Re: Diversion Rate

Diversion rate recommended for A31-00062M/63M is specified by post-87 formal decree at 1.05 cfs.

Diversion rate recommended for A31-00062N/63N is limited by pou axis @ 0.02 cfs/acre to combined total of 2.29 cfs.

Sum of these rights is 3.34 cfs to be diverted from 2 wells, "Aaron's Pivot" in NWSE and "Handlines" in NESE.

Per NWM D, Capacity of "Handlines" (record 300261) is 816 GPM, Capacity of "Aaron's Pivot" is 932 GPM (Record 300240). Total capacity is 1748 GPM or 3.89 cfs.

This is slightly less than claimed, more than recommended.

Formal Transfer 3394 which authorized splitting

Diversion Rate 6/22/00 p2

"M" portions failed to concentrate existing diversion rate upon acres that had actually been developed under previous transfer 2403 (see file AB1-000620).

Claimant may possibly wish to talk to allocation about revisiting this issue, perhaps w/ another formal transfer, to avoid loss of previously-authorized diversion rate.

62M/63M are authorized by +3394 for 60 acres (actual developed is less) and 62N/63N are recommended for 174.4 acres.

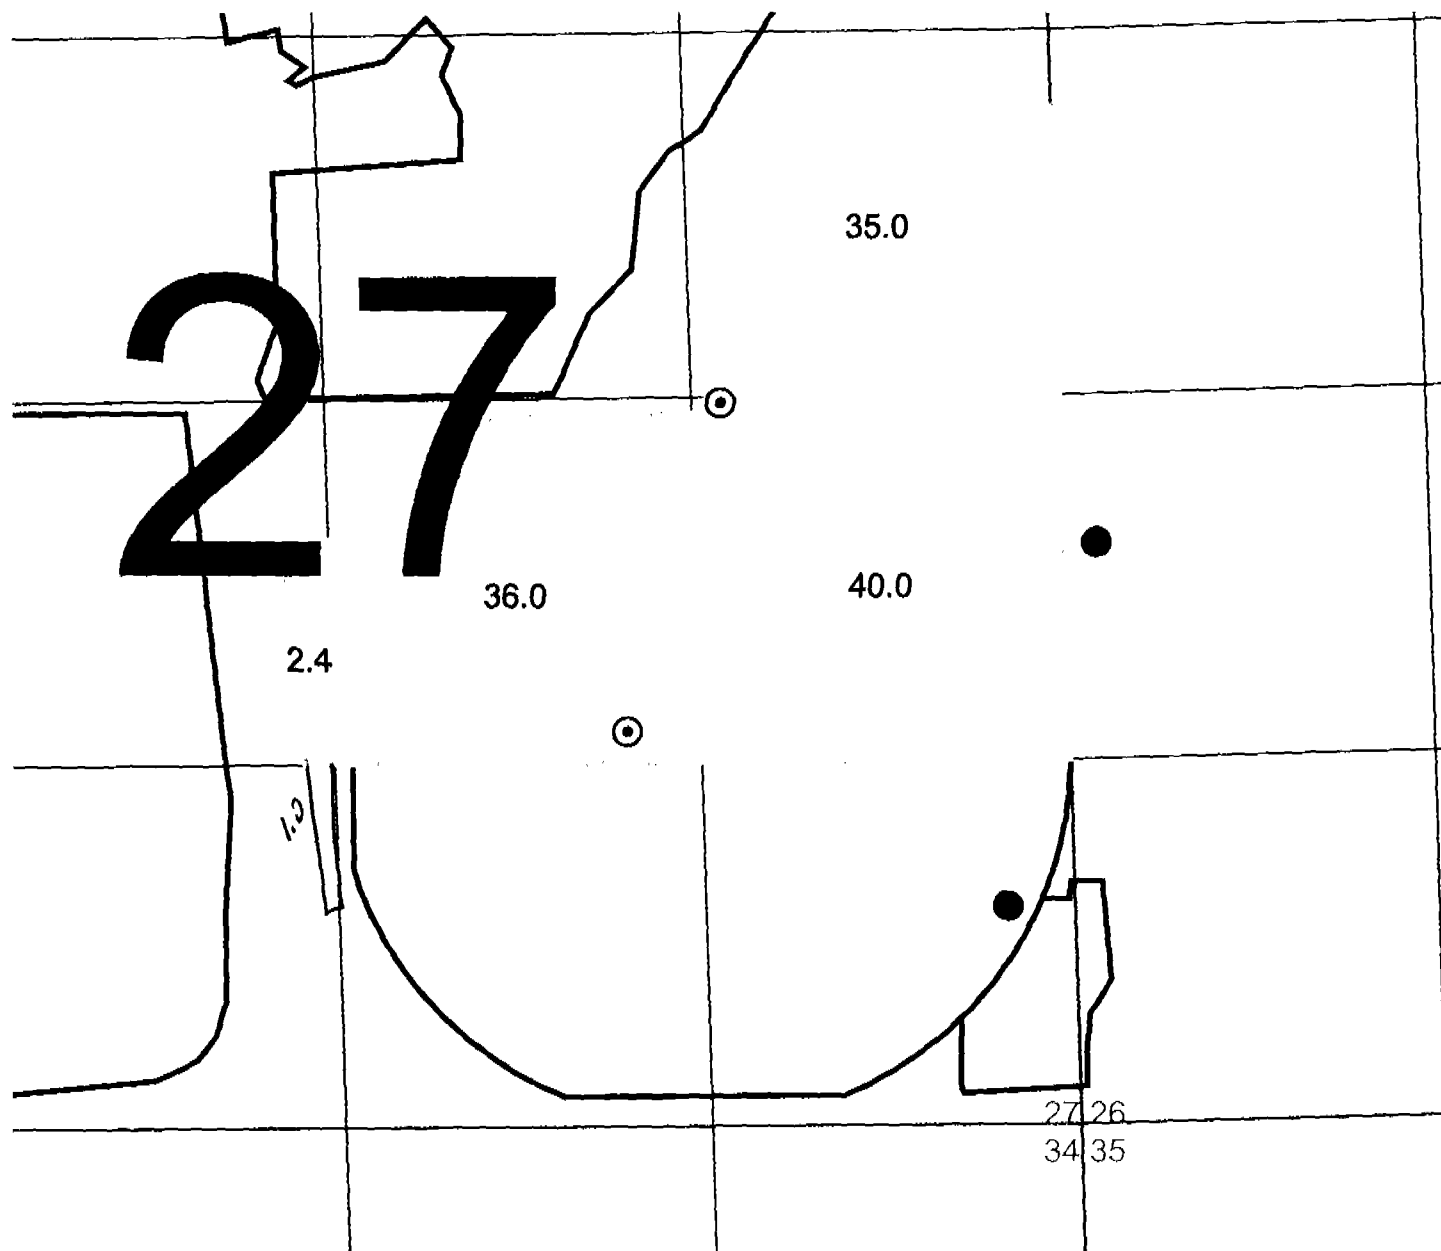

$174.4 \times 0.02 \approx 3.49$ cfs, which is slightly more than currently recommended.

Re: Split analysis, competing claims.

These water rights are the splits of the original Hamer Canal Co. rights. They shared a common POU and common POD's. 31-00062 was for 21.2 cfs with priority 10/31/1917. 31-00063 was for 8.8 cfs with priority 5/1/1928. Total is 30.0 cfs. Both are groundwater rights.

Transfer 1584 added points of diversion. Subsequent transfers split off parts of the original right, as individual shareholders began diverting their shares from private wells on their own POU. Some subsequent transfers change POU or POD of these split-off portions. Adjudication claims have been received corresponding to each of these splits by formal transfer.

Following the formal transfers, a portion of the original rights remained unchanged, as recorded in WR record 31-00062Q and 31-00063Q. Competing adjudication claims have been filed on this remaining portion.

