MEMORANDUM

To: A31-2473
Fr: Bryce Contor
Date: 1/17/01

Re: Diversion Rate

When Owenses came in to file this claim we discussed the fact that the licensed rate is less than current capacity.

Owenses' realtor Reed Nord contacted me several times. He indicated that a Mr. Beam, who operated the farm for a time, was prepared to sign an affidavit that the larger motor and greater capacity were in place prior to 1963, to support a beneficial use claim for additional 2.

Mrs. Owens contacted me once and I explained the above to her, telling her it was her responsibility to get the documentation and file a claim. I had also explained this responsibility to Mr. Nord.

Mr. Nord also had indicated that Tomlinson operated the farm for a time. I visited

Div. rate p 2

with Albert Tomlinson ^{in person} and he says the larger motor was installed by Buntenshaws, sometime before 1968. Tomlinsons began operating the farm about 1968 and the capacity at that time was at least 200-250 mins inches. Albert said he wished he could verify that the ^{larger} motor has been on since before 1963 but he couldn't for sure.

I've had no contact from Owensses since well before Christmas.

Re: Diversion Rate

North Water Measurement District data indicate that this is a 200 hp open discharge pump with approximate pumping lift of 200 feet. Assuming 60% pumping plant efficiency, this calculates to about 2,400 gallons per minute, or 5.3 cfs.

$$\text{GPM} = (\text{Water HP}) \times (3960) / (\text{TDH})$$

$$2400 = (200 \times .60) \times (3960) / 200 \approx 5.3 \text{ cfs}$$

We do not have the microfiche on file, but it is possible that the license exam may indicate original capacity higher than originally licensed and permitted, if, for instance, the permit was for less.

The claimants have just purchased this farm, but they plan to contact the neighbors and the pump supplier to learn if the 200 horsepower motor was in place prior to 1963.

If so, they plan to file a beneficial use claim for the additional diversion rate. The license was issued for 320 acres, and approximately 310 acres are currently farmed.

10/25/00

Richard Hansen called from Vault. Original exam shows 3.82 cfs @ 150 hp. Current motor is 200 hp

$$\frac{3.82}{150} \times 200 \approx 5.1 \text{ cfs}$$

This agrees closely w/ analysis above

Subject: late claim 31-2473

I just received this claim, which is in part of B31 investigated by the SO.

License is for 3.82 cfs on 320 acres, current capacity is approx. 5.3 per Water Meas. District.

If claimants can document pre-1963 development of current capacity (and I think they may; they live next to a fellow who was there in 1963 and has an avid interest in wells and water rights), they will file a beneficial use claim for the extra Q.

I'll holler at you if they do.
