Re: Change of Contact Representative

Dear Ms. Vandermeulen:

This letter is to let you know of the change we are making regarding our contact representative for Larsen Farms and the water rights. Please change our contact representatives from David Jensen and Jason Freckleton to Steve Vadnais and Tina Bradley. This will include all water rights pertaining to Blaine Larsen and Larsen Farms.

If you have any questions, please feel free to call me at 662-5501.

Thank you for your time.

Sincerely,

Blaine Larsen
President, Larsen Farms

Subject: Guidance on "surface first" remark

31-7034AF has a condition imposed by post-'87 license "The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater...." This condition was preserved in a later transfer.

Current recommendation retains the condition, but the condition makes no sense as the surface rights to the same POU will not be recommended.

Latest in my file is 12/12/2000 e-mail from Glen Saxton:

"...the condition really does not mean anything and has no purpose. Whether the condition should be deleted [depends] on direction from within your bureau. I do not wish to issue amended transfers or licenses..."

Do I leave it in the recommendation, or purge it?

From: Saxton, Glen

Subject: RE: "Surface Water First" condition on 31-07034AF.

Bryce,

Good morning. Many times the use of the condition requiring use of the full allotment of surface water is generic in nature and may not apply to specific transfers or water rights. If there are no overlapping surface water rights and there has not been any overlapping rights which have been discontinued resulting in an enlargement in use, the condition really does not mean anything and has no purpose. Whether the condition should be deleted or not in your recommendation will depend on direction from within your bureau.

I do not wish to issue amended transfers or licenses to remove the condition, however, in order to allow the adjudication bureau to eliminate the condition from its recommendations.
lgs

Cc: Carlsen, Ernie; McHugh, Candice; Saxton, Craig
Subject: "Surface Water First" condition on 31-07034AF.

WR 31-7034AF contains the condition "The right holder shall use the full allotment of appurtenant surface water rights, to the extent they are available, in conjunction with groundwater diverted pursuant to this right."

31-7034AF is the unchanged portion of 31-07034Q following transfer 5018 (1997). The condition was part of the original license 31-07034Q, issued in 1995.

From the microfiche it does not appear that the licensing examiner identified a specific surface water right overlapping this particular POU. Field inspection and review of aerial photos back to 1980 does not show any irrigation of these lands from surface sources since 1980, though irrigation may have occurred earlier than that.

Despite the finding that the lands have not been recently irrigated from surface sources, my first decision was to include the overlap condition, as it was part of a post-1987 license.

Water right 31-2040 is the only overlap listed on the WR database, and the only overlapping AJ claim. However, 31-2040 will be recommended for disallowal, on the basis that it was not recognized by the Suave Decree, though its owner was a party to Suave. Other surface rights in the vicinity have either been transferred to a new POU (31-49, 31-50, 31-51, T4646, 1997) or will be recommended for disallowal based on forfeiture (31-247, 31-248).

After realizing that no surface right will be recommended for this POU, I wondered if I should change the remark. Ernie suggested I ask your guidance, since this is a post-1987 license.
Do I:

1. Leave the condition intact in the recommendation, even though no overlapping surface rights will be recommended?
2. Remove the condition from the recommendation, as it no longer has meaning?

3. Amending 31-7034AF in some way, on the interpretation that there has been a failure to adhere to a licensing condition?

Right now, the elements of 31-07034AF are recommended per the transfer, with the remark intact. Please let me know if you think I should change this.

WATER RIGHT LICENSE

WATER RIGHT NO. 31-07034Q

Priority: May 11, 1970 Maximum Diversion Rate: 1.98 CFS

This is to certify, that BLAINE LARSEN
CONNIE LARSEN

PO BOX 188
HAMER ID 83425
has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated March 12, 1970; and
has submitted Proof of Beneficial Use on July 30, 1980. An examination indicates
that the works have a diversion capacity of 2.260 cfs of water from a GROUNDWATER
source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/15 to 10/15	1.98 CFS	

LOCATION OF POINT(S) OF DIVERSION: SWNE , Sec. 15, Township 08N, Range 36E
SENE , Sec. 15, Township 08N, Range 36E
JEFFERSON County

PLACE OF USE: IRRIGATION

<u>TWN RGE SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
08N 36E 15	NENE 26	NWNE 22	SWNE 37	
	SENE 39	NESE 5	NWSE 5	134

