1. Is the name and address complete with zip code? ☒2. Is a priority date entered? ☒

Is the water use exempt from the Permit requirements, or if it is not exempt, has a Permit been approved or a License issued?

A Permit is required: (1) for groundwater developed after March 25, 1963 (except single family domestic and stockwater wells using less than 13,000 gpd), or (2) for surface water developed after May 20, 1971 (except for instream stockwater). USE CARE IF CLAIM IS RETURNED. REFER TO ADJUDICATION MEMOS # 1 (ADJ. CLAIMS/APPLICATIONS) AND # 9 (REJECTION OF CLAIMS). EXPLAIN IN COMMENTS.

3. (a) Is a source entered? ☒(b) Is a tributary to entered? (if required) ☒

N/A

4. Is the legal description of the p.d. sufficient? ☒5. Is there a description of the diverting works? ☒6. Are the water uses appropriate for the form? The short form is limited to domestic and stockwater uses with direct diversion. All claims that include storage or instream stockwater must use long form. ☒Is the period of use included? ☒Is a quantity claimed for each use? ☒7. Is a total quantity claimed entered? ☒8. If required is a consumptive use entered? ☒

N/A

Is the consumptive use correct? ☒

N/A

9. Are the non-irrigation uses listed properly? If this claim is on the short form, and more than one domestic use is listed, single ownership must be stated. If not under single ownership, see Adjudication Memo # 4. ☒

N/A

10. Is (are) the place(s) of use entered? ☒11. Is (are) the county(ies) entered? ☒12. Is the ownership of p.u. checked? ☒13. Are other water rights listed or "none" indicated? ☒14. If required, are remarks correct? (If the claimant does not own the place of use, authority for filing the claim must be explained in the remarks.) ☒

N/A

15. Is the basis of the claim checked? ☒16. Is the claim signed by the claimant, and is the signature appropriate? (If an individual is the claimant, has that individual signed the claim, or if an organization is the claimant, is the organization signature block complete?) ☒Has the claim been signed, sealed, and dated by a notary? ☒Was this claim filed on time, or was an extension granted? ☒Is the fee enclosed correct? ☒

Exempt

If this claim is based on an existing water right, has the identification number been entered? ☒

N/A

Should this claim be receipted and data entered? ☒

HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

STORAGE RIGHTS

IN

MUD LAKE

Under the federal court decree in the case of Ernest Sauve v. W. H. Abbott, et al., Case No. 635, entered November 1, 1930, the watermaster is charged with the responsibility of accounting for water stored in Mud Lake during the nonirrigation season on the basis of priorities to the use of the waters of Mud Lake and its tributaries during the irrigation season.

As a result of the drilling of wells which for many years resulted in the flow of significant amounts of water therefrom without the necessity of pumping, other court decrees have resulted which also impact such storage rights. Notable among such decrees is the one entered by the District Court of the Ninth Judicial District for Jefferson County in the case of Owsley Canal Company v. Ernest Bauerle, et al., Case No. 1739, on October 14, 1940.

By the early 1960's, most of such flowing wells had ceased to flow in average water years, either during the irrigation or nonirrigation season. Pumps were installed and in very recent years some wells have been deepened in order to provide the

MICROFILMED

DEC 09 1992

required amounts of water. Coincidentally with the increased number of groundwater diversions in the areas surrounding Mud Lake, wintertime flows from Camas Creek and the other tributaries have, in many of the past twenty to twenty-five years, been insufficient to fill Mud Lake.

In response to the need to fill Mud Lake during the nonirrigation season, for the benefit of all holders of natural flow and storage rights therein; a practice has developed of pre-irrigation season pumping from many of the same wells which are the subject of the Owsley v. Bauerle decree, as well as some other wells. The pre-season pumping has been done pursuant to an agreement entered into by all those who hold rights to the use of the waters of Mud Lake. A copy of the agreement currently in effect is attached hereto.

Claimant has made a claim for storage rights under each of its natural flow rights. The storage capacity of Mud Lake is only 45,000 acre feet, which is far less than the combined total of the potential storage rights of all holders of such rights. In addition to the limitations imposed upon such claimed storage rights by nature, by the size of the storage facility, by the applicable decrees of courts and the priorities provided therein, such storage rights have been and are presently subject to the practice described in the attached current pre-season pumping agreement.

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 31.
2. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
3. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
5. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
6. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
7. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
8. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
- *** 9. The total instantaneous diversion of water from all points of diversion under Transfer 5335 shall not exceed 503.21 cfs during the irrigation season.
10. Approval of Transfer 5335 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
- ** 11. Rights 31-00327, 31-00328, 31-00329 and 31-00330 when combined shall not exceed a total diversion rate of 200.00 cfs during the irrigation season, and may be diverted at their full authorized rate of diversion into Mud Lake for storage purposes during the non-irrigation season.