This memo outlines the history of splits, and gives some information on competing claims. It relies on the following documentation, which is filed with A31-00062A:

- GIS maps of history of formal transfers. Pages 1 through 10.
- GIS map of competing claims for the remaining portion (WR splits "62Q" and "63Q"). Page 11.
- GIS map showing 1987 irrigation of lands under WR splits "Q." Page 12.
- 1980 NAPP showing 1980 irrigation of lands under competing claims. Pages 13 and 14.
- Close-up from USGS map W41 showing Hamer Canal delivery system, enhanced by GIS. Page 15.
- Memo from president and past presidents of Hamer Canal Company regarding ownership of shares, June 25, 1983. Page 16.
- Affidavit from officials of Hamer Canal Company regarding ownership of shares, 1984. Page 17.

- Stipulation and Agreement of shareholders of Hamer Canal Company, 1980. Page 18.
- Ernie Carlsen memo of conversation w/ Neal Savage, June 1980. Page 19.
- Excerpt from USDA Water Facility Operations Proposal for the Hamer Canal Company, 1941. Pages 20 and 21.
- Second copy of Stipulation and Agreement with cfs notations. Page 22.
- Review of claims and comparison with Stipulation and Agreement. Pages 23 and 24.

The memo also relies on some documentation found in file A31-00062L regarding denied transfer application 2890, and conversations with Harold Jones and Ernie Carlsen. Jones and Carlsen were involved in the original transfers and in the investigation of application 2890.

I. History of Place of Use

While the decreed place of use covered approximately 3140 acres, Mr. Jones and Mr. Carlsen indicate that this was at best a service area rather than an actual place of use. With the severe leakage of the canal and the sandy soils in the area, 30 cfs would have been adequate for only a fraction of the original decreed acres.

GIS map # 12 shows that some of the areas covered by WR splits "Q" were not under irrigation in 1987 and likely had not been for some time. Jones and Carlsen recall that additional GW licenses were developed for other lands under the Hamer Canal. Documentation in 31-00062L shows this for the Wade Yearsley places of use, and the WR and AJ databases bear this out for lands in section 23. Other places of use were not investigated.

It appears that all of the competing claims "L," "K," "Q," and "S" all were under irrigation in 1980 and 1987. "L," however, is in a location that could not physically have been served by the Hamer Canal but would have to represent an accomplished transfer. This claim in fact is based upon the denied transfer application 2890. Jones and Carlsen indicate that they found no evidence that no original Hamer Canal lands were dried up to accommodate the transfer. Conversation memos in A31-00062L indicate that the claimant acknowledges that all the original Hamer Canal lands were still being irrigated.

Claims "K," "Q," and "S" are in locations where irrigation from the Hamer Canal would have been physically possible.

II. Overlapping Water Rights on Competing Claims

Claims "L" are overlapped by license 31-02337 and claim A31-02337. The license authorizes 1.68 cfs on 84 acres (0.02 cfs/acre). The AJ claim is for 112 acres, which is substantiated by GIS analysis.

The claimant appears to have an ownership claim on the unallocated Hamer Canal rights (see "ownership" below). Because no Hamer Canal lands have been dewatered, the Hamer Canal rights will have to overlap the licensed right, rather than cover the enlargement acres. The license is already for 0.02 cfs/acre, but since the lands are surface irrigated, a Hubble analysis might justify additional diversion rate on the licensed 84 acres. However, this becomes problematic in light of the enlargement; how do we justify a need for additional diversion rate, and at the same time justify additional acres without additional diversion rate? (Note that NWMD measured over 6.0 cfs; the license is for 1.68.)

Claimant has been requested to provide additional documentation of the history of the use of the claimed right. Further analysis and investigation will be filed in A31-00062L. At first blush it appears that even though claimant may have title to the right, there has not been a valid accomplished transfer or enlargement of the original Hamer Canal rights. Upon receipt of documentation I will continue review.

Claims "Q" are not overlapped by any WR or claim. I've requested documentation of use and ownership from claimant. Upon receipt, I will begin CVR investigation.

Claims "S" are overlapped by beneficial use claim A31-10503 and license-based claim A31-07203. These overlaps have not been investigated. Ownership review below indicates the claimant does have an interest in the Hamer Canal rights. I have also requested documentation and will proceed with CVR review upon receipt.

