Comments:

<u>Author</u> bcontor	<u>Date</u> 12/1/00	<u>Subject</u> Transfer	<u>Comment</u>
bcontor	12/1/00	Transfer continued	This WR is split off of 31-2307 by change of ownership. 31-2307 overlapped 31-2408 by transfer 2281 on Permissible Place of Use basis, on part of claimants lands. Permit 31-7095 was obtained to cover the rest of claimants lands, but
bcontor	12/1/00	Transfer continued 2	on an adjacent (rather than overlapped PPU) basis. At time of licensing, it was decided to make all three rights a PPU, and an application to amend permit and a transfer app. were mailed to the claimant. The claimant did not return these, but nevertheless
bcontor	12/1/00	Transfer continued 3	license 31-07095 was issued on the entire POU, but with only the additional cfs needed to offset the earlier licenses. The consequence of this is that the PPU of transfer 2281, already at 0.02/acre, was overlain by part of 31-7095, giving that part
bcontor	12/1/00	Transfer continued 4	larger PPU a too-high diversion rate. Since the Q of 31-7095 had been diluted by all the acres of the PPU, those non-overlapped portions had a too-low diversion rate. Subsequently, the property was split by a sale. The split, combined with the
bcontor	12/1/00	Transfer continued 5	failure to file the transfer and amended permit, was that one of the claimants received proportionate shares of the three rights summing to more cfs than could be recommended on the number of acres, and the other receiving fewer cfs
bcontor	12/1/00	Transfer continued 6	than required to operate the existing systems. Both owners came in to the office and agreed that the intent of the sale was to divide all cfs and all priority dates proportionately. The original owner asserted that he had intended to file the
bcontor	12/1/00	Transfer continued 7	transfer and application for amendment, and in fact believed that he had. Upon further investigation, he discovered the documents at home and forwarded them to IDWR. The unsigned transfer application is filed in A31-2307, and the
bcontor	12/1/00	Transfer continued 8	application for amendment (signed and dated) has been forwarded to the vault to be included in the WR file 31-7095. Based on the above, the purchaser filed transfer 5833 and the original owner (who retained part of the property)
bcontor	12/1/00	Transfer continued 9	filed transfer 5834. The intent of these transfers is identical to the intent of the license issued for 31-07095 and identical to the application for transfer prepared at that time by IDWR but never filed by the owner. Due to the imbalance of diversion rates per acres and the express intent of both parties, as evidenced by their statements to me in the office and their transfer applications, and due to the looming deadline and the likelihood that
bcontor	12/1/00	Transfer continued 10	the new database will delay approval and issuance of these transfers, I am recommending these claims as if the transfers had already taken place. See paper file 31-2307A and paper file A31-02307.
bcontor	12/1/00	Documentation	This recommendation is too complex to review via eCVR, see documentation in files. Recommended per transfer applications, as transfer was prepared specifically with desired AJ recommendation in mind.
bcontor	12/1/00	eCVR	Combine limits come both from PPU status of 31-2307 and 31-2408 by T 2281 and from PPU status with newer license 31-7095, as well as from overlap with SW rights 31-262 and 31-267.
bcontor	12/1/00	Combined use limits	Not coded, as recommendation assumes transfer will be approved.
bcontor	12/1/00	C03 and C05

Re: Office visit with Scott Clawson and Perry Woodard

Mr. Woodard and Mr. Clawson agreed that the intent of the development under license 31-07040, and the subsequent sale of part of the lands to Clawson's employer Cornelison-Olsen Partnership, was that all three rights be appurtenant to all the lands on a permissible place of use basis, and authorized for diversion from all the points of diversion. Mr. Woodard was surprised that the transfer on 31-02307 and 31-02408 had not gone through; he was under the impression that it had. He will look through his files for the copy of the transfer referenced in the April 1994 letter.

They agreed to file a joint transfer which will correct this situation. I agreed to prepare the transfer, and notify them by mail when it is ready.

Prior to preparing the transfer, I plan to correct the split of ownership per the deed and sale contract.

Mr. Woodard also had questions about two Rays Lake decreed rights he has on his portion of the POU. These questions will not affect this transfer, however.

