To whom it may concern:

We have also used this well to pump water down a ditch to irrigate the NW corner of circle described in Chain 31-3392 as well as irrigating a line of trees across the road (north) from the circle. This same water source has also been used traditionally to water stock cows (up to 500 pairs), also in the same area, the NW corner of the circle, the circle, and in the area around where the line of trees are.

Re: Irrigation of NW corner

Sandra Savage Andersen was in today and told me that the NW corner of the POU was always irrigated by ditch from the well south of the house in section 27, and that this irrigation also provided water for some trees along the ditch north of the county road.

This agrees with what I have observed over the last three years as I have driven past the POU with Water Measurement District exams and measurements.

The amended claim adds this POD as an accomplished change and my inspection supports recommending this change.

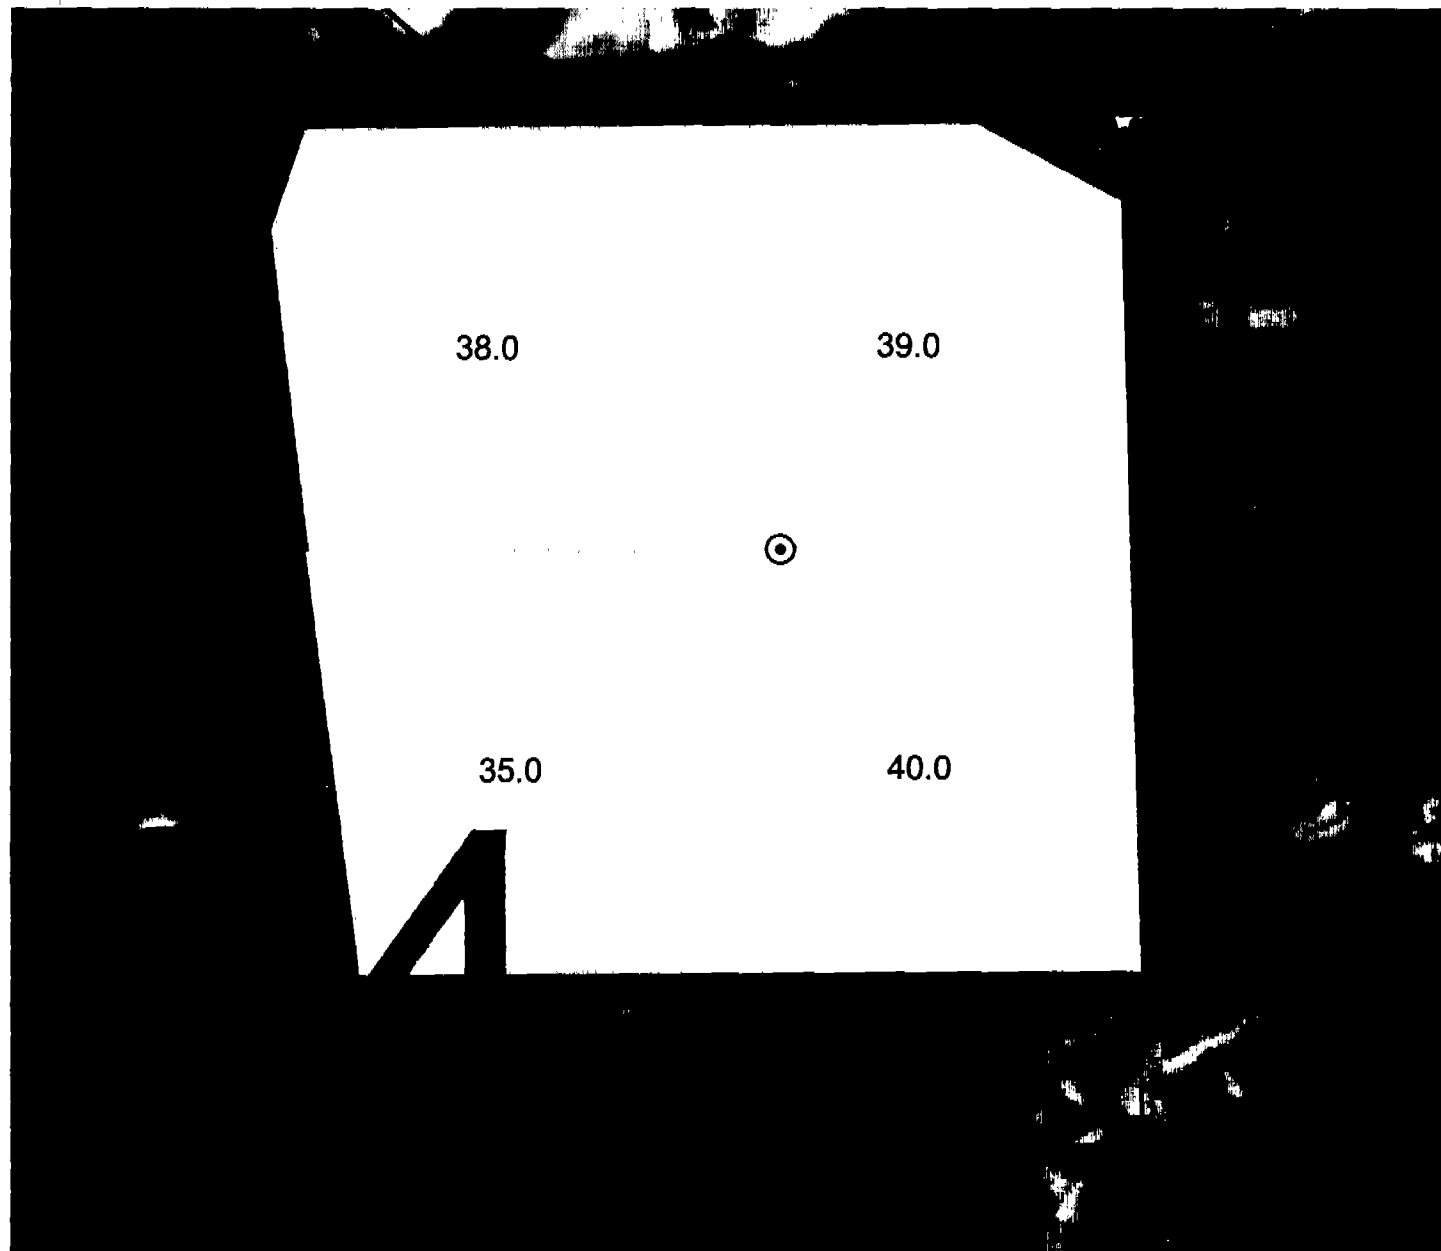

Note that Ms. Andersen's affidavit ^{on yellow paper} does not give dates but in conversation she told me the practice dated from at least the early 1960's when she was a child, through the 1990's.