SECTION 32
T. 1 N., R. 35
T. 6 N., R. 35

JUL 7 1978

A. DESCRIPTION OF RIGHTS AS RECORDED:

Department of Water Resources
Eastern District Office

1. Rights evidenced by:

a. Decreed Rights:

- (1) Ernest Sauve, Plaintiff, vs. W. H. Abbott, et al, Defendants;
dated November 1, 1930; in the District Court of the United States for the District of Idaho, Eastern Division. Proceedings were held in Pocatello, Bannock County, Idaho, but the decree purports to allocate the waters of Mud Lake in Jefferson County, Idaho, and its tributaries. All lands irrigated through applicant's system are in Jefferson County. These rights were conveyed to applicant by an instrument entitled "Water Deed", dated May 1, 1956, recorded as Instrument No. 116320 in the records of Jefferson County, Idaho, on September 15, 1958; also in Book 55 of Water Deeds at page 309. A copy of this deed is attached hereto. The information for each such water right is listed as follows:

 Place of Use - The Southwest Quarter, the West Half of the Southeast Quarter, and the West Half of the Northeast Quarter, of Section 9, Township 6 North, Range 35 East, B.M.

(2) The Owsley Canal Company, Plaintiff, vs. Ernest Bauerle, et al, Defendants; dated October 14, 1940; in the District Court of the Ninth Judicial District of the State of Idaho, In and For Jefferson County. These rights were conveyed to applicant by instrument entitled "Water Deed", dated December 20, 1956, recorded as Instrument No. 120684, in the records of Jefferson County, Idaho on December 11, 1959; also in Book 81 of Water Deeds, at Page 56. A copy of this deed is attached. By this deed, Independent Water Users of Mud Lake, Inc., conveyed to applicant:

"An undivided one-third (1/3) in and to all of the water and water rights and diversion works of every kind, nature and description owned by said First Party, or in which First Party has any interest and particularly, but not limited thereto, an undivided one-third (1/3) interest in and to the water rights evidenced by Idaho Water License No. 17690 and Idaho Water Permit No. 17763."

The Bauerle Decree recites that Independent Water Users of Mud Lake, Inc., is the owner of this license and permit and appears to confirm or decree the rights represented in both the license and the permit. Subsequently the Permit, No. 17763/31-2254 was canceled for failure to submit proof of beneficial use. However, water has been diverted and applied to beneficial use each year in reliance on this right and the applicant has always relied on the decree as evidence of the rights, rather than the license or permit. We are attaching a copy of a letter from Mr. Bobby D. Fleenor of the Department to Don Shenton, dated June 4, 1974, explaining that the permit was canceled because after the entry of the Decree there was no longer any need to prove up on the permit, and the filing was unnecessary. The rights under this decree are described as follows:

(a) Right No. - 31-0336 (License No. 17690/31-2253)
 Decreed to - Independent Water Users of Mud Lake, Inc.
 Source - Ground Water
 Priority Date - April 27, 1932
 Water Used For - Irrigation
 Amount - Decree says 32.50 cubic feet per second, but combined with Right No. 31-0337 "an amount not exceeding in the aggregate the equivalent of 91.8 cubic feet per second, flowing continuously during the irrigation season from May 1 to November 1 of each year."

All of the above described Licensed Rights were deeded to the Jackett Canal Company shortly after its organization in 1956. copies of all of the deeds are attached.

C. DESCRIPTION OF RIGHT OR PORTION THEREOF, AFTER THE REQUESTED CHANGE:

1. Change in point of diversion:

- a. Amount of water to be diverted - the combination of all of the above described rights of the Jackett Canal Company amounts to 75 cubic feet per second. The decreed rights from Camas Creek are pumped out of Camas Creek at the points of diversion described below, so long as water is available to fill these rights. The seven wells maintained by the company are used only to the extent necessary to supplement the creek rights. Usually, this requires an increased use of the wells as the season progresses. Although the wells are usually operated to some extent from the time the irrigation season begins, in a sense, the wells are used as supplemental to the decreed rights from the creek.

b. Points of diversion -

- (1) Southwest Quarter Southwest Quarter, Section 13,
Township 7 North, Range 35 E.B.M., Jefferson County.
- (2) Northwest Quarter Southeast Quarter, Section 22,
Township 7 North, Range 35 E.B.M., Jefferson County.
- (3) Northwest Quarter Southwest Quarter, Section 23,
Township 7 North, Range 35 E.B.M., Jefferson County.
- (4) Southwest Quarter Southwest Quarter, Section 23,
Township 7 North, Range 35 E.B.M., Jefferson County.
- (5) Northwest Quarter Northeast Quarter, Section 27,
Township 7 North, Range 35 E.B.M., Jefferson County.
- (6) Southwest Quarter Southwest Quarter, Section 33,
Township 7 North, Range 35 E.B.M., Jefferson County.

