Water Disctrict !

Dear gentlemen,

I am attempting to submit to you a transfer of water diversion. I believe I have most of the information, except the signatures and the proper form.

Please find enclosed water right #21-00173
#21-00022 for Robert J. & Sharon A. Fisher

This water is to be taken by pump located in the SW1/4 Section, T8N, R42E

We purchased this property in 12 of 1998 and have not used this water in the four summers we have had the property. However, now with this proposal put into effect we will.

We propose to take the water from Falls river from Township 08N Range 42E Section 20 1/4 nw of 1/4 sw of 1/4se fremont. The same diversion as the McBee Ditch.

Description of diverting works:

Twp 24" culvert Type Headgate Backfilled.

The above point is upriver from my pumping location and is diverted into the McBee Ditch.

The purpose of the water change is for us to bring the water into the ditch and use it for wildlife and vegetation that has been striped from the land during mining. along the river corridor.

If this proposal is approved, we will then contract Brent Surrey in Rexburg regarding information on a ~~street~~ ^{Structure} that will suit our needs and can be metered and read by him.

Please let me know any additional information that you need or any questions that you have. I look forward to hearing from you.

Yours truly,

Sharon Fisher
