HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

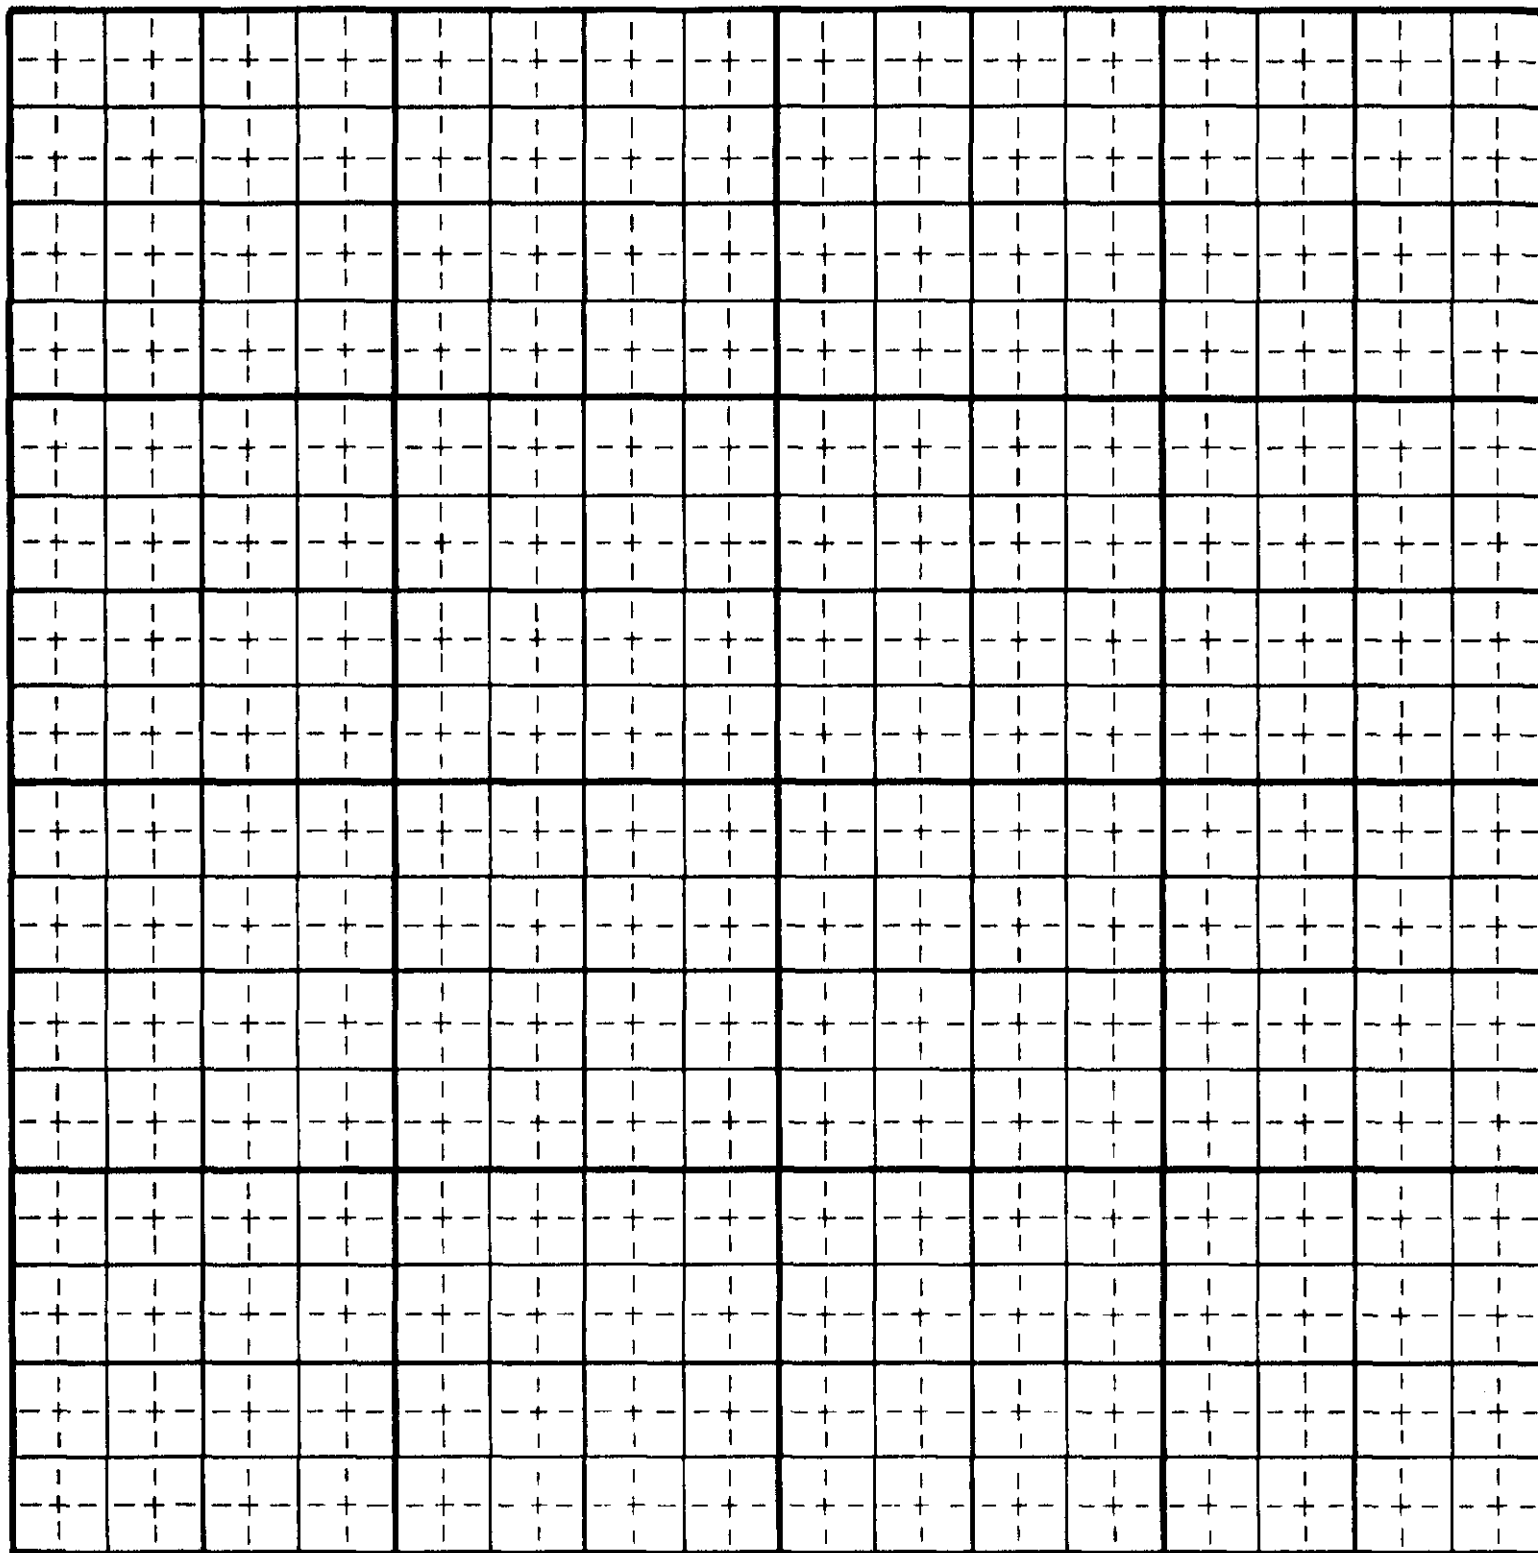

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

DESCRIPTION OF
EXISTING DIVERSION WORKS

The Owsley Canal Company diversions fall into four categories:

1. Diversions from Mud Lake in Section 1, T6N, R34E.

Water under all rights to the natural flows of Mud Lake and its tributaries, water diverted by the Bybee wells, and at times much of the water diverted by the North Lake wells, as well as water under all storage rights in connection with such sources, flows from Mud Lake through the main intake canal of the company to the main lift pumping station located just south of Highway 28 in the NW1/4NW1/4 of Section 24, T6N, R34E. There are four pumps at the main lift station, three 200 HP pumps and one 150 HP pump. The pumps lift water about seventeen feet and produce some 329 cfs of flow in the canal system. In addition some water is diverted through the Level Canal Company intake from Mud Lake in the SW1/4SW1/4 Section 34, T7N, R34E and then recaptured by means of a pump located on the south bank of said canal in the SE1/4SE1/4 Section 33 of said township and range for the irrigation of some two hundred acres of farm land. This is referred to as the Shively (tenant) or Staley (landowner) diversion.