 A31-02408A
 A31-02408B
 A31-07095A
 A31-07095B

Dear Water Users:

It appears from the records that you are the owners of the Adjudication Claims above, which arise from the original water rights of the Woodard Farms Limited Partnership lands in 7N 36E sections 31 and 32, in Jefferson County.

The original claim A31-07095 was filed based on a permit, for 405 acres. Since that time, a licensing examination has been performed and a license issued. The license was issued for 405 acres of irrigation within a 595.5 acre Permissible Place of Use. The intent of the licensing examiner was that this new license would be used in conjunction with original licenses 31-02307 and 31-02408 on the entire farm, four 1/4 mile center pivots and one mini pivot in the center of the farm. In fact, in 1994 the original owner received a letter from Idaho Department of Water Resources which stated:

"In order to properly reflect the irrigation system found in use, the descriptions on the two existing water licenses must also be changed. An Application for Transfer of the two older licenses has also been prepared and enclosed. By filing the transfer application, the rights will reflect the four wells and the entire land base irrigated from the wells."

This transfer was never filed.

Last year, the original adjudication claims A31-07095, A31-02307, A31-02408 were split by a Change of Ownership. Our records show Perry L. Woodard as the current owner of the "A" portions and Cornelison-Olsen Partnership as the current owner of the "B" portions of these claims.

While investigating these claims, I've come across some discrepancies which need to be corrected in order for me to make an accurate recommendation to the Snake River Adjudication Court. These are:

- 1) The split of the original claims needs to be adjusted to reflect the licensing information on 31-07095.
- 2) The split needs to be adjusted to reflect the mini-pivot that was retained by Perry Woodard.

- 3) Because the transfer contemplated by the licensing examiner was never filed, I cannot recommend an appropriate number of acres for the portion of the farm purchased by Cornelison-Olsen.
- 4) Because the transfer wasn't filed, I cannot recommend appropriate Points of Diversion for the splits of A31-02307 and A31-02408.

I will correct the first two items by adjusting the splits of the original claims. You will receive letters explaining this adjustment, and will have an opportunity to address concerns you may have with the new splits.

There are two possible approaches to correcting the last two items. One would be for Mr. Woodard and Cornelison-Olsen Partnership to jointly file the transfer that was originally contemplated when license 31-07095 was issued. This would give the best results but be the most difficult to accomplish, because of the need to coordinate with two different owners.

The other approach would be for Cornelison-Olsen Partnership to file an enlargement claim based upon A31-02307B and A31-02408B. This would allow me to recommend enough irrigated acres, and enough diversion rate, to authorize Cornelison-Olsen's current irrigation practices.

Following the issuing of Partial Decrees on these water rights, Mr. Woodard would need to file a formal transfer with the department to change the Point of Diversion and Place of Use of A31-02307A and A31-02408A. Cornelison-Olsen would need to file a formal transfer with the department to change the Point of Diversion and Place of Use of A31-02307B.

Please contact me at 525-7161 to set up an appointment to discuss these options, so that you may decide what you want to do. It will be easier to explain in person, when I can show you the maps and other documentation. I'd be glad to meet with Mr. Woodard and Cornelison-Olsen's representatives together, or separately, as suits you best.

Re: Transfer of 31-02307 and 31-02408, Permissible Place of Use

Cornelison-Olsen Partnership has purchased part of the original place of use of these water rights. Of the irrigated acres identified in license 31-07095, Woodard has 173.8 and Cornelison-Olsen has 421.7. WMD documents capacity of current systems as follows:

7N 36E 31 SESENE (Woodard)	1322 gpm	2.95 cfs
7N 36E 32 SWNESW (C-O)	963 gpm	2.15 cfs
7N 36E 32 NENENW (C-O)	802 gpm	1.79 cfs
7N 36E 31 SWNESE (C-O)	not measured	

Assuming 900 gpm (2.01 cfs) for the well not measured, Woodard's total capacity is 2.95 cfs and Cornelison's appears to be about 6.13cfs. Total capacity appears to be 9.08 cfs, just under the combined limitation of 9.81 cfs.,

The Adjudication Claims were split in 1999 by change of ownership, but this needs to be redone per a more careful reading of the legal description. Further, claim A31-07095 was initially based upon a permit and now needs to be amended in accordance with the license that was issued.

