**IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS**

In Re SRBA	)	SPECIAL MASTER'S REPORT AND
	)	RECOMMENDATION; FINDINGS OF
Case No. 39576	)	FACT AND CONCLUSIONS OF LAW
	)	
_____	)	WATER RIGHT NO.: 37-18096

I. PROCEDURAL BACKGROUND

A claim was filed by the United States Bureau of Land Management for the above listed water right. The United States originally claimed this right under both state law and as a federal reservation. The state-based portion of this right was investigated by the Idaho Department of Water Resources ("IDWR") and reported in a *Director's Report*. IDWR did not investigate the federal reservation theory because that is based on federal law. I.C. § 42-1411A.

An *Objection* was filed by the United States Bureau of Land Management on September 10, 1999. *Responses* were filed by Pickett Ranch & Sheep Co., Joe Tugaw, Jared Bedke, Bruce Bedke, Scott Bedke, Karl Bedke, Joyce Livestock Company, Jerry Hoagland, Michael Poulton, Gary Poulton, Western Stockgrowers Association, Flying Triangle, Inc., Willis Deveny, Luther Gardner, Eugene Matthews, Shoulders 3 Ranches and A L Cattle Inc.

The *Responses* were withdrawn on August 29, 2002 with a *Notice of Withdrawal of Objections and Responses* (August 29, 2002) The *Objection* was resolved with the filing of a *Standard Form 5/Amended Claim* on June 8, 2004. An evidentiary hearing was held on October 5, 2004. At the hearing, the United States Bureau of Land Management withdrew the state basis for this claim and opted to pursue this right solely under a federal reservation pursuant to Public Water Reserve 107 ("PWR 107"). Therefore, this claim is now an uncontested claim based on federal law and may proceed under I.C. § 42-1411A. The United States BLM submitted an

II. STANDARD OF REVIEW

A. Federal Reserve Water Rights

A state has plenary control of water located within its territory. *Kansas v. Colorado*, 206 U.S. 46 (1907). A claim to a federal reserve water right is an exception to a state's plenary control of water. *United States v. Rio Grande Dam and Irrigation Co.*, 174 U.S. 690 (1899). Reserved water rights may be express or implied. *United States v. New Mexico*, 438 U.S. 696 (1978). An express reservation of water is created by the explicit language in the act creating the reservation. *Id.* An implied reserved water right must be based on a reservation of land. *Arizona v. California*, 373 U.S. 546 (1963), and may be granted if the following three criteria are satisfied:

- (1) An implied reservation of water exists only if necessary to fulfill the primary, not the secondary, purpose for which the reservation of land was created, *United States v. New Mexico*, 438 U.S. at 702
- (2) Without water, the purposes of the reservation must be entirely defeated, *Id.*; and
- (3) The water claimed must be the minimum amount necessary to achieve the purposes of the reservation, *Id.* at 700.

B. Federal Reserved Rights Under Public Water Reserve 107

The United States Bureau of Land Management filed this claim for stockwatering based on alternative legal theories of beneficial use (pursuant to state law) and on the executive order Public Water Reserve 107 (April 17, 1926) (pursuant to federal law). The claim at issue is for a stockwater claim not to exceed 13,000 gallons per day.

The issue of whether PWR 107 created a valid basis for a federal reserved water right was previously designated in the SRBA as Basin-Wide Issue 9. **Order Designating Basin Wide Issue No. 9** (March 8, 1996). Judge Daniel C. Hurlbutt, Jr. held that PWR 107 did not create an express or implied reservation of water by the United States. *Memorandum Decision and Order Re: Basin Wide Issue*, (Subcase No. 91-00009, December 9, 1996) That decision was appealed to the Idaho Supreme Court. The Supreme Court reversed, holding that PWR 107 did create a valid basis for a federal reserved stock water right. *U.S. v. Idaho*, 131 Idaho 468, 959 P.2d 449 (1998) Although the opinion states that "PWR 107 evidences an *express* intention by Congress that reserves a water right in the United States." *Id.* at 471, 959 P.2d at 452 (emphasis added) the

parties and the SRBA District Court understand the holding as determining that PWR 107 creates an implied federal reserved water right. *Memorandum Decision and Order on Challenge*, at 3, fn.1 (Dec. 28, 2001).

After the Supreme Court held that PWR 107 did create a valid basis for a federal reserve stockwater right, the SRBA District Court took up the scope of water rights pursuant to PWR 107. The issue was whether PWR 107 creates a federal reserved water right if the spring or waterhole is tributary to a perennial stream or river and whether PWR 107 creates a federal reserved water right if the spring or waterhole is tributary to an intermittent stream or river or flows for any distance in a defined stream channel. The SRBA District Court held that “nothing in the language of PWR 107 . . . suggest[s] that such withdrawals were . . . limited to non-tributary springs and water holes.” *Memorandum Decision and Order on Challenge* at 19 (December 28, 2001).

The *Memorandum Decision and Order on Challenge* also held that PWR 107 does not create a basis for rights based on stream segments which are not “springs” or “water holes.” *Id.* at 22. The place of use for the water right is within the boundaries of the 40-acre section withdrawn. Water flowing from the spring or water hole outside the boundaries of the withdrawn land does not create another land withdrawal or accompanying reserved water right.

C. Uncontested Claims Based on Federal Law

Idaho Code Title 42 sets forth the SRBA procedures for both state-based and federal-based water right claims in the Snake River Basin Adjudication. Claims which are brought pursuant to Idaho state law are investigated by the Idaho Department of Water Resources (IDWR) which recommends the elements in a *Director's Report*. Claims which are brought pursuant to federal law are not investigated by IDWR, and IDWR does not make any recommendation for federal-based claims. Instead, the claimed elements are placed on the docket sheet and reported along with the *Director's Report*.

