mr. Seymour. The agent told me that he had informed Mr. Seymour that IDWR would require written permission from Milner Irrigation District in order to process the application for permit.

I relayed that information to Julie Conrad on July 14th. She told me that in light of this information, they would probably not need to adjust their boundary, but that she would talk to others at the company later that day. I told her I would hold off on my final recommendation for a day or two.

This date I updated my recommendation to the current shape, as no correction was requested.

Mark,

Have you guys up there had any recent contact with Milner Irrigation District regarding changes in their service area boundary? Just after we mailed out our preliminary directors report in late April the water master told me that he thought there needed to be some changes. He promised to get back to me but I haven't heard another thing. We want to get the final director's report out the first of July, and before I contacted them again, I thought I'd ask you.

Thanks

Irrigation place of use

Milner Irrigation Dist

At the Notice of Error meeting 4/22/2004 I met with the watermaster for Milner Irrigation District Walt, and with the secretary Julie Conrad. Walt had questions about the acres shown as irrigated on the large format map sent to him by the state office. We agreed to meet at IDWR's office to discuss corrections. I also explained the two domestic rights I recommended in the vicinity of the pumping station.

They also had questions about three domestic rights that were not included in the Preliminary Director's Report. They had numbers for two domestic rights but didn't know if the third had been filed. I researched the domestic numbers this date and they have already been decreed in the SRBA. I called Julie and we agreed I would send copies of the decrees to them. Meanwhile, she and Walt would find the assessed acres as of 1987, determine the correct service area boundary and call to make an appointment so that we could finalize their POU. At that time we would also make sure that a claim had been filed on the third domestic well.

NOTE TO FILE

From: Vikie Hancock

7/24/02

Regarding: Claim number **45-463**
Milner Irrigation District

This claim for ground water is based upon a right that was decreed to Milner Low Lift Irrigation Company in the 1957 Hager -v- Milner Irrigation District Decree. In his ruling, the judge based the priority date of the above decreed right upon IDWR permit 45-2401 (renumbered from G-22475). The decreed diversion rate was 2.50 cfs and the decreed place of use was *lands within the boundaries of Milner Irrigation District*. There was no legal description of point of diversion in the decree.

Because of the decree, IDWR communicated to Milner Irrigation District that proof of Completion of Works and Beneficial Use was no longer required for permit 45-2401, since the judge had decreed the beneficial use of 2.5 cfs to the Irrigation District with the priority date of the application for permit, thus making the issuance of a License from IDWR to use the subject well moot. For right 45-463, the current water right data base reflects the place of use indicated on approved permit 45-2401, which included only the lower part of the Milner Irrigation District boundary. The permit stated that the water applied for was supplemental to existing surface water rights and was to be used in the lower end of the system. The water right data base lists the point of diversion as a well in the NWNW Section 28, T11S, R20E.

The SRBA claim agreed with water right 45-463 with the exception of place of use. The claim inferred that the place of use encompassed all the lands of the Milner Irrigation District by referring to SRBA claim 01-017. The place of use description for claim 01-017 includes all the land within the boundary of Milner Irrigation District. The actual place of use was verified in a phone conversation with Jim Bright on 7/8/2002, who stated that the ground water was used only on lands downstream of the discharge point into the canal at the point of diversion. However, due to changes in State policy, it has been determined that the proper text description of the place of use should be *Within the boundaries of Milner Irrigation District*. And the recommended Place of Use GIS layout should include the entire service area boundary.

RE: Snake River Basin Adjudication (SRBA)
Claim Nos.: 45-463, 45-4171, 45-13473

Dear Jim,

Enclosed are copies of SRBA claims needing the appropriate signatures. One document, 45-13473, is the new Domestic claim that we discussed which covers water use at the original residence that began in 1923. The point of diversion reflects the location of the replacement well drilled in 1941. The place of use legal matches that of the office, let me know if this is not correct. There is a \$25.00 fee for filing this claim. The other document, 45-4171, is an amended claim on which I deleted the Irrigation use and added Domestic use to cover the second residence added at the same time as the office. Based on current information, the priority date of this claim will be changed in my recommendation to 1941.