Also, it appears from the attached memos and letter from microfiche of 31-07095 that the post-1987 license was issued with the intent that a transfer be filed for the two older licenses, to combine all three into a permissible place of use, per attached GIS illustration #1. This transfer never occurred.

We are left to rely on transfer #2281, (1978), which assigned 31-02307 and 31-02408 to only part of the permissible place of use intended by the proposed transfer. The split of these rights is illustrated in attached GIS #2.

License 31-07095 imposed combined use limitations on these three rights. Splitting the two older licenses according to transfer #2281, and splitting 31-07095 and the limitations according to the permissible place of use of 31-07095, would result in the following:

<u>Item</u>	<u>Original</u>	<u>Woodard</u>	<u>Cornelison-Olsen</u>
31-02307/2408	206.0 acres	99.0 acres	107.0 acres
31-02307	1.82 cfs	0.87 cfs	0.95 cfs
31-02408	2.30 cfs	1.11 cfs	1.19 cfs
31-07095 PPU	595.5 acres	173.8 acres	421.7 acres
31-07095 limit	405.0 acres	118.2 acres	286.8 acres
31-07095	8.10 cfs	2.36 cfs	5.74 cfs
Cfs limit	9.81 cfs	2.86 cfs	6.95 cfs
Acre ft limit	2084.3 afa	608.3 afa	1476.0 afa

Considering the combined use limitations, this split leaves Cornelison-Olsen with authorization for 6.95 cfs vs. current capacity of about 6.13. However, Cornelison-Olsen has only $0.95 + 1.19 = 2.14$ cfs of the better-priority "older" rights, or about 0.005 cfs/acre.

Woodard is left with authorization for 2.86 cfs, vs. capacity of approximately 2.95. Of this, $0.87 + 1.11 = 1.98$ cfs is "older" rights, or about 0.011 cfs/acre.

Except for favoring Woodard with a better priority heirarchy, this split does allow adequate diversion rate for the current systems in place.

However, this split does not work on an acreage basis. While Cornelison-Olsen receives an adequate proportionate share of the Permissible Place of Use, the total of C-O's share of limitation acres and "older right" acres is only $286.8 + 107.0 = 393.8$ acres. This is not adequate.

If the transfer were filed to make this a permissible place of use, all of the rights would be split proportionally according to the split of the 595.5 acre permissible place of use. This would result in adequate acres and diversion rate for both parties, and an equal distribution of priority advantage:

Item	Original	Woodard	Cornelison-Olsen
31-02307/2408	206.0 acres	60.1 acres	145.9 acres
31-02307	1.82 cfs	0.53 cfs	1.29 cfs
31-02408	2.30 cfs	0.67 cfs	1.63 cfs
31-07095 PPU	595.5 acres	173.8 acres	421.7 acres
31-07095 limit	405.0 acres	118.2 acres	286.8 acres
31-07095	8.10 cfs	2.36 cfs	5.74 cfs
Cfs limit	9.81 cfs	2.86 cfs	6.95 cfs
Acre ft limit	2084.3 afa	608.3 afa	1476.0 afa

I had considered submitting a letter to both claimants explaining the need for a formal transfer. The claimants would need to act together on this because it will involve water rights appurtenant to both properties.

After conferring with Harold Jones regarding the time that would be involved and the potential difficulties of coordinating this with the two claimants, I have decided to approach Cornelison-Olsen partnership regarding an enlargement claim of their portion of the two older rights. This will give them adequate acres and adequate diversion rate to authorize current practice.

Subject: GCDB?

A deed I'm looking at contains the following in a metes and bounds description:

"Beginning at the Northeast corner of Section 31, Township 7 North, Range 36 E. B. M., thence S. $00^{\circ} 35' 21''$ E. for a distance of 2628.44 feet to the true point of beginning, said point also being the East Quarter Corner (1/4) of Section 31..."

When I COGO the above, the place I end up is about 25 - 30 meters west of the East Quarter Corner as shown on our project GCDB.

