	)	

I. PROCEDURAL HISTORY

A *Special Master's Report* was issued for the above rights on May, 24, 2004. A notice of claim was filed for the above water rights by the United States, through the Department of Interior, Bureau of Land Management (United States) pursuant to I.C. § 42-1409. The above-captioned water rights were claimed as dual-based stockwater rights meaning the rights were claimed as federal reserved water rights pursuant to Public Water Reserve (PWR) 107 and alternatively as state-law based rights. The Idaho Department of Water Resources reported the state-basis for the claims and the right had been claimed pursuant to PWR 107.

On September 17, 1999, objections were filed to the above water right by the State of Idaho, Pickett Ranch & Sheep Co, Western Stockgrowers Assoc., Joe Tugaw, Michael Poulton, Gary Poulton, Karl Bedke, Jared Bedke, Scott Bedke, Bruce Bedke, Jerry Hoagland and Joyce Livestock Company. On August 29, 2002, the parties filed a *Stipulation and Joint Motion for Order Approving Stipulation, Notice of Withdrawal of Objections and Responses* filed by Norman Semanko for Bruce Bedke et al, *Notice of Withdrawal of Objections and Responses* filed by Norman Semanko for Western Stockgrowers et al. On September 18, 2002, an *Order Dismissing Objections and*

Responses with Prejudice; and Order Dismissing Parties was issued. On March 11, 2003, the State of Idaho filed a *Stipulation to Resolve Objections*. On May 15, 2003, the United States filed a *Notice Regarding Priority Date*. The *Notice* states the claims are federal reserve water rights based on Public Water Reserve 107. An *Order Dismissing Objections and Dismissing the State of Idaho as a Party* was issued on June 30, 2003.

On April 23, 2004, a trial was held on these and other claims pursuant to Idaho Code 42-1411A(12), which requires the United States to demonstrate a *prima facie* showing of the existence of the claimed federal reserve water right. In conjunction with that trial, the United States filed affidavits, which were admitted into evidence, for each of the claimed rights to meet its burden. At the hearing, Semanko withdrew all of his clients' objections and responses from the above subcases.

The affidavits showed the rights would have been proper for a PWR 107 reservation; however, the affidavits showed that homestead entries were pending at the time of PWR 107. Pursuant to Special Master Cushman's ruling in Subcases 25-13635 *et al*, the *Special Master's Report and Recommendation* entered in the above subcases denied the federal reserve portion of the rights because of the pending homestead entries. Following the United States *Notice of Challenge* in Subcases 25-13635 *et al*, the Court stayed proceedings in the above subcases. The Court rescinded the *Order of Reference to Thomas R. Cushman* for the above rights, and stated that Judge John Melanson would preside over the above subcases in the same manner set forth in *AOI* for Special Masters.

In the Court's *Order on Challenge* for subcases 25-13635 *et al*, issued on October 5, 2004, the Court ruled that a pending homestead entry that eventually failed did not defeat a PWR 107 reservation. Therefore, the Court finds it appropriate to amend the *Special Master's Reports* in the following manner:

II. FINDINGS OF FACT AND CONCLUSIONS OF LAW

Based upon the file and record in this subcase, and the affidavits presented at the hearing on the matter, the Court makes the following findings of fact and conclusions of law:

1. Prior to April 17, 1926, no water rights had been established pursuant to state law for the use of the water from the subject water source for the above claims.

3. On April 17, 1926, President Coolidge executed Public Water Reserve 107, which withdrew the 40 acre tract of land upon which the subject water source for each claim is located from the public domain. The tract of land withdrawn for each claim is described as the "place of use" element on the attached *Special Master's Recommendations*.

4. The subject water source for each of the claims consists of a spring or water hole of the type contemplated by Public Water Reserve 107.

5. Contemporaneously with the withdrawal of the land, President Coolidge impliedly reserved enough water to fulfill the primary purpose of the land reservation for each claim.

6. The minimum amount of water necessary to fulfill the primary purpose of the land reservation is the amount set forth in the "quantity" element on the attached *Special Master's Recommendation* for each claim.

7. The United States has satisfied its burden under Idaho Code section 42-1411A(12) as to the nature and existence of the claimed federal reserve water right for each claim.

8. The elements of the federal reserved water right for each claim are set forth on the attached *Special Master's Recommendation*.

III. RECOMMENDATION

Therefore, based on the file and record herein, IT IS RECOMMENDED that the above-captioned water rights be decreed as federal reserved water rights with the elements as set forth in the attached *Special Master's Recommendation for Partial Decree Pursuant to I.R.C.P. 54(b)*. It is further recommended that to the extent any concomitant state-law water rights were claimed in the alternative for the above-captioned rights, that said rights not be confirmed in any partial or final decree.

Dated November 23 2004..