The GIS map is of the place of use I outlined for ground water right 45-463. My information came from the map submitted with the original 1951 permit, but you may want to make some adjustments to the boundary of lands that are reached by the co-mingled ground water. You can make notations directly on the map and return it to me, if you would like, and changing the boundary limits will not affect the decreed diversion rate of 2.5 cfs., or the annual volume limit of 1145 afa.

I have also included an Address Change form to complete if the current address for Milner Irrigation District is different than the one we have shown above. If you, or your company's attorney of record, have any questions do not hesitate to call, if not please return all completed documents and the filing fee to my attention in the pre-addressed envelope. Thank you for your cooperation in helping me correctly recommend these water rights.

Sincerely,

Vikie Hancock
Water Resource Agent, Sr.
Southern Adjudication Unit

NOTE TO FILE

From: Vikie Hancock

7/8/02

Regarding: Claim number **45-463**
Milner Irrigation District

This claim for ground water is based upon a right that was decreed to Milner Low Lift Irrigation Company in the 1957 Hager -v- Milner Irrigation District Decree. In his ruling, the judge based the priority date of the above decreed right upon IDWR permit 45-2401 (renumbered from G-22475). The decreed diversion rate was 2.50 cfs and the decreed place of use was *lands within the boundaries of Milner Irrigation District*. There was no legal description of point of diversion in the decree.

Because of the decree, IDWR communicated to Milner Irrigation District that proof of Completion of Works and Beneficial Use was no longer required for permit 45-2401, since the judge had decreed the beneficial use of 2.5 cfs to the Irrigation District with the priority date of the application for permit, thus making the issuance of a License from IDWR to use the subject well moot. For right 45-463, the water right data base reflects the place of use indicated on approved permit 45-2401, which included only the lower part of the Milner Irrigation District boundary. The permit stated that the water applied for was supplemental to existing surface water rights and was to be used in the lower end of the system.

The SRBA claim agreed with water right 45-463 with the exception of place of use. The claim inferred that the place of use encompassed all the lands of the Milner Irrigation District by referring to SRBA claim 01-017. The place of use description for claim 01-017 includes all the land within the boundary of Milner Irrigation District. I believe that the place of use in the water right database for this right, which does not include any lands within the Milner Irrigation District that is upstream of the well site, is correct. This was verified in a phone conversation with Jim Bright on 7/8/2002, who stated that the ground water was used only on lands downstream of the discharge point into the canal at the point of diversion.

The place of use for this right should be north and west of the well site in the NWNWNW Section 28, T11S, R20E, within the currently claimed boundaries of the Milner Irrigation District. This place of use closely matches the 1951 Application for Permit.

APPLICATION FOR PERMIT
To Appropriate the Subterranean Waters of The State of Idaho

Application No. G-30219
Permit No. G- 22475
District No.

1. Name of Applicant: MILNER LOW LIFT IRRIGATION DISTRICT

Postoffice address: Murtaugh

County: Twin Falls

State: Idaho

2. Quantity of water claimed:

(a) Rate of withdrawal in cubic feet per second, 25
Miners' inches 1250 or gallons per minute

(b) Annual withdrawal in acre feet per annum

3. Source of water supply: Subterranean

4. Location of point of diversion or well is in the NW 1/4 of the NW 1/4 of Section 20
Twp. 11 S. , Rge. 20 E. , B.M. County of Twin Falls

5. Water is to be used for: Irrigation

6. If for municipal, industrial or recreational purposes, give:

(a) Point of use of water is in the 1/4 of the 1/4 of Section 20
Rge. B.M.

(b) Waste water or sewage effluent is to be returned to
at a point in the 1/4 of the 1/4 of Section 20, Twp. , Rge. , B.M.

7. Kind of works: Well, pump and motor

8. Estimated cost of works: \$10,000.00

9. (a) Is reservoir to be used?

(b) Capacity of reservoir:

10. The time required for the completion of such work and complete application of the water to the proposed use is Five (5) years.