Total number of acres irrigated: 134

CONDITIONS/REMARKS:

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. The right holder shall use the full allotment of appurtenant surface water rights, to the extent they are available, in conjunction with groundwater diverted pursuant to this right.
5. This right to divert groundwater shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor exceed a combined annual diversion volume of 469.0 af for the lands above.
7. Single point of diversion located on or near line between SWNE and SENE, S15, T08N, R36E.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, R. Keith Higginson, of the Department of Water Resources hereby approve the
above Application for Amendment for Permit No. 31-07034Q with the following;

CONDITIONS/REMARKS:

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. The right holder shall use the full allotment of appurtenant surface water rights, to the extent they are available, in conjunction with groundwater diverted pursuant to this right.
5. This right to divert groundwater shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor exceed a combined annual diversion volume of 469.0 af for the lands above.
7. Single point of diversion located on or near line between SWNE and SENE, S15, T08N, R36E.

Witness my hand this 15th day of FEBRUARY, 1995.

Cc: Carlsen, Ernie; Saxton, Craig
Subject: RE: A31-07034AF; A31-02040

I could contact the watermaster to see if water was avail for the priority of the surface right (1909). Probably was in '98, as they were pumping water onto the desert at Mud Lake and diverting to the desert at Lone Tree.

I guess my take is, whether surf. water was avail. or not, it was NOT possible for him to irrigate with it since he had no diversion works in place. Therefore he has violated the terms of the transfer. But that's allocation's call, not mine.

Since 2040 is a relatively late priority (1909) from Camas Creek, and since it wasn't licensed until 1979 (!?), I suppose we could recommend it without really causing anyone injury. And there is still the objection period for neighbors to assert forfeiture. So I could go ahead with a recommendation rather than spend more time.

The '80 and '87 NAPP both indicate no use of surface water, and there's no evidence of use since then. I did drive by on my way home from work, once, so the file now contains photo evidence of (apparently recent) destruction of what remained of historic diversion works. If this ever goes to a transfer we probably ought to open up Pandora's box of forfeiture then.

I'm forwarding a copy to Craig Saxton because the diversion works appear to also have been used for a claim he's reviewing (31-00049). I had told Ernie this one was going to be a forfeiture case, too, but today Craig and I looked at the 1980 NAPP and there appears to have been use, then.

Subject: RE: A31-07034AF; A31-02040

Bryce --

Is there any evidence that there was water available for the surface water right? I am very hesitant to find forfeiture on the surface water right if it is possible to irrigate with it. Also, do we know whether the surface water was available when he was pumping the groundwater so that he could meet the transfer conditions?

Subject: A31-07034AF; A31-02040

Ernie, you and I exchanged brief e-mail about this with Carter back in

February. Carter wanted a decision from "higher up" then.

A31-07034AF is a GW claim based on post-87 formal transfer 5018. A31-02040 is based on a licensed SW right, partly overlapping the same POU, and claimed as licensed. (Licensed in 1911, priority 1909).