For now, I'm just starting at our East Quarter Corner and following the rest of the metes and bounds description...

RE: License Review

I initially reviewed this permit for licensing some time ago. The SRBA claims which were filed on the two existing licensed rights for this system (A31-02307 and A31-02408) were filed as supplemental to 31-07095. Steve Clelland worked on these claims and I have had several discussions with him and Eric Verner.

As I have outlined on the attached maps, the two licensed rights covered the majority of lands irrigated by two pivots (shown in yellow). Eric thought it was more appropriate to consolidate the rights and show the place of use as covering an entire 40-acre tract and some corners as entered by Steve (shown in green).

The place of use recommended by the examiner for the newer permit took into consideration the overlap with the other rights as they had been licensed. Thus, only new acres were recommended for licensing.

Subsequent discussions with Eric led to his statement that Eastern would be willing to follow the lead of the State Office in the recommendations in the SRBA after the licensing of this permit. The intention at that time was to issue the license for the new acres, which would then require the SRBA claims to be changed back to the way they were originally licensed. To break convention at that point would have resulted in further confusion.

I have again pulled the file to finish licensing review, this time with a new approach. It seems that the most appropriate way to handle the place of use issue is to list the entire land base irrigated under the system (595.5 acres) and then limit (by condition) the right to the irrigation of 405 acres (as originally permitted) in a single irrigation season.

At the same time, it is appropriate to solicit a transfer application for the two licensed rights so that all points of diversion and the entire land base can be listed on them as well.

RE: Water Right Nos. 31-02307, 31-02408 and 31-07095

Dear Mr. Woodard:

After a considerable amount of delay, Permit No. 31-07095 is in the final process of being licensed. During our review it was discovered that two older licenses, Nos. 31-02307 and 31-02408 are part of the same irrigation system. The irrigation system as inspected by our Departmental field examiner in 1989 (see attached map) is comprised of four wells serving four large pivots and one smaller pivot. The pivots cover a land base of nearly 600 acres. The older licenses cover 206 acres.

Before a license can be issued for Permit No. 31-07095, it must be amended to correspond with the findings of the field examiner, which are reflected on the attached map. The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the location of the points of diversion and place of use. The last page of the Application for Amendment contains a list of CONDITIONS/REMARKS proposed for the license when it is issued. These conditions/remarks may be modified upon further administrative review.

In order to properly reflect the irrigation system found in use, the descriptions on the two existing water licenses must also be changed. An Application for Transfer of the two older licenses has also been prepared and enclosed. By filing the transfer application, the rights will reflect the four wells and the entire land base irrigated from the wells. Both rights will still be individually limited to the number of acres originally licensed for each right.

Please review the enclosed applications and if you concur, sign the amendment and transfer and return with the filing fees (\$20.00 for the amendment and \$50.00 for the transfer) within 14 days.

RE: Typographical Error for Transfer No. 2281

On February 16, 1988, Ernest Carlsen of eastern region identified a typographical error under Part C of Transfer 2281. The description of the place of use after the requested change lists the township as T2N. Ernest Carlsen has met with William Woodard Jr., and is certain that the township should have been T7N instead of T2N.

Ernest's conclusions are supported by the description of the point of diversion and by the place of use prior to the transfer. The map drawn on the transfer also indicates that the lands are located in township 7N.

As a result, the place of use should be identified as being located in T7N in the data base, and the typographical error on the transfer corrected in the original file.

Re: POU, Ownership split

A number of issues arise with these three rights:

1. POU of claim vs. License. (31-07095)

The original claim was filed for 405 acres, per the original permit. However, the license was issued in 1995 for 595.5 acres on a permissible place of use basis with licenses 31-02307 and 31-02408, based on a post-1987 transfer and post-1987 license exam and amended permit.

I've asked Ernie Carlsen for guidance (see attached e-mail). Unless instructed otherwise, I plan to treat the post-1987 license as an amendment to the claim, much as we do with post-1987 transfers. Because the claim has been split by change of ownership, each of the splits will have to be amended per the map in the licensing examiner's file.

2. Acre limitation (31-07095)

The difference in acres came about due to the field examiner's finding of an overlap of 31-07095 with the other two licenses. The claimant was invited to submit a transfer for the existing licenses and apply for an amended permit 31-07095 to adjust the water rights to fit what the examiner found in the field.