11. If applicant is a corporation, give:

I. (a) Date and place of incorporation:

(b) Amount of capital stock: \$

(c) Amount paid in: \$

(d) Names and addresses of directors:

II. The financial resources of the applicant are (a) Cash on hand: \$

(b) Treasury stock:

(c) Bonds to be issued:

(d) Other resources

12. The land to be irrigated is described in the following tabulation:

13. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: 135 c.f.s. decreed right from Snake River; also 17 c.f.s. under Permit No. 18919

(a) cubic feet per second (inches or gallons per minute) of the water herein applied for is to be supplied to the existing water rights

(b) cubic feet per second (inches or gallons per minute) is for new lands

FROM PERMIT 45-2401

Remarks This filing is supplemental to the existing water rights, and is not sufficiently served at present.

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Defendant.)

DISTRICT COURT
Eleventh Judicial District
County of Twin Falls,
State of Idaho
Filed Jan. 7, 1957
/s/ T.W. Stivers

Entered Jan. 7, 1957 By Helen Porterfield
Deputy Clerk

Time 9:45 a.m.

-0-

THIS CAUSE came regularly on for hearing and disposition before the Court, without a jury, on the 7th day of January, 1957; Edwin Snow, of Boise, Idaho, and Sherman J. Bellwood, of Rupert, Idaho, appearing as attorneys for plaintiffs, and Nielson & Nielson, of Burley, Idaho, appearing as attorneys for defendant.

The parties presented to the Court in writing a stipulation of facts, signed by their respective attorneys of record, thereunto duly authorized, which stipulation had been duly filed in this cause; in said stipulation there was set out and agreed upon the ultimate facts with respect to the beneficial use by the respective parties hereto of the waters involved in the suit, and also the amount and the dates of priority of the water rights to which each party was entitled based upon the said use; and the Court having examined and approved the said stipulation; and the parties having also presented to the Court this decree based upon such stipulation, upon which decree is endorsed the written consent and approval of the attorneys of record for the respective parties;

NOW, THEREFORE, in conformity with said stipulation and said consent, and the parties having waived Findings of Fact and Conclusions of Law in

connection with such decree, it is hereby ORDERED, ADJUDGED and DECREED as follows:

I.

That plaintiffs Everett G. Hager and Sudie B. Hager are husband and wife; that plaintiffs Walter Hager and Alice Hager are husband and wife; that the defendant Milner Low Lift Irrigation District is a quasi-public corporation, to-wit, an irrigation district organized under the laws of the State of Idaho; that it comprises within its boundaries lands within Twin Falls County, Idaho.

II.

That the plaintiffs are now, and for many years last past have been, the owner the owners of the following described lands situated in Twin Falls County, Idaho:

The South Half of the Northwest Quarter ($S\frac{1}{2} NW\frac{1}{4}$), and the Southwest Quarter ($SW\frac{1}{4}$), of Section 28; and the South Half of the Northeast Quarter ($S\frac{1}{2} NE\frac{1}{4}$), and the Southeast Quarter ($SE\frac{1}{4}$), of Section 29; all in Township 11 South, Range 20 E., B. M.

That the plaintiffs Everett G. Hager and his said wife own an undivided one-half interest in said property; and plaintiffs Walter Hager and his said wife own the remaining undivided one-half interest therein.

That all of said lands are arid in character and will not produce agricultural crops without artificial irrigation; but being irrigated, all of said lands raise abundant crops.

III.

That plaintiffs are the owners of the right to use for the irrigation of their lands described in paragraph II of Plaintiffs' complaint, the following amounts of water with date of priority for each right as specified below:

45 0458

(a) 1.68 cubic feet per second (84 miners inches) with priority dating from September 21, 1943. *See* 45-2196

45 0459

(b) 1.77 cubic feet per second (88.5 miners inches) with priority dating from September 20, 1944. *See* 45-2202

45 0460

(c) 1.13 cubic feet per second (56.5 miners inches) with priority *See* 45-2214

dating from December 22, 1945.

45 0461 (d) 1.44 cubic feet per second (72 miners inches) with priority
dating from September 27, 1947. 84-45-2239

45 0462 (e) 2.68 cubic feet per second (134 miners inches) with priority
dating from October 24, 1947. 84-45-2240

That plaintiffs have made beneficial use of each and every of the
several amounts of water special above (aggregating 8.7 second feet,
or 435 miners inches) in the irrigation of lands every since the respec-
tive dates of priority of each of said rights as set out above. The
lands aforesaid are as described in paragraph II of plaintiffs' com-
plaint herein; that is to say, the following:

The South Half of the Northwest Quarter (S $\frac{1}{2}$ NW $\frac{1}{4}$), and the
Southwest Quarter (SW $\frac{1}{4}$), of Section 28; and the South Half
of the Northeast Quarter (S $\frac{1}{2}$ NE $\frac{1}{4}$), and the Southeast Quarter
(SE $\frac{1}{4}$) of Section 29; all in Township 11 South, Range 20, E.B.M.

