E. **REASONS SUPPORTING OBJECTIONS(S):** _____

Refer to Exhibit "A" attached

Exhibit "A"

Water right numbers 45-7374 and 45-7110 are limited to a combined 5.47 cfs quantity or flow, per condition of limitation of license.

The water right numbers 45-2583, 45-7035, 45-7020, 45-7238, and 45-2689 have no limitation of quantity or flow per the licensed rights. And in the aggregate these rights are licensed for 23.59 cfs.

The approved transfer of all the aforementioned water rights, as attached to this objection, allows for the aggregate quantity or flow of 29.06 cfs for the 23.59 cfs and the 5.47 cfs of approved quantity.

In the adjudication recommended right report, the I.D.W.R. ignored the licensed rights and the approved transfer by recommending a reduction of quantity of 8.83 cfs to a combined total diversion rate of 20.23 cfs. This I.D.W.R. recommendation has ignored all historical proof of the water right transfer approved on October 21, 1985 as well as all licensed rights, applied for and approved dating back to June 19, 1959.

This farm was purchased on February 11, 1999, with the market value or purchase price predicated on the validity of these approved water rights. I have complied with the appropriate change of ownership forms (1409) and I now am being forced to file this objection to the I.D.W.R. recommendations to protect my investment because the I.D.W.R. has arbitrarily reduced my water rights by 8.83 cfs, which equates to a 30% reduction and will force me to take all appropriate legal action. This IDWR recommendation will result in a 30% diminution in the value of my land, which I find completely unacceptable.

I respectfully request the SRBA court reject the IDWR recommendations.