The statutory provisions for federal-law claims are found in I.C. § 42-1411A. The statute takes into account the absence of an independent investigation into federal-law claims and requires a hearing for uncontested claims. I.C. § 42-1411A(14). Since no independent review is conducted of federal-law claims, the claimant bears the burden of going forward and the burden of persuasion.

Each claimant of a water right established under federal law has the ultimate burden of persuasion for each element of a water right. Since no independent review of the notice of claim has occurred as provided for water rights acquired

under state law in a director's report, a claimant of a water right established under federal law has the burden of going forward with the evidence to establish a *prima facie* case for the water right established under federal law. All such proceedings shall be governed by the Idaho Rules of Civil Procedure and Idaho Rules of Evidence.

I.C. § 42-1411A(12).

D. Hearing Requirement and Affidavits

The hearings on these claims relied on sworn affidavits rather than on live testimony. This court has previously held that introduction of sworn affidavits complies with the hearing requirement. *Order Accepting in Part, and Denying in Part, Special Master's Report and Recommendation* (Subcase 36-15452, Oct. 10, 1997) (hereafter "Smith Springs") *overruled on other grounds, In Re SRBA Case No. 39576* (Minidoka Wildlife Refuge), 134 Idaho 106, 996 P.2d 806 (2000). The SRBA District Court has approved many *Special Master's Reports and Recommendations* for federal-based claims based on sworn affidavits rather than live testimony. The affidavits submitted by the United States meet the hearing requirement in I.C. § 42-1411A(14).

E. Quantum of Proof is "Substantial Evidence"

In *Smith Springs*, the Court concluded that in default-type proceedings, "substantial evidence" must support each element of the claim. The analogy to default proceedings is appropriate for uncontested federal reserve rights. A claimant has the burden of proof and burden of persuasion for each element and must provide "substantial evidence" of each element.

III. FINDINGS OF FACT ON ELEMENTS

A. Ownership of the Water Right

The claim asserts that the owner of this water right is the United States Bureau of Land Management. The record contains the following evidence regarding ownership:

I have reviewed the official business records of BLM and compared the above captioned subcase to BLM's MTPs and HIs. I was able to determine that the above captioned subcase is located on unreserved federal public domain as of April 17, 1926; and this land currently remains under Department of Interior administration.

Affidavit of Frederic W. Price at 4, ¶ 6.

There are no remaining objections to the claim of ownership by the U.S. Bureau of Land Management. There is "substantial evidence" that the United States is the owner of this right.

B. Priority Date

This water right was claimed based on PWR 107 with a priority date of April 17, 1926. That is the day an executive order known as Public Water Reserve 107 was signed by the President of the United States. There is “substantial evidence” that the priority date is April 17, 1926.

C. Source

The claim asserts a source for this water right. The record contains the following information regarding source:

The claimed water source described by the above captioned subcase was confirmed by field investigation

Affidavit of Frederic W. Price at 4, ¶8. In addition, IDWR investigated the source element for this right under the state basis and submitted a *Director's Report* with a specific source determined for this water right. There is “substantial evidence” of the source for this right.

D. Quantity

The quantity claimed for this water right is 13,000 gallons or less per day. The *Affidavit of Frederic W. Price* states, “Based upon the field verification and my review of the field investigation documents for the above captioned subcase, there is sufficient water at this site for consumptive use by livestock.” *Affidavit of Frederic W. Price*, at 4, ¶9. In addition, IDWR investigated the quantity element for this right and submitted a *Director's Report* with a specific quantity determined for this water right. There is “substantial evidence” of the quantity for this right.

E. Point of Diversion

This claim asserted a point of diversion that was expressed with a legal description. In addition, IDWR investigated the point of diversion element for this right under the state basis and submitted a *Director's Report*. The *Director's Report* for this right contained a determination of the claimed point of diversion. There is “substantial evidence” of the point of diversion for this right.

F. Purpose of Use

The claimed purpose of use for this right is “stockwater.” The United States asserted that “Based upon the field verification and my review of the field investigation documents for the above captioned subcase, there is sufficient water at this site for consumptive use by livestock.”

Affidavit of Frederic W. Price, p. 4 , ¶9. There is “substantial evidence” that the purpose of use is “stockwater.”

G. Period of Use

The claimed period of use for this right is January first to December 31st of each year. The United States did not assert that this claim had been used for stockwatering, merely that “there is sufficient water at this site for consumptive use by livestock.” However, this claim is not now based on beneficial use, but on a federal reservation under PWR 107. The purpose of PWR 107 was to reserve land to avoid monopolization of the springs or water holes.

IDWR also investigated the period of use element and submitted a *Director’s Report* with a determination that period of use was year round. There is substantial evidence of the period of use for this water right.

H. Place of Use

This claim asserted a place of use that was described by a legal description. In addition, IDWR did investigate this right under a state basis. The *Director’s Report* for this right concluded that the claimed place of use was correct. There is “substantial evidence” of the claimed place of use.

IV. CONCLUSION

Therefore, based on the file for this subcase and the record contained therein, IT IS RECOMMENDED that this water right be decreed with the elements set forth in the attached *Special Master’s Recommendation for Partial Decree*.

DATED: November 5, 2004

BRIGETTE BILYEU
Special Master
Snake River Basin Adjudication
