RE: SRBA Recommendation of 22-11579

Dear Mitch:

I have had to re-evaluate the recommendation for the above referenced water right recommendation due to some other water right claims I did not know about until now.

The recommendation previously sent, and approved by you, has been reduced in quantity by 0.17 cfs, which was recommended to the other claim. Basically, this has very little, if any, effect on the cities water right in that there was more water recommended than statute allows at 0.02 cfs per acre. The overage was allowed to account for ditch losses. With the other rights of this same priority being delivered at the same time the ditch losses are pro-rated to each right anyway so the net effect is zero.

Should you have questions regarding this matter please feel free to contact me.

Respectfully submitted,

Allen B. Ruberry
Sr. Water Resource Agent
Adjudication Bureau

CC: File

Revised recommendation for 22-11579.
