The Owsley Canal Company diversions fall into four categories:

1. Diversions from Mud Lake in Section 1, T6N, R34E.

Water under all rights to the natural flows of Mud Lake and its tributaries, water diverted by the Bybee wells, and at times much of the water diverted by the North Lake wells, as well as water under all storage rights in connection with such sources, flows from Mud Lake through the main intake canal of the company to the main lift pumping station located just south of Highway 28 in the NW1/4NW1/4 of Section 24, T6N, R34E. There are four pumps at the main lift station, three 200 HP pumps and one 150 HP pump. The pumps lift water about seventeen feet and produce some 329 cfs of flow in the canal system. In addition some water is diverted through the Level Canal Company intake from Mud Lake in the SW1/4SW1/4 Section 34, T7N, R34E and then recaptured by means of a pump located on the south bank of said canal in the SE1/4SE1/4 Section 33 of said township and range for the irrigation of some two hundred acres of farm land. This is referred to as the Shively (tenant) or Staley (landowner) diversion.

2. Diversions of groundwater at the Bybee well field in Section 25, T7N, R35E.

When these wells were first drilled, the water flowed from them under pressure in the amount of about 200 cfs. Over the years the number of wells and the depth has been increased, and pumps have been installed to produce the 200 cfs. There are now eight wells with pumps. They range in depth from twenty-two feet to one hundred feet. There are six 100 HP pumps, one 75 HP pump and one 60 HP pump. Water from the wells is collected in a system of ditches with a large sump and discharged through a concrete and earthen structure into Camas Creek. It flows through the channel of Camas Creek to Mud Lake from which it is then rediverted as described above.

3. Diversions of groundwater at the North Lake well field in Sections 13, 18, 19 and 24 of T7N, R34E.

There are some sixteen drilled wells in this location, eleven are currently in use. Their combined maximum capacity is 197.66 cfs. The depth of nearly all eleven producing wells is one hundred feet. All but one of the pumps are 75 HP pumps; one is a 60 HP pump. These wells discharge into a system of collection ditches which feed a main ditch running in a generally southwesterly direction to a bifurcation structure in Section 34 of said township and range. From the bifurcation structure, water is either delivered south into Mud Lake for rediversion as described above, or in a southwesterly direction to the west lift pumps of the company, sometimes referred to as the "Sparks Pumps". This lift station is located in the

SW1/4SW1/4 of Section 33, T7N, R34E where the water is lifted some fifteen feet into the Owsley Canal system.

4. Diversions of wastewater within the Owsley Canal system by means of subpumps.

There are twelve subpumps located strategically throughout the Owsley system for the purpose of pumping excess tailwater and subwater from irrigation of the lands back into either the canal system or Mud Lake for reuse. These are relatively smaller pumps ranging in size from 3 HP to 20 HP and lift water eight to eighteen feet.

STORAGE RIGHTS

IN

MUD LAKE

Under the federal court decree in the case of Ernest Sauve v. W. H. Abbott, et al., Case No. 635, entered November 1, 1930, the watermaster is charged with the responsibility of accounting for water stored in Mud Lake during the nonirrigation season on the basis of priorities to the use of the waters of Mud Lake and its tributaries during the irrigation season.

As a result of the drilling of wells which for many years resulted in the flow of significant amounts of water therefrom without the necessity of pumping, other court decrees have resulted which also impact such storage rights. Notable among such decrees is the one entered by the District Court of the Ninth Judicial District for Jefferson County in the case of Owsley Canal Company v. Ernest Bauerle, et al., Case No. 1739, on October 14, 1940.

By the early 1960's, most of such flowing wells had ceased to flow in average water years, either during the irrigation or nonirrigation season. Pumps were installed and in very recent years some wells have been deepened in order to provide the

required amounts of water. Coincidentally with the increased number of groundwater diversions in the areas surrounding Mud Lake, wintertime flows from Camas Creek and the other tributaries have, in many of the past twenty to twenty-five years, been insufficient to fill Mud Lake.

In response to the need to fill Mud Lake during the nonirrigation season, for the benefit of all holders of natural flow and storage rights therein; a practice has developed of pre-irrigation season pumping from many of the same wells which are the subject of the Owsley v. Bauerle decree, as well as some other wells. The pre-season pumping has been done pursuant to an agreement entered into by all those who hold rights to the use of the waters of Mud Lake. A copy of the agreement currently in effect is attached hereto.

Claimant has made a claim for storage rights under each of its natural flow rights. The storage capacity of Mud Lake is only 45,000 acre feet, which is far less than the combined total of the potential storage rights of all holders of such rights. In addition to the limitations imposed upon such claimed storage rights by nature, by the size of the storage facility, by the applicable decrees of courts and the priorities provided therein, such storage rights have been and are presently subject to the practice described in the attached current pre-season pumping agreement.