III. Ownership

Documentation of ownership is incomplete and contradictory:

1. Memo from past presidents of Hamer Canal Co. (1983, p. 16) indicates that "existing water rights in the Upper Hamer Canal Company, now belong to Dave Murdock and Loren McGarry." This is contradicted, however, by Rene Shurtliff's ownership documentation in transfer 4911 (1997). It is unclear if there may also be others with legitimate claims to the water apparently granted to Murdock by this memo. Specifically, it is unclear who now has title to the shares of Shirley and Lounsbury (see items 3, 4, and 5).
2. Affidavit of officials of Hamer Canal Co. (1984, p. 17) indicate that Dave Murdock "has purchased water rights in excess of the amount he is still using" and that he specifically had purchased the rights to 212 acres in sections 22

and 28. Wade Yearsley, owner of the lands, provided an affidavit that the Hamer Canal Water had been used on those lands but no longer is, and that he had no claim on the Hamer Canal shares. However, documentation in A31-00062L shows that those places of use continued to be irrigated under other rights and claims.

3. Stipulation and Agreement (1980, p18) accounts for 18.1 cfs of the 30.0 decreed cfs. The Neal Savage conversation memo (1980, p. 19) indicates that all the shareholders signed the Stipulation and Agreement. However, the list itself appears to only be a list of shares proposed to be transferred out of the company. No number of shares is listed for signers Ralph Lounsbury, Loren McGarry, or Dan Murdock. Further, "zero" shares are listed for Rene Shurtliff.
4. Water Facilities Operation Proposal (Pages 20 and 21) indicates that in 1941 there were 322 shares of stock outstanding. The stipulation asserts 5 miners inches per share. $30 \text{ CFS} \times 50 \text{ inches/cfs} \times 1 \text{ share/5 inches}$ indicates 300 shares outstanding.
5. The copy of the Stipulation and Agreement with cfs notations (Page 22) accounts for all of the stipulated shares except Lynn Shirley's.
6. Review of Claims (Pages 23 and 24) identifies claims associated with McGarry ("A"), Murdock's original shares ("K"), and Shurtliff ("J").

Murdock's "L" claim, and Dalling's "Q" claim, are not linked back to any signers of the Stipulation and Agreement or any of the stipulated shares.

The review accounts for all the stipulated shares except Shirley's and all the signers except Lounsbury and Shirley.

IV. Diversion Rate

The decreed diversion rate was 30.0 cfs. However, the Water Facilities Operation Proposal (Pages 20 and 21) indicates that in 1941, the canal was "assessing 322 shares of stock... and delivering approximately two miner's inches of water per share." This is only about 13 cfs. However, it is likely that part of the proposal, and part of transfer 1584, were efforts to recover diversion capacity lost to declining pumping water levels.

The formal transfers were all processed under the assumption that the original diversion rate was valid and I plan to do the same with AJ claims, as ownership and historical use documentation allows.

Re: Split History

Attached are split histories for the WR side and AJ side. Primary documentation is in A31-00062A. Additional documentation is in A31-00063A, A31-00062J, and A31-00062H.