It is clear from the licensing exam that this was intended to be licensed on a permissible-place-of-use basis, and one of the conditions on the amendment was a 405 acre limitation on the use of 31-07095. However, neither this limitation nor a 595.5 acre combined limitation with the other rights was carried forward to the license.

Because this is a permissible place of use, and because of the clear intent of the licensing exam and the amended permit approval, I plan to recommend the standard acreage limitation and combined use acreage limitations of a permissible place of use.

3. Transfer limitations (31-02307 and 31-02408)

I have not examined the transfer that applied to 31-02307 and 31-02408. However, based on the above, I will recommend individual and combined use limitations to these rights consistent with what I recommend for 31-07095 splits.

4. Error in split (all)

The claims were split by change of ownership in March of 1999. It appears from the deed that parts of the NESE of section 31, the NWSW of section 32, and the SWSW of section 32 were retained by the seller. This is a mini-pivot in the center of the four original pivots. This interpretation matches the field map of the purchaser, found in A31-07095B and submitted with the Notice of Change of ownership.

However, our split of the water rights assumed the entirety of each quarter-quarter was conveyed to the new owner.

Per the attached e-mail, I plan to correct the splits and notify the owners.

5. GCDB discrepancy

The shapes were drawn by COGO in ArcView from the metes and bounds description in the deed, but the apparent location of the East Quarter Corner of Section 31 per the surveyor does not match the location of our GCDB. No matter how the shapes drawn on the ArcView project come out, the intent is to match the deed.

Thank you.

I was planning to include the KO6 and E14. Those limitations are referred to in the licensing exam and even on the amended permit, but curiously they didn't make it all the way to the license.

Good Morning,

A license issued subsequent to the filing of an SRBA claim, based on permit, is recognized as an amendment to the claim without having to initiate an amendment by the claimant. In the case cited below be sure to include a POU1 KO6 and E14 if appropriate.

Claim A31-07095 was claimed for the permitted 405 acres. License 31-07095 was issued in 1995 on a permissible place of use basis with 31-02408 and 31-02307 on 595.5 acres.

Can I take the post-1987 license as an amended the claim, as if it were a transfer, or do I need to send out an amended claim?

The right has subsequently been split by change of ownership, so there would actually be two amended claims.

Thanks, Bryce

The plot thickens.

From the deed, it looks like the original owners retained a mini pivot that involves a small corner of each of three of the quarter-quarters that were sold. In doing the change of ownership, we changed the entirety of each of these quarter-quarters to the new owner.

I'm guessing I should re-do the split per the deed, and send notice to the owners? If the license does constitute an amended claim, also make those changes before sending notice?

Thanks, Bryce

RE: CHANGE IN OWNERSHIP FOR A31-02307, A31-02408,
A31-07095

Dear Mr. Woodard:

The request for Change in Ownership for a portion of the above-referenced Notice(s) of Claim has been processed with the new Notice(s) reflecting you as one of the claimants.

Since the Change in Ownership involved just a portion of the Notice(s) of Claim, the right was split as follows:

A31-02307A, 0.52 cfs on 44 acres, Woodard
A31-02307B, 1.30 cfs on 162 acres, Cornelison-Olsen

A31-02408A, 0.680 cfs on 44 acres, Woodard
A31-02408B, 1.620 cfs on 162 acres, Cornelison-Olsen

A31-07095A, 2.56 cfs on 128 acres, Woodard
A31-07095B, 5.54 cfs on 277 acres, Cornelison-Olsen

Enclosed for your records is a typed Notice(s) reflecting your portion of the right. Review the Notice(s) and if you have other corrections or questions, please contact this office.

Respectfully submitted,

c. Value. The value of the property received by Perry Woodard is \$235,600.00.

2. Davis, Kreutzer and Jim Woodard shall take the following described real property in equal shares:

a. Real Property. The real property is described as follows:

TRACT I:

A parcel of land situated in Jefferson County, State of Idaho, Township 7 North, Range 36 East of the Boise Meridian, Section 32 more particularly described as follows: The West Half (W 1/2) of Section 32, Township 7 North, Range 36 E.B.M.