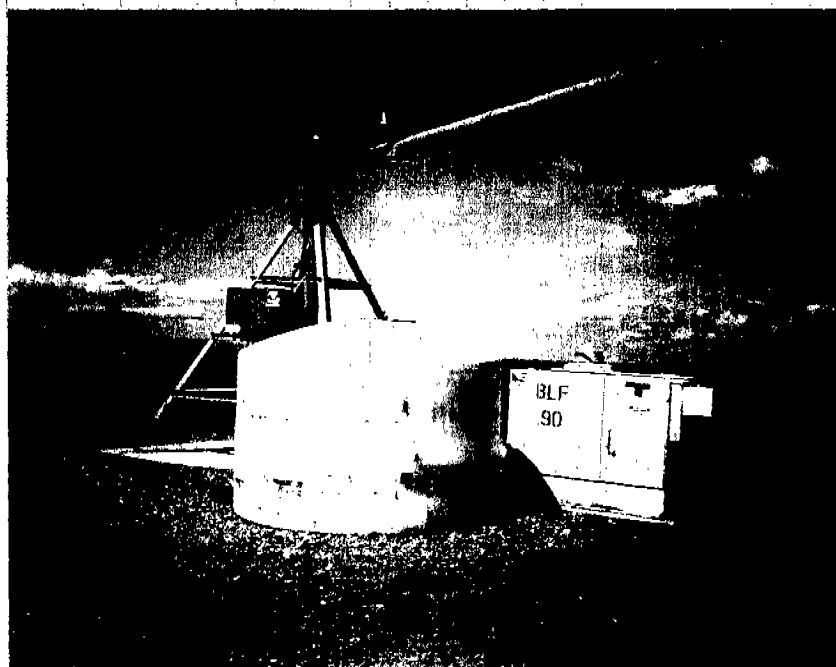

The transfer imposes conditions 065 and 079 (SW used first, GW cannot be transferred w/o SW) on 31-07034AF. However, the NWMD exams show no diversion works in place to apply SW to the POU. The 1998 WD31 records show no deliveries to Larsen, but I don't know if a 1909 right would even have been deliverable.

A very liberal interpretation of the 1980 NAPP photos might show irrigation of the POU then, but except for the pivots irrigated by GW, there is no irrigation present in the 1987 NAPP.

My inclination is to recommend the GW right as transferred, including the conditions. The fact that he appears not to be abiding by these conditions might become an issue for allocations later on but I'm thinking shouldn't change our recommendation.

On the surface right, I don't know whether to proceed with a recommendation based on the 1980 NAPP, or spend some time looking for a 1982 photo to see if the non-use appearing in the 1987 NAPP had lasted for a 5-year period.

Advice please?

Re: Field Inspection

Today I inspected pivot 87 (A31-07034AF) and pivot 90 to see if either were equipped to deliver water from Camas Creek. They were not.

Pivot 87 partly overlaps the POU of A31-02040, and WR 31-07034AF has conditions relating to the use of surface water on the overlapped POU.

I also drove along the east bank of Camas Creek through the entire length of sections 10 and 15 of 8N 36E, looking for surface diversions. Except for about 300 feet in NESE of 15, I either walked or saw from the car virtually all of the length of both east and west streambanks.

There were no remnants of diversion works in section 10 or 15, though there was a remnant of a diversion in the SE 1/4 of section 3, as marked on the map. It could have served the claimed lands lying east of Camas Creek. The ditch was filled in immediately downstream of the diversion, then reappeared intermittently for

» «

Contracted
The section 3 diversion had a 4' rectangular flume,
indicating it was designed for possibly 1 to 12 cfs.

about $\frac{1}{4}$ of a mile. Note that Camas Creek appears to have been altered and channelized, and appears to be $\frac{1}{4}$ mile or so west of where it was sketched on the 1911 field exam.

I also found an unused well south and across Camas Creek west of this diversion. The well is marked "8N 36E 03 dcd 1," which is the USGS designation for 8N 36E 03 SE ~~SE~~ SE. There is a set of concrete checks near the well, which possibly could have been used on a ditch that transported surface water as well as ground water. There is no visible remnant of the dam sketched on the 1911 field exam, but this well is far enough south in section 3 that it could be at about the same location.

Extending south about $\frac{1}{4}$ - $\frac{3}{8}$ mile from the well is a deep trench that could possibly be an old ditch, or possibly a relic of the channelization work. It is too straight and narrow to be an original channel of the creek.

West of the current Camas Creek, in what appears to be NWSE of section 10, is a private runway, probably for Larsen's ag spray planes. This appears to be part of the original POU for 31-02040.

I did not see any evidence or remnants of surface irrigation, or irrigation from Camas Creek, except the

