**IDAHO DEPARTMENT OF WATER RESOURCES
CASE MANAGEMENT PROPOSAL
FOR REPORTING AREA 22, BASIN 83**

The Idaho Department of Water Resources (IDWR) submits this Case Management Report to Special Master Booth as provided by AO1(10)(d) which states that IDWR shall file a case management report with the court which divides the contested water rights into Class One and Class Two subcases. Pursuant to I.C. 42-1412(2), the original notices of claims for the subcases identified herein were submitted to the court on December 21, 2004.

OVERVIEW

This is the Case Management Report for Basin 83. IDWR presents this report to Special Master Booth to assist in setting these subcases for hearing. The boundaries of Basin 83 are illustrated on the attached map. IDWR submitted the Director's Report for Irrigation and Other Uses, Reporting Areas 22, IDWR Basin 83 to the court on September 21, 2004. The objection period for Basin 83 closed December 3, 2004, and the response deadline is February 4, 2005.

DEPARTMENT OF
WATER RESOURCES

Basin 83 is an area of approximately 2,442 square miles located in north central Idaho. It includes portions of Clearwater, Idaho, Latah and Shoshone counties. The basin is bounded on the south by Basins 81 and 84, and on the east by the state of Montana, on the north by Basins 91 and 92 and to the west by Basin 86. Basin 83, together with Basin 86, comprises the northern boundary of the area included in the SRBA.

The attached table shows the water rights that were objected to. There are 3 objections filed to Basin 83 water right recommendations, all filed by the United States Forest Service. Private claimants are involved in 2 of the 3 objections. All objections are categorized as Class I subcases.

Kenneth Knoblock, Senior Water Resource Agent with IDWR's Northern Region Office was the only investigator of Basin 83 water rights.
