Gentlemen:

Our records show you have filed your adjudication claim(s) in the Snake River Basin Adjudication. Our records do not, however, include a clear map of your service area. Would it be possible for us to get a map of your customer service area for your municipal water system, both to supplement the record of your claim(s) and for use as described below?

In our review and investigation phase of the Snake River Basin Adjudication, the map would be helpful for us to have this information in verifying individual claims to water rights for domestic purposes. We will be happy to discuss with you the most convenient way for you to provide this information to us. I can be reached at 327-7931 or you may contact my assistant, Anita Warntjes at 327-7986.

Your assistance in this matter is greatly appreciated.

Sincerely,

DAVID B. SHAW

Adjudication Bureau Chief

RE: Evidence of Priority

RESPONSE DEADLINE

APRIL 1, 1993

Dear Claimant:

The Notice of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will at a later date conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

Please find enclosed a computer printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

SPECIAL NOTE: The Department will not recommend the Notice be decreed by the court as claimed if no evidence of a priority date is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement must be in the form of a notarized affidavit.

Please submit the required evidence supporting the priority date by April 1, 1993, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

Dear Sir,

The Salmon Park well Claim #A45-11133 was drilled right after the Buley Swimming Pool was built. The pool was built in 1953 and the well was drilled in 1954 and the water used for irrigation.

Sincerely,
Alford J. Harrell

Recommendation

TO: Doug Jones

DATE: August 9, 1996

FROM: Jim Stanton

SUBJECT: Request for Claims Investigation, City of Burley

I recently completed the licensing exam on Permit 45-07686. This permit covers one well at the fairgrounds. However, this well is also tied into five other wells that provide irrigation water only for the central part of Burley. These other wells are covered by Claims A45-04093 thru 4096, 7436, and 11133. The latter claim is for a well located southwest of the high school. While this well is tied into the system, it is normally used only around the school. Other city wells are covered by separate claims for other uses or for different parts of town.

I talked to Shelley Keen after doing the exam, as I thought maybe the use should be changed to irrigation instead of municipal. He thought that municipal is the correct use, however. He also felt that the other wells in this system should be described in the license for 7686, at least in terms of system pumping capacity. Since all of these other wells but one is based on beneficial use, they all need to be measured. Also, evidence of priority needs to be examined to make sure these other wells are legal (pre-1963 development).

This system shuts down for the winter as soon as the frost hits in late September. With the hot weather occurring now, this is the ideal time to measure these wells. So please schedule these measurements as soon as possible if you can. If necessary, I can make the measurements. Thanks.

contact Jess Mabry 678-2103

DEC 03 1996

MEMO TO FILE

DATE: SEPTEMBER 25, 1996

AGENT: JEANIE ROBERTSON

FILE NUMBERS: A45-04093, A45-04094, A45-04095,
A45-04096, A45-07436, ~~A45-11131~~

In response to Jim Stanton's Memo dated August 9, 1996, I made arrangements to meet with Mr. Mabry on September 19, 1996 regarding the other wells tied into the same system as Permit #45-07686.

Mr. Mabry showed me the location of each of the wells. I gathered the pump and motor information, located them with the GPS system, photographed and tagged them. The only one running that day was the #1 Pumphouse Well, located in the shop at 1559 Albion. He said that normally all of the wells would be operating at this time of year and the system generally works this way. Because it had cooled off, only this one was on today. This well was not conducive to measurement with the polysonic flow meter. Some of the others may have been, but they were not running.

He explained the city has two separate irrigation well systems. This one is a low pressure system which encompasses the area south of the railroad tracks to about 23rd. street. It services customers for their lawns and gardens, not everyone participates, and he had no idea of how many acres would be included. There are no parks in this system, except for the area around the city pool and school ballfields at the "Salmon Park Well" site.

He had a copy of a report in his files which was entitled "Pumping Plant Efficiency Evaluation, Low Pressure Water Distribution System, City of Burley, Idaho". It was prepared by Gerry D. Galinato of IDWR in Boise, Idaho on September 30, 1983. I made a copy of the front cover of the report only. He read some results from it to me: Keller Well, 2 pumps running = 204 gpm
4 pumps running = 166 gpm

Carlson Well, 3 pumps running = 920 gpm
4 pumps running = 901 gpm

Hogan Well, 2 pumps running = 650 gpm

#1 Pumphouse, 2 pumps running = 535 gpm

Almo Well, 2 pumps running = 399 gpm

There was no information as to "which wells were running at the same time" when these tests were taken...