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 31.
2. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
3. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
5. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
6. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
7. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
8. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
- *** 9. The total instantaneous diversion of water from all points of diversion under Transfer 5335 shall not exceed 503.21 cfs during the irrigation season.
10. Approval of Transfer 5335 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
- ** 11. Rights 31-00327, 31-00328, 31-00329 and 31-00330 when combined shall not exceed a total diversion rate of 200.00 cfs during the irrigation season, and may be diverted at their full authorized rate of diversion into Mud Lake for storage purposes during the non-irrigation season.
- * 12. Right 31-02289 is limited to irrigation of 160.0 acres in the place of use described above in a single irrigation season.
- * 13. Right 31-02290 is limited to irrigation of 240.0 acres in the place of use described above in a single irrigation season.
- * 14. Right 31-02297 is limited to irrigation of 340.0 acres in the place of use described above in a single irrigation season.

SUBJECT: Transfer 5335

DATE: February 9, 1999

Transfer 5335 combines the groundwater rights of the Holley Water Users, Jackett Canal Co, and Owsley Canal company. These three companies have combined under the Owsley Canal Company name and will operate a single combined system.

The application identifies 34 points of diversion and a combination of the land lists evidenced under each company's SRBA claims or 24261.3 acres. The decreed rights are vague, while the licensed rights identify specific acres and limits. SRBA review of all these rights through the adjudication process will provide specifics and verify the validity of all of these rights.

Review of these rights found that Right 31-02317 was actually licensed in two parts with separate rates and priority dates. These rights were more accurately entered as Parts A & B on the database and the additional 8.08 cfs added to the total diversion rate under this transfer. Also, a combined limit of 200.00 cfs during the irrigation season was identified under Rights 31-00327/00328/00329 & 00330. Right 31-02259 was listed on the application, however this right was superseded by Right 31-00330. After making these adjustments, the total rate of diversion under these rights is 643.21 cfs limited to 503.21 cfs during the irrigation season and 5,000 af storage.

Season of use and diversion volume were adjusted to current standards where specific acres were identified. Recommended conditions include watermaster control, supplemental groundwater, irrigation overlap, measuring/lockable controlling works, right-of-way, permissible place of use, combined limits and standard transfer conditions.

Re: Water Rights in the name of
Owsley Canal Company

Mr. H. R. Harn,
Box 7,
Dobois, Idaho.

Dear Mr. Harn:

Upon your request of February 23rd for the Owsley Canal Company, we find, as taken from our records, the following list of decreed water rights and permit rights. In the case of Ernest Sanve, Plaintiff, vs. W. H. Abbott, et al, Defendants, dated November 1, 1930, by Charles C. Cavanah, U. S. District Judge, the following rights were decreed to the Owsley Canal Company out of Mud Lake:

Priority of March 9, 1911, for 1.6 c.f.s.
" " April 15, 1912, for 80.8 c.f.s.
" " December 2, 1916, for 72.6 c.f.s.
" " May 1, 1921, for 25.0 c.f.s.
" " August 11, 1924, for 75 c.f.s.

Total of 255.0 c.f.s.

In the above stated decree, we find from our abstract of decreed rights, the following water rights out of Mud Lake decreed to the following persons and now in the name of the Owsley Canal Company:

November 3, 1910 - 1.6 cfs decreed to Carl Nordstrom
November 14, 1912 - 2.68 cfs decreed to Clara Walchman
July 21, 1913 - 4.0 cfs decreed to James A. Walton
September 6, 1913 - 2.5 cfs decreed to H. A. & Mary L. England
October 18, 1913 - 3.0 cfs decreed to Henry Jewett
December 15, 1913 - 1.6 cfs decreed to Mary A. Jewett
June 1, 1915 - 1.0 cfs decreed to George E. Monroe
June 24, 1916 - 2.44 cfs decreed to William H. Miller
December 3, 1916 - 1.0 cfs decreed to George E. Monroe
August 28, 1926 - 6.4 cfs decreed to Ernest Sanve

In the case of the Owsley Canal Company, a corporation, Plaintiff, vs. Ernest Bquerle, et al, Defendants, dated October 14, 1940, by C. J. Taylor, District Judge, the plaintiff was awarded an amount not exceeding in the aggregate the equivalent of 200 cubic feet per second flowing continuously

during the irrigation season from May 1st to November 1st of each year, from all or any of the wells constructed, or to be constructed, under permits Nos. 17611, 17612, 17640 and 18378.