2. Diversions of groundwater at the Bybee well field in Section 25, T7N, R35E.

When these wells were first drilled, the water flowed from them under pressure in the amount of about 200 cfs. Over the years the number of wells and the depth has been increased, and pumps have been installed to produce the 200 cfs. There are now eight wells with pumps. They range in depth from twenty-two feet to one hundred feet. There are six 100 HP pumps, one 75 HP pump and one 60 HP pump. Water from the wells is collected in a system of ditches with a large sump and discharged through a concrete and earthen structure into Camas Creek. It flows through the channel of Camas Creek to Mud Lake from which it is then rediverted as described above.

3. Diversions of groundwater at the North Lake well field in Sections 13, 18, 19 and 24 of T7N, R34E.

There are some sixteen drilled wells in this location, eleven are currently in use. Their combined maximum capacity is 197.66 cfs. The depth of nearly all eleven producing wells is one hundred feet. All but one of the pumps are 75 HP pumps; one is a 60 HP pump. These wells discharge into a system of collection ditches which feed a main ditch running in a generally southwesterly direction to a bifurcation structure in Section 34 of said township and range. From the bifurcation structure, water is either delivered south into Mud Lake for rediversion as described above, or in a southwesterly direction to the west lift pumps of the company, sometimes referred to as the "Sparks Pumps". This lift station is located in the

SW1/4SW1/4 of Section 33, T7N, R34E where the water is lifted some fifteen feet into the Owsley Canal system.

4. Diversions of wastewater within the Owsley Canal system by means of subpumps.

There are twelve subpumps located strategically throughout the Owsley system for the purpose of pumping excess tailwater and subwater from irrigation of the lands back into either the canal system or Mud Lake for reuse. These are relatively smaller pumps ranging in size from 3 HP to 20 HP and lift water eight to eighteen feet.

STORAGE RIGHTS

IN

MUD LAKE

Under the federal court decree in the case of Ernest Sauve v. W. H. Abbott, et al., Case No. 635, entered November 1, 1930, the watermaster is charged with the responsibility of accounting for water stored in Mud Lake during the nonirrigation season on the basis of priorities to the use of the waters of Mud Lake and its tributaries during the irrigation season.

As a result of the drilling of wells which for many years resulted in the flow of significant amounts of water therefrom without the necessity of pumping, other court decrees have resulted which also impact such storage rights. Notable among such decrees is the one entered by the District Court of the Ninth Judicial District for Jefferson County in the case of Owsley Canal Company v. Ernest Bauerle, et al., Case No. 1739, on October 14, 1940.

By the early 1960's, most of such flowing wells had ceased to flow in average water years, either during the irrigation or nonirrigation season. Pumps were installed and in very recent years some wells have been deepened in order to provide the

required amounts of water. Coincidentally with the increased number of groundwater diversions in the areas surrounding Mud Lake, wintertime flows from Camas Creek and the other tributaries have, in many of the past twenty to twenty-five years, been insufficient to fill Mud Lake.

In response to the need to fill Mud Lake during the nonirrigation season, for the benefit of all holders of natural flow and storage rights therein; a practice has developed of pre-irrigation season pumping from many of the same wells which are the subject of the Owsley v. Bauerle decree, as well as some other wells. The pre-season pumping has been done pursuant to an agreement entered into by all those who hold rights to the use of the waters of Mud Lake. A copy of the agreement currently in effect is attached hereto.

Claimant has made a claim for storage rights under each of its natural flow rights. The storage capacity of Mud Lake is only 45,000 acre feet, which is far less than the combined total of the potential storage rights of all holders of such rights. In addition to the limitations imposed upon such claimed storage rights by nature, by the size of the storage facility, by the applicable decrees of courts and the priorities provided therein, such storage rights have been and are presently subject to the practice described in the attached current pre-season pumping agreement.