IV.

45 0463

That the defendant Milner Low Lift Irrigation District is the owner
of the right to use for the irrigation of the lands within its boundaries,
water that may be pumped from its well mentioned and described in the
pleadings in this suit to the extent of 2.50 second feet (or 125 miners
inches) of such water and no more, with priority dating from November 21,
1951, the date of its application to appropriate water under its Permit
No. G-22478 in the office of the Department of Reclamation of the State
of Idaho; and said defendant District has beneficially used said water
in the irrigation of said lands within its boundaries since the 12th day
of July, 1952, when it began to divert water from its said well.

V.

That the water of each and every of the wells of plaintiffs referred
to in their complaint herein, and from the well of the defendant above
mentioned, constitutes a common and inter-dependent source of supply, and
the withdrawal of water from such supply by pumping from any of said wells
affects and diminishes the supply of water available from the others of
said wells.

cancelled permit
45-2401

G-22475

VI.

The pump now installed in the defendant District's well shall not be operated to pump water therefrom unless it first be modified by the substitution of bowls, and other necessary parts, so that the maximum capacity thereof shall not exceed 125 miner's inches when operated at full capacity; and if any other pump is installed and operated at and in said well, it shall have a maximum capacity not exceeding 125 miner's inches; and any such modifications of the existing pump or substitution of pumps shall be at the expense of the District.

VII.

That the defendant Milner Low Lift Irrigation District be and it is hereby forever enjoined and restrained from withdrawing from its said well water in excess of the continuous flow of 125 miners inches during the irrigation season.

But nothing in the stipulation entered into by the parties, nor in the above provision of this decree restricting the defendant District's withdrawal of water from its said well to 125 miners inches, shall be construed as intended to interfere with the enforcement of this decree according to the respective priorities of the water rights allotted to the parties hereto, should it hereafter appear that the said permitted withdrawal of water by the District will reduce the water supply of plaintiffs' wells below the amount presently available therefrom.

VIII.

The amount of water herein allotted to each of the parties hereto for use upon the respective lands is required and necessary for the proper growth of crops thereon in addition to any water now used from any other source, including Snake River.

A miner's inch of water as that term is herein used shall be deemed equivalent to one-fiftieth of a cubic foot per second, and the water herein allotted shall be measured at or as nearly as practicable at the point of

diversion of said water from the well at which it is pumped.

IX.

That plaintiffs and defendant shall each pay their own respective court costs.

Dated: January 7th, 1957.

/s/ Hugh A. Baker
District Judge

STATE OF IDAHO

DEPARTMENT OF RECLAMATION

Boise, Idaho

Re: Permit No. G- 22475

March 21, 1961

To Milner Low Lift Irrigation District
Murtaugh, Idaho

It appearing to the State Reclamation Engineer that the terms and conditions of Permit No. G- 22475 to appropriate the Public Waters of the State of Idaho, have not been complied with as to

Completion of Works & Beneficial Use Proofs which were due May 24, 1960

YOU ARE HEREBY notified in compliance with Sec. 42-234, Idaho Code that said Permit No. G- 22475 is hereby held for cancellation.

YOU ARE HEREBY required to show cause before the State Reclamation Engineer on or before sixty days from date of this notice why said Permit should not be cancelled.

SAID PERMIT NO. G- 22475 claims the use of 25 cubic feet per second of the Subterranean Waters of a well with point of diversion located

SE 1/4 Sec. 28, Twp. 11 S., Rgn. 20 E.B.M.
and was approved November 24, 1951.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of my office at Boise, Idaho, the 21st day of March, 1961.

State Reclamation Engineer

22475

March 29, 1961

Permit No. C-22475
Illinois Low Lift Irrigation Dist.

Malson & Malson
Attorneys at Law
Peoria, Idaho

Attn: A. H. Malson

Dear Mr. Malson:

In regard to the permit and the District Court Decree mentioned in your letter of March 28, the pre-cancellation notice dated March 28, 1961 is rescinded.

