Place of use changed due to accomplished transfer. Evidence from conversation from Robert Ellis. On Northern Well, a 40 HP pump replaced old pump. When 40 HP was added system changed. Can see from Satisfactory Claim 31-04068 that system changed prior to 1982.

- North well added as pod from accomplished transfer.

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights. Required claims may be filed by a new owner.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector 'and', 'or', or 'and/or'. If an 'and' is used, all parties must sign this form. If an 'and/or' or 'or' is used, all parties may sign. However, only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. You may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your portion of the water right: include the number of homes you acquired, number of acres irrigated with your portion of the right, if it is more than 1/2 acre, type and number of stock if your portion of the right includes stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights proportionately.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

Melvin Ellis of Hamer, Jefferson County, State of Idaho, being first duly sworn upon oath, deposes and says: That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 19667. That under the terms and conditions of said Permit, proof of beneficial use thereunder was required to be made by August 15, 1955, and such time was theretofore extended to February 15, 1956. That he has heretofore put to beneficial use 1.8 second feet of water and has irrigated 90 acres. That, for the following reasons, he is unable to put to beneficial use within the required time the remainder of the water appropriated under his permit, to wit: Ground needs levelling in order to irrigate remaining 60 acres successfully, or install a sprinkler system; or it may be necessary to drill well on higher location. Further, he is unable to submit proof because of error in description of land upon which well is located. WHEREFORE, He asks that the Commissioner of Reclamation extend the time for the making of proof of Beneficial Use under said permit to the 23rd day of March, 1956, at 10o'clock A. M.