A water license was issued by the Department of Reclamation on Permit No. 17262 for 40 cubic feet of water with priority of January 25, 1930. No mention was made in the last above entitled case of water license No. 17262 in the name of Owsley Canal Company, with priority of January 25, 1930, for 40 cubic feet from North Lake and subterranean sources. The point of diversion from North Lake is in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$, Section 23, Township 7 North, Range 34 East, and evidently three artesian wells were drilled along the canal to Mad Lake; - no information as to the capacity of the wells.

We have checked our records in this office thoroughly and to the best of our belief, this is a complete list of all valid water rights in the name of the Owsley Canal Company. This list does not include the water being applied for under Permit No. G-25544, G-25546, G-25547, G-25548, G-25549, G-25550 and G-25551; also G-25545.

There will be no charge for this information. Copy of this letter is being furnished you in triplicate.

Very truly yours,

Elmer:

In regards to valid water rights from wells in the name of Owsley Canal Co., I find:

P-17262 for 40.0 c.f.s. from North Lake and subterranean water from 3 1/4 wells in sections 23, 26, & 27, 7 N., 34 E.

Priority: 1/25/30 (This was not included in the Bauerle Decree mentioned below.)

P-17640 for 50.0 c.f.s. from wells (12) in Sec. 25, 7 N., 35 E.

Priority: 1/8/32

P-18378 for 80.0 c.f.s. from 24 wells in Sec. 12, 6 N., 34 E. and Sec. 25, 7 N., 35 E.

Priority: 6/26/36

Shown in Tolman's report but not in and license

A letter from Roy to H. R. Harn concerns Owsley Canal water rights and refers to Decree, Owsley vs Bauerle, October 1940, which includes permits 17640 & 18378 as well as permits 17611 & 17612 (now cancelled.)

The only wells on record in Sections 13 & 24, 7 N., 34 E. were relinquished February 6, 1956. They were:

G-21890, G-21891 and G-21892.

They may have been drilled later but our records do not show this.

Attention Mr. Thompson.

Gentlemen: Re: License No. 4084 - Permit 17262,
License No. 4085 - Permit 18378,
Owsley Canal Company.

In checking over the fees payable upon issuance of the above licenses on final proof of beneficial use some months ago, it appears that there are in the aggregate 396 40-acre tracts embraced in the two licenses. Upon the rate of fees applicable to mutual cooperative projects; that is, \$1.00 per 40-acre subdivision, the total fees payable (if no previous water licenses had been issued for the same lands) would be \$396.00.

However, under the provisions of Section 41-215, Idaho Code Annotated, no fees are payable where the right sought is additional to the existing water right. In the case of Owsley Canal Company project, it appears that license fees have been paid by the company as follows:

Permit No. 4713 (two licenses), 279 tracts, \$279.00

It also appears that upon various 40-acre subdivisions within the project, individual water rights have passed to license as follows:

License No. 7405,	Permit No. 2604,	Cutler,	2	40-acre tracts,
License No. 1933,	Permit No. 9522,	Melton,	6	" " "
License No. 2606,	Permit No. 9575,	Englund,	4	" " "
License No. 1442,	Permit No. 8378,	Jennett,	4	" " "
License No. 3405,	Permit No. 14443,	Staley,	2	" " "
License No. 2067,	Permit No. 3819,	Welchman,	4	" " "
	Total,	22	"	" "

From the foregoing, it would appear that license fees have already been paid upon 301 of the 40-acre subdivisions embraced within the above captioned licenses just now about to be issued. This would leave a balance of \$95.00 in fees payable upon issuance of the present licenses. The above computation has been arrived at as a result of rather detailed checking

with the records of your office. Kindly let me know if the foregoing is correct and satisfactory. If so, the Owsley Canal Company will at once forward check for \$95.00.

Re: License No. 4084 - Permit No. 17262
License No. 4085 - Permit No. 18378
Owsley Canal Company

Dear Mr. Snow:

We wish to acknowledge receipt of your letter of March 18, in which you submitted a detailed report of payments made and due on the various permits filed by the Owsley Canal Company, in connection with beneficial use proof.

A complete check of the lands of the project and of the payments made by the Owsley Canal Company in connection with beneficial use proof has been made by this Department, covering all permits that have gone to and are now ready for license.

We concur in the report as outlined by you in the amount due the Department of Reclamation on Permits Nos. 17262 and 18378.

A division of fees between the two permits to complete our records is hereby set as follows:

Due on Permit No. 17262	\$60.00
Due on Permit No. 18378	35.00

The above division is approximately correct, and can be changed by agreement, if not satisfactory to you.

Thanking you for your letter and your cooperation in checking into this matter, we are

Very truly yours,

E. V. BERG
Commissioner of Reclamation