(7) Lot 4 (Northwest Quarter Northwest Quarter), Section 3,
Township 6 North, Range 35 E.B.M., Jefferson County.

- c. Description of diverting works - The Jackett Canal Company diverts both its decreed water rights from Camas Creek as well as the decreed and licensed rights from its seven wells at two locations on Camas Creek. The company maintains two pumps on Camas Creek in the Southwest Quarter of the Southwest Quarter of Section 33, Township 7 North, Range 35 E.B.M., and five pumps on Camas Creek in Lot 4 (Northwest Quarter Northwest Quarter), Section 3, Township 6 North, Range 35 E.B.M. The seven wells are located two to three miles north and east of the company's diversions from Camas Creek. Each of the wells discharges water into ditches which convey the well water into the Independent Ditch which empties into Camas Creek upstream from the two diversion points of the company. The Independent Ditch commences at a point in the Southwest Quarter of the Southwest Quarter of Section 13 where several wells are located at a point known as Buck Springs and flows in a generally southwest direction to the center of Section 27, Township 7 North, Range 35 E.B.M., and then directly south for approximately a mile where it discharges into Camas Creek in Section 34, Township 7 North, Range 35 E.B.M. In addition to assisting with the maintenance of the Independent Ditch and the small conveyances which discharge into the Independent Ditch, as well as the Jackett Canal system for distributing water to the lands of the stockholders south of Camas Creek, the company owns and maintains seven wells and fourteen pumps with electric motors ranging in size from 50 hp down to 20 hp.
- d. Describe the reasons for applying for a change in the points of diversion - The purpose of this entire application for

transfer is to conform the records of the department to the actual practice of the company which has been carried on since its organization in 1956. Some of the points of diversion as far as the actual records are concerned may be somewhat confusing because of the changes that were made at that time, as well as a result of the numerous deeds which the company received from individual stockholders as well as the Independent Water Users of Mud Lake, Inc. at the time of the organization. In fact, in reviewing the language of the deed from Independent Water Users of Mud Lake, Inc. to Jackett Canal Company in 1956, we observed that the deed purported to convey an undivided one-third interest in the wells and pumps and other diverting works, as well as the conveyance system and water right itself. There are actually five wells at Buck Springs, all located in the Southwest Quarter of the Southwest Quarter of Section 13, Township 7 North, Range 35 E.B.M. In actual practice, Jackett Canal Company has been treated as owning the two western most wells and Independent Water Users of Mud Lake, Inc. the three eastern most wells. In order to clarify this situation, the two companies have exchanged quit claim deeds on these wells, again to make the records conform to the actual practice. Copies of those deeds are enclosed with this application.

2. Change in place of use:

- a. Describe the lands or place of use to which the right will be transferred:

Total number of acres to be irrigated 3,107.23

- b. Draw a map indicating the new points of diversion and/or the new land to be irrigated. Show clearly the land involved by section, township, and range number. The attached map showing lands of the company irrigated by its stockholders colored in yellow with points of diversion and location of wells shown in blue.
3. Remarks - An attempt has been made by the applicant to identify the exact property of its stockholders upon which the company water is to be used, as well as the points of diversion. Essentially, the actual practice of the company has been as shown for a period of nearly 22 years. Recently, when the company began to review its water rights, it was discovered that although they were deeded to the company in 1956, no effort had been made to transfer the water rights so that an equal amount was appurtenant to each acre of ground within the system. Indeed, we discovered that the records would show that some land had several water rights appurtenant and some of the company land had no water rights appurtenant. It is the desire and intention of the company that all of the company's water rights be transferred to all of the company's lands so that each acre has an equal amount of each of the company's rights appurtenant to it since this is the way the company has actually operated.

This is to certify that I have examined Application for Transfer of Water Rights No. _____ and said application is hereby approved

1. Approval of said application is subject to the following limitations and conditions:
- (1) Any future transfer of any of these rights will cause the remaining rights to revert back to the original acreage.
 - (2) The intent of this transfer is to record water delivery practices that have existed since 1956 - no change in delivery patterns is authorized.
 - (3) Diversion of water authorized by this transfer shall not exceed 9321 acre feet per annum.
 - (4) Measuring devices and controlling works of a type approved by this Department must be permanently installed and maintained at the points of diversion from groundwater. The existing measuring methodology shall be maintained at the points of diversion/re-diversion from Camas Creek.
 - (5) Use of water under this transfer is subject to control by the watermaster of Water District No. 31, Mud Lake and tributaries.

Witness my hand this 23rd day of June, 1981.
