RE: Snake River Basin Adjudication (SRBA) recommendation for 29-07510

Dear Mr. Perry and Ms. Flynn,

The Idaho Department of Water Resources (IDWR) received the Notice of Error (NOE) response you submitted on March 24, 2003.

Unfortunately the requested changes cannot be made. This claim was recommended as the water right was licensed on April 22, 1987. The licensed diversion rate was determined by the capacity of the system. For your records, I have enclosed a copy of the original license and the licensing field exam.

Any new use or increase in water use would require filing a new permit with the Idaho Falls office. However, at this time, there is a moratorium on new appropriation of water for irrigation purposes which would exceed ½ acre. Domestic use from a well is still exempt from the moratorium for up to 1/2 acre of irrigation of lawn and garden when associated with a home.

Please feel free to contact myself or the IDWR regional office located in Idaho Falls with further questions.

Respectfully submitted,

Craig L. Saxton
Sr. Water Resource Agent
Adjudication Bureau