EXCEPTING: Beginning at the North Quarter corner (N 1/4) of Section 32, Township 7 North, Range 36 E.B.M., said point being the true point of beginning, thence S 00°53'05" E. for a distance of 248.00 feet; thence S. 89°56' 29" W. for a distance of 55.00 feet; thence N. 00°53'05" W. for a distance of 30.00 feet; thence S. 89°56'29" W. for a distance of 145.00 feet; thence N. 00°53'05" W. for a distance of 218.00 feet; thence N. 89°56'29" E. for a distance of 200.00 feet to the true point of beginning.

EXCEPTING: Beginning at the Northwest corner of Section 32, Township 7 North, Range 36 E.B.M., thence S. 00°35'21" E. for a distance of 1913.16 feet to the true point of beginning, thence N. 44°37'16" E. for a distance of 62.58 feet; thence S. 45°35'21" E. for a distance of 1074.00 feet; thence S. 44°24'39" W. for a distance of 1074 feet; thence N. 45°35'21" W. for a distance of 62.81 feet; thence N. 00°35'21" W. for a distance of 1430.37 feet; to the true point of beginning.

TRACT II:

A parcel of land situated in Jefferson County, State of Idaho, Township 7 North, Range 36 East of the Boise Meridian, Section 31 more particularly described as follows: The Southeast Quarter (SE1/4) of Section 31, Township 7 North, Range 36 E.B.M.

EXCEPTING: Beginning at the Northeast corner of Section 31, Township 7 North, Range 36 E.B.M., thence S. 00°35'21" E. for a distance of 2628.44 feet to the true point of beginning, said point also being the East Quarter corner (1/4) of Section 31, Township 7 North, Range 36 E.B.M., thence S. 00°35'21" E. for a distance of 715.09 feet; thence N. 45°35'21" W. for a distance of 1015.14 feet; thence N. 89°37'40" E. for a distance of 717.81 feet to the true point of beginning.

b. Personal Property. The personal property is described as follows:

Three (3) Gifford Hill center pivot sprinkler systems, including pump, panel, motor and all related equipment. Said sprinkler equipment includes the following pumps:

1. U.S. 60 HP
R6234-04938R2118557

2. U.S. 75 HP
RC326-05-166 R328-7254

3. US 60 HP
R 6234-04-938

c. Property. The value of the property received by Davis, Kreutzer and Jim Woodard is \$602,950.00.

3. There is presently indebtedness against the property of \$187,000.00. In order to adjust the price differential on the property received by Perry Woodard, Perry Woodard shall be responsible for \$54,550.00 of said indebtedness which will be paid to Farm Credit Services. This amount is \$7,800.00 more than his share of indebtedness. Davis, Kreutzer and Jim Woodard shall be responsible for the remaining indebtedness and shall cause the financial institutions to release the mortgages against the property described in paragraph 1 above with respect to said indebtedness.

4. The Partnership shall retain Perry Woodard's share of the 1993 earnings, which are valued at approximately \$18,526.00.

5. The parties to this Agreement recognize that execution of this Agreement constitutes termination of the above-referenced partnership. Each party to this Agreement hereby releases the other of all right, claims, and causes of action arising out of or in any way related to the ownership of the above-described property, the sale of the above-described property, the formation, operation and dissolution of the above-referenced partnership, except as specifically set forth herein.

a. Davis, Kreutzer and Jim Woodard shall pay the costs of sale, except for the cost of the survey.

b. The cost of the survey shall be paid by Perry Woodard.

c. Perry Woodard acknowledges that receipt of the property hereunder constitutes a full and final settlement with respect to said partnership.

5. Each partner hereby agrees to indemnify and hold harmless each other partner of all partnership indebtedness except as specifically identified herein. As of the date of this Agreement, the only partnership indebtedness relates to the expenses of sale, and said indebtedness shall be paid by the existing partnership. All other partnership obligations shall be the responsibility of the partner who incurred said obligation and said partner hereby indemnifies and agrees to hold harmless the other partners with respect to such indebtedness.

DATED this 10th day of May, 1994.
