1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source): *22-13120 priority date 06/01/1889, period of use 1/01 to 12/31, source Warm Creek. Also water right number 22-00175 is missing, priority date 06/01/1889 period of use 04/ to 11/1, source Warm Creek.*
2. Describe the changes you wish to make in the proposed recommendation:
*For water right number 22-13120, increase water to at least 26,000 gals per day
For water right number 22-00175, need enough water to irrigate at least 10 Acres, this would be flood irrigation due to extreme difficulty to get lines over and around Warm Creek*
3. Give a brief explanation as to why you disagree with these portions:
*For water right number 22-13120, to furnish water to North Pasture I believe that 13,000 gals would not be enough to keep water to cattle in July, Aug and Sept.
For water right number 22-00175, to irrigate approx 10 Acres with sprinkler is almost impossible I have been flood irrigating this ground out of Warm Creek off and on over the past 15 yrs. Vernal Bagley who was water master in the early 90's told me to flood irrigate out of Warm Creek*
I AGREE with this proposed recommendation: no changes need to be made.
