Subject: RJ Smith

Met with RJ Smith today over 74-2073 and 74-7101 on Points of Diversion. Above his property on BLM and on Baldy Creek there is only one diversion and he confirmed that. The above two WRs show two different diversions, in two different legals. Our GPS data shows just one diversion, called "Baldy 4" under the Diversion Name column or "Baldy Basin" under the Original Name column. Both of the IDWR shapefile points should be snapped to the GPS location. The POD for both WRs should be the SWNW. 74-7101 will have to be changed by "accomplished transfer". RJ agrees with me on the change but I told him you might contact him on it. Let me know if you additional details.

thanks, al

74-7101: Recommendation should match license, which matches GPS data. One POD in SWNW, S13.

74-2073: Three PODs decreed - two in S18, one in S13, which matches GPS data. If other PODs are abandoned, claimant should amend claim.

Discussed with Al Bittner 11/3/04.