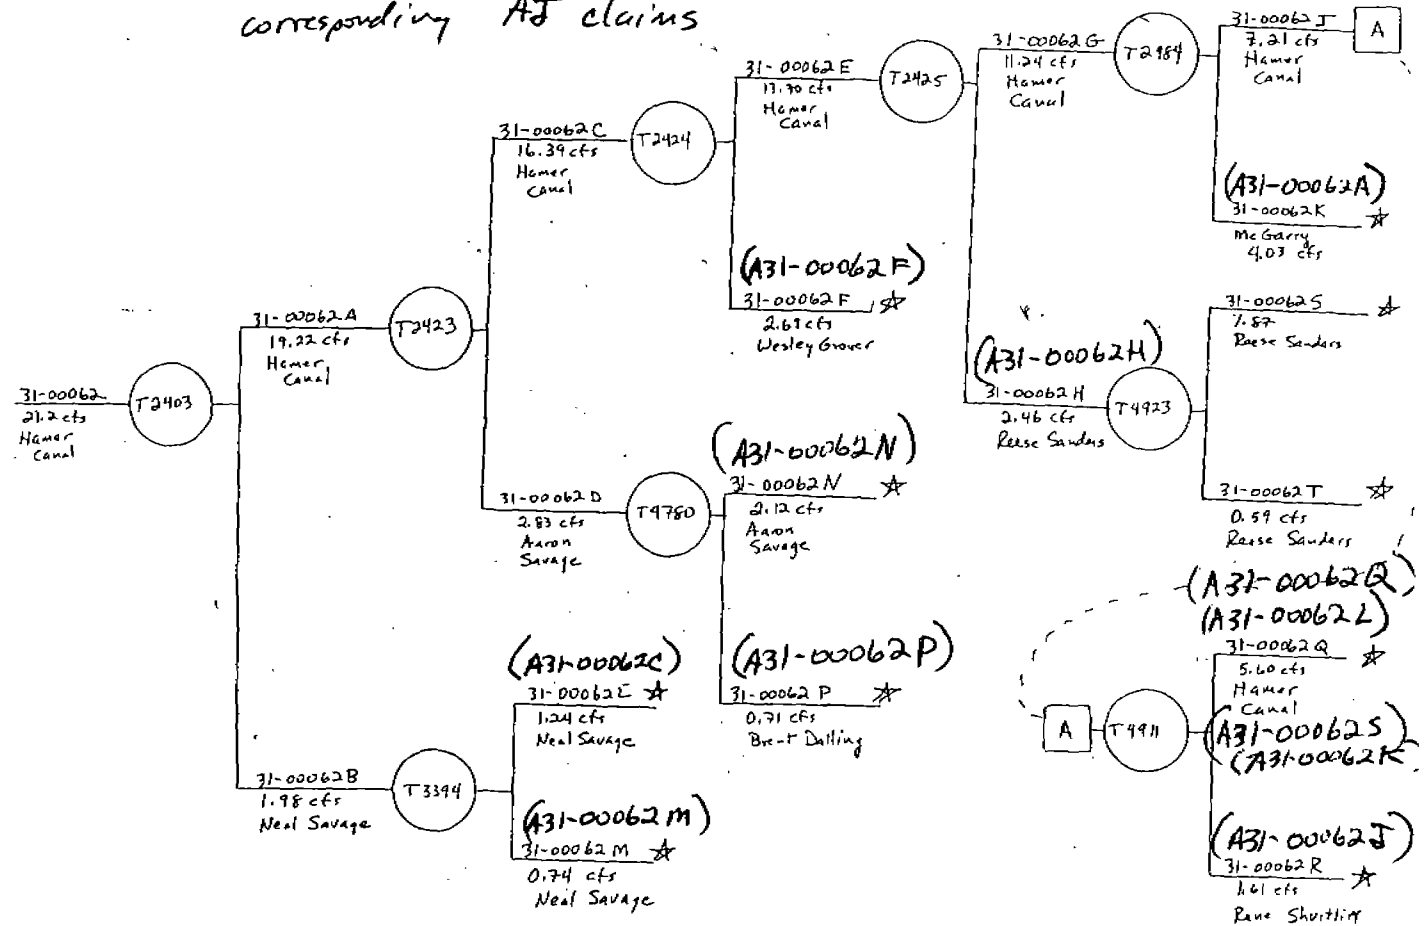

Claim A31-00062H, corresponding to WR 31-00062H, needs to be split per T4923. Transfer split WR into portions "S" and "T," but claim "S" has already been used to represent a part of original WR 31-00062Q.

Four claims -- A31-00062K, A31-00062L, A31-00062Q, and A31-00062S -- appear to have their basis in WR 31-00062Q. These will need careful research of ownership history, original POU, and accomplished transfer. Memo in splits of '63 indicates that 31-00062Q is underclaimed, but this is incorrect. Both 31-00062Q and 31-00063Q are overclaimed.

Note that Hamer Elementary School has an irrigation well that may also reflect part of the original Hamer Canal Co. right. See file A31-10292.
