29-4161B

Notes to File. R. Warner

- Claims Marsh Creek water w/ portable pumps w/ 1909 priority date. Unlikely that pumps were used in 1909.
- Field exam notes that claimant said that penstock was in creek prior to pumps. No evidence of prior penstock was shown.
- ~~Claim~~ Claim for right 29-4161 from Marsh Creek. Indicates water taken from ditches. No evidence of former ditches provided.
- Claim for right 29-4160 claims unnamed Spring. Cannot claim a new source of water.
- Claim " " 29-4162 - unnamed spring to pond to sprinkler line. Ok for that right but not applicable to 4161.
- 1974 photo shows no irrigation of lands claimed. Evidence of irrigation prior to this time. If irrigation occurred post 1971, a permit was required, if prior, no permit required but w/ revised priority date.

claim may be valid if:

- evidence of irrigation provided prior to 1971.
- priority date revised to reflect evidence provided.
