5.5 hp Briggs & Stratton portable gas pump. Runs 1 tank of gas morning and night.

Photo 3. Close-up of portable pump on Marsh Creek

29-4161B. Donald K, and Debra Hall 4234 S Marsh Creek Rd.

Monday, March 10, 2003. Looking southward. This is what is believed to be the beginnings of the original ditch constructed for the purpose of conveyance of irrigation water to the Don Hall farm. This particular portion of the ditch is no longer used.

Monday, March 10, 2003. Looking Eastward. This is a portion of Ditch that was used for conveying water from Marsh Creek to the Don Hall property. This portion of the ditch is still in use today but for conveyance of water from a nearby creek that is tributary to Marsh Creek. This conveyance was occurring on this day nearer to Marsh Creek.

Monday, March 10, 2003. Looking Northward along the roadway of Marsh Creek Road. The creek here paralleled the road for nearly a mile before arriving at the Don Hall property. Portions of the ditch nearer the POU have since been obliterated but are viewed arriving at his property.