The wording of the decree is such that the water right does not depend upon fulfilling the conditions of Permit No. C-22475. The Court shows under IV of the Decree that the District had the right to 125 minor inches of the priority of the permit and that the water had been used beneficially since July 12, 1952. Under V the decree provides that not over 125 minor inches shall be diverted from the well.

Permit No. C-22475 will not be cancelled. However proofs of completion of works and beneficial use of the water are not required and no Water License will be issued under the permit.

Very truly yours,

CHD. E. CARTER
State Reclamation Engineer

Re: Permit G-22475
Milner Low Lift Irrigation District

Gentlemen:

In the above matter, the well has been used for some years. The District had a law suit with the Hager Brothers and we entered into a stipulated Decree that the District could use only 125 inches of water.

Under the circumstances, is it still necessary to make a showing to your department? If it is, would you please send us the proper forms and we can then make such a showing. However, as I stated, the well has been used each year and has been pumping 125 inches of water.

As soon as we hear from you, we will take immediate steps to show completion of the works and beneficial use.

Very truly yours,

NIELSON & NIELSON

May 2, 1960

Permit No. C-22475
Milner Low Lift Irrigation District

Dear Sir:

On May 1, 1960, received from the Milner Low Lift Irrigation District a letter in regard to the amount of water which is to be given in a summer which the paper cannot reproduce. Would it be satisfactory to change the land list to lands irrigated within the Milner Low Lift Irrigation District?

The amount of water should be 125/101 cubic feet per second which appears to be in error. In the case Everett E. Rogers et al vs. Milner Low Lift Irrigation District, dated January 7, 1957, by Hugh A. Baker, District Judge, the District was decreed 2.50 second feet (or 125 miners' inches) of such water with priority dating from November 21, 1951. In our copy of the decree the Permit No. C-22475 is shown, however, it appears that is in error and it should be Permit C-32475.

Is it necessary or desirable to take the proofs when the decree is a matter of record?

The same will be held pending word from you in regard to amount of water, land description and whether to continue with the legal action. It is presumed you would not want the proofs to be made on a Saturday.

Very truly yours,
GEO. W. CARTER
State Reclamation Engineer

RE: Milner Irrigation District Right 45-00463 (b)(7)(D)

Dear Gary:

I have reviewed your January 16th letter and have the following comments about the proposed transfer of the above referenced right. These comments are not intended to be a pre-approval or pre-denial of any such transfer but are intended to identify issues or concerns that may need to be addressed.

In your letter you indicate that it is the desire to sell this right to another party for purposes of irrigating ground that currently does not have water rights attached to it. A review of the rights as recorded in the water rights database as well as in the SRBA database leads me to believe that historical use of this right is such that the water pumped under this right has been mingled with other rights (Snake River Diversions) for irrigation of lands throughout the district's service area. Your letter does not indicate which specific lands within the district will be dried up so that new lands may be irrigated. If it is the intent that no lands be dried up but new lands will be irrigated after transfer then there would appear to be an issue of expansion or enlargement of use which will need to be addressed.

As you know in the transfer process, there are other issues which are routinely looked at which include:

- validity of the right. (Has the right been forfeited?)
- ownership of the right. (Does the applicant own the right?)
- Historical beneficial use of the right. (What are the historical limits of the right?)

Please find enclosed an "Information Sheet" which gives further guidance for your client in preparing a transfer. If you would like to discuss this matter further, please let me know.

Sincerely,

Allen Merritt, PE

Re: Water Right 45-00463

Dear Allen:

Our firm's client, the Milner Irrigation District, seeks to obtain information concerning a transfer of the above-numbered water right. Specifically, the District would propose selling this water right to another party for purposes of irrigating ground that currently does not have any water rights attached to it. This water right would be the only thing that would be transferred, and by this inquiry, I seek to know the Department's position with regard to this proposal. Specifically, I would like to determine if there is any impediment that you might see that could operate to preclude or complicate this proposal.

Once you or your staff members have had an opportunity to review this request, I would appreciate it if you would advise me in writing as to your thoughts. If you have any questions or comments, please contact me.

Yours truly,

GARY D. SLETTE
