MARK R. KULP, STATE RECLAMATION ENGINEER

BOISE

May 16, 1952

Mr. H. R. Korn
Dubois
Idaho

Dear Mr. Korn:

The Lone Pine Reservoir, constructed under Permit No. 1067 of December 2, 1904, on Camas Creek in Section 33, Township 11 North, Range 33 East, B.M., was ordered cut, or provided with an outlet to take the natural flow of the creek without obstruction, by the 1904 Lake Decree, Salvo versus Abbott. The permit gave the capacity as 1,500 acre feet with a 40 foot dam.

The Larson Reservoir on the West Fork of Camas Creek, has a decreed right to accumulate 2,000 acre feet of storage. The reservoir, at the time of the dam failure in 1938, had a capacity of about 600 acre feet. The present proposed reservoir would have a capacity of 2,100 acre feet at spillway level, plus 5 feet with 25 feet of water above the outlet.

Very truly yours,

Mark R. Kulp

MARK R. KULP
State Reclamation Engineer