5/18/00 inspection p3

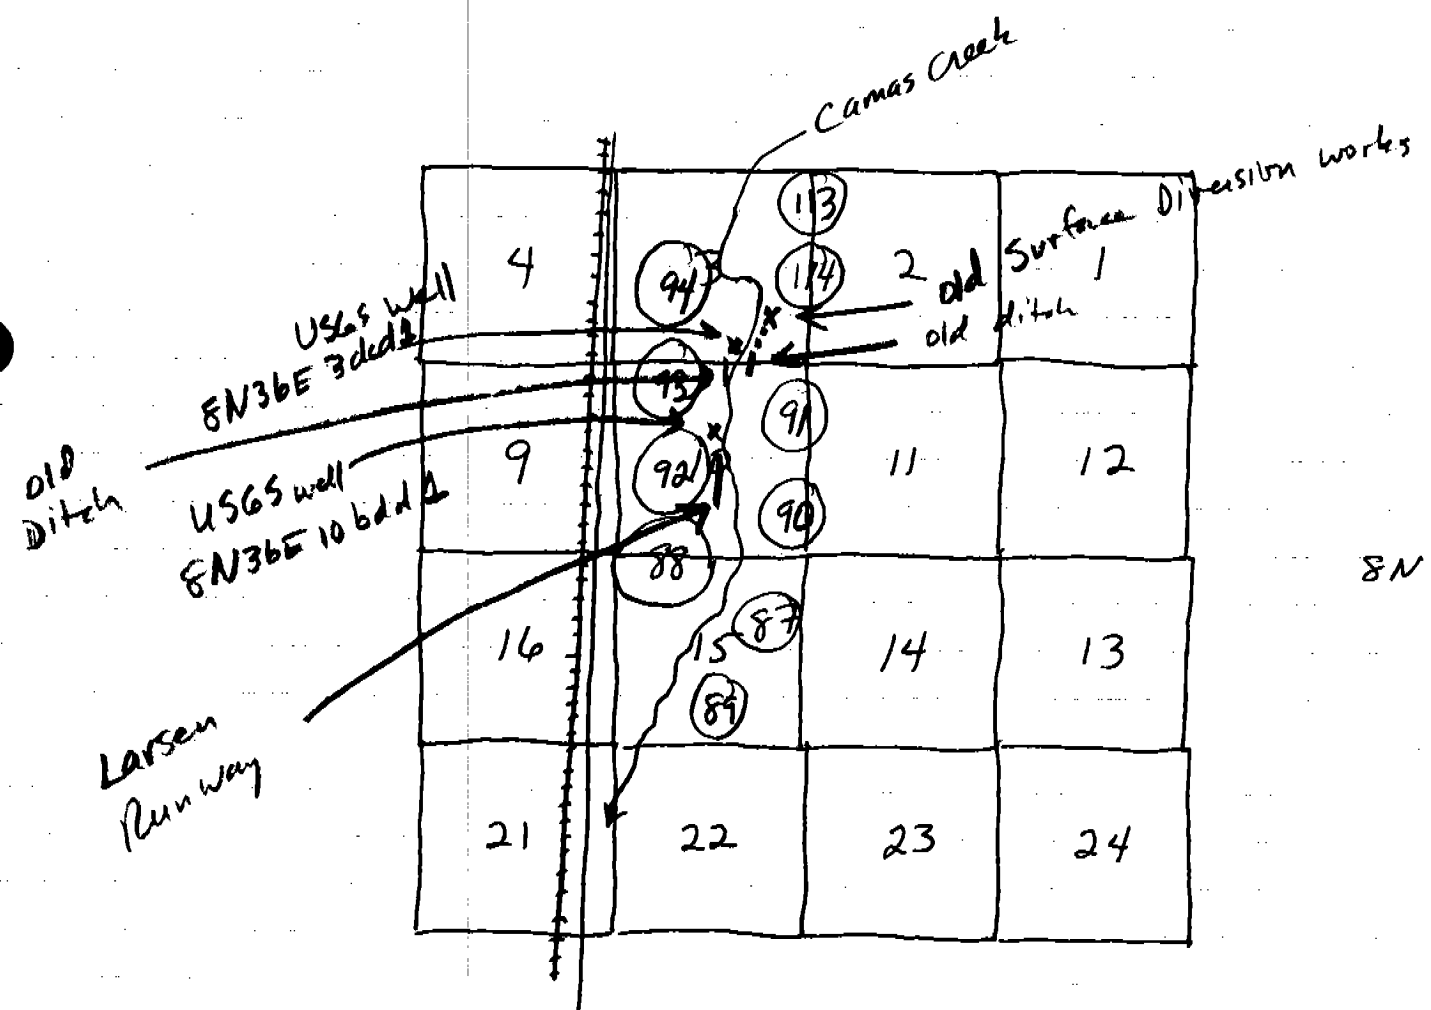

diversion in section 3. The channel of the creek had been excavated there to the point that ^{the diversion} it would no longer supply water except very early in the season, with very high water.

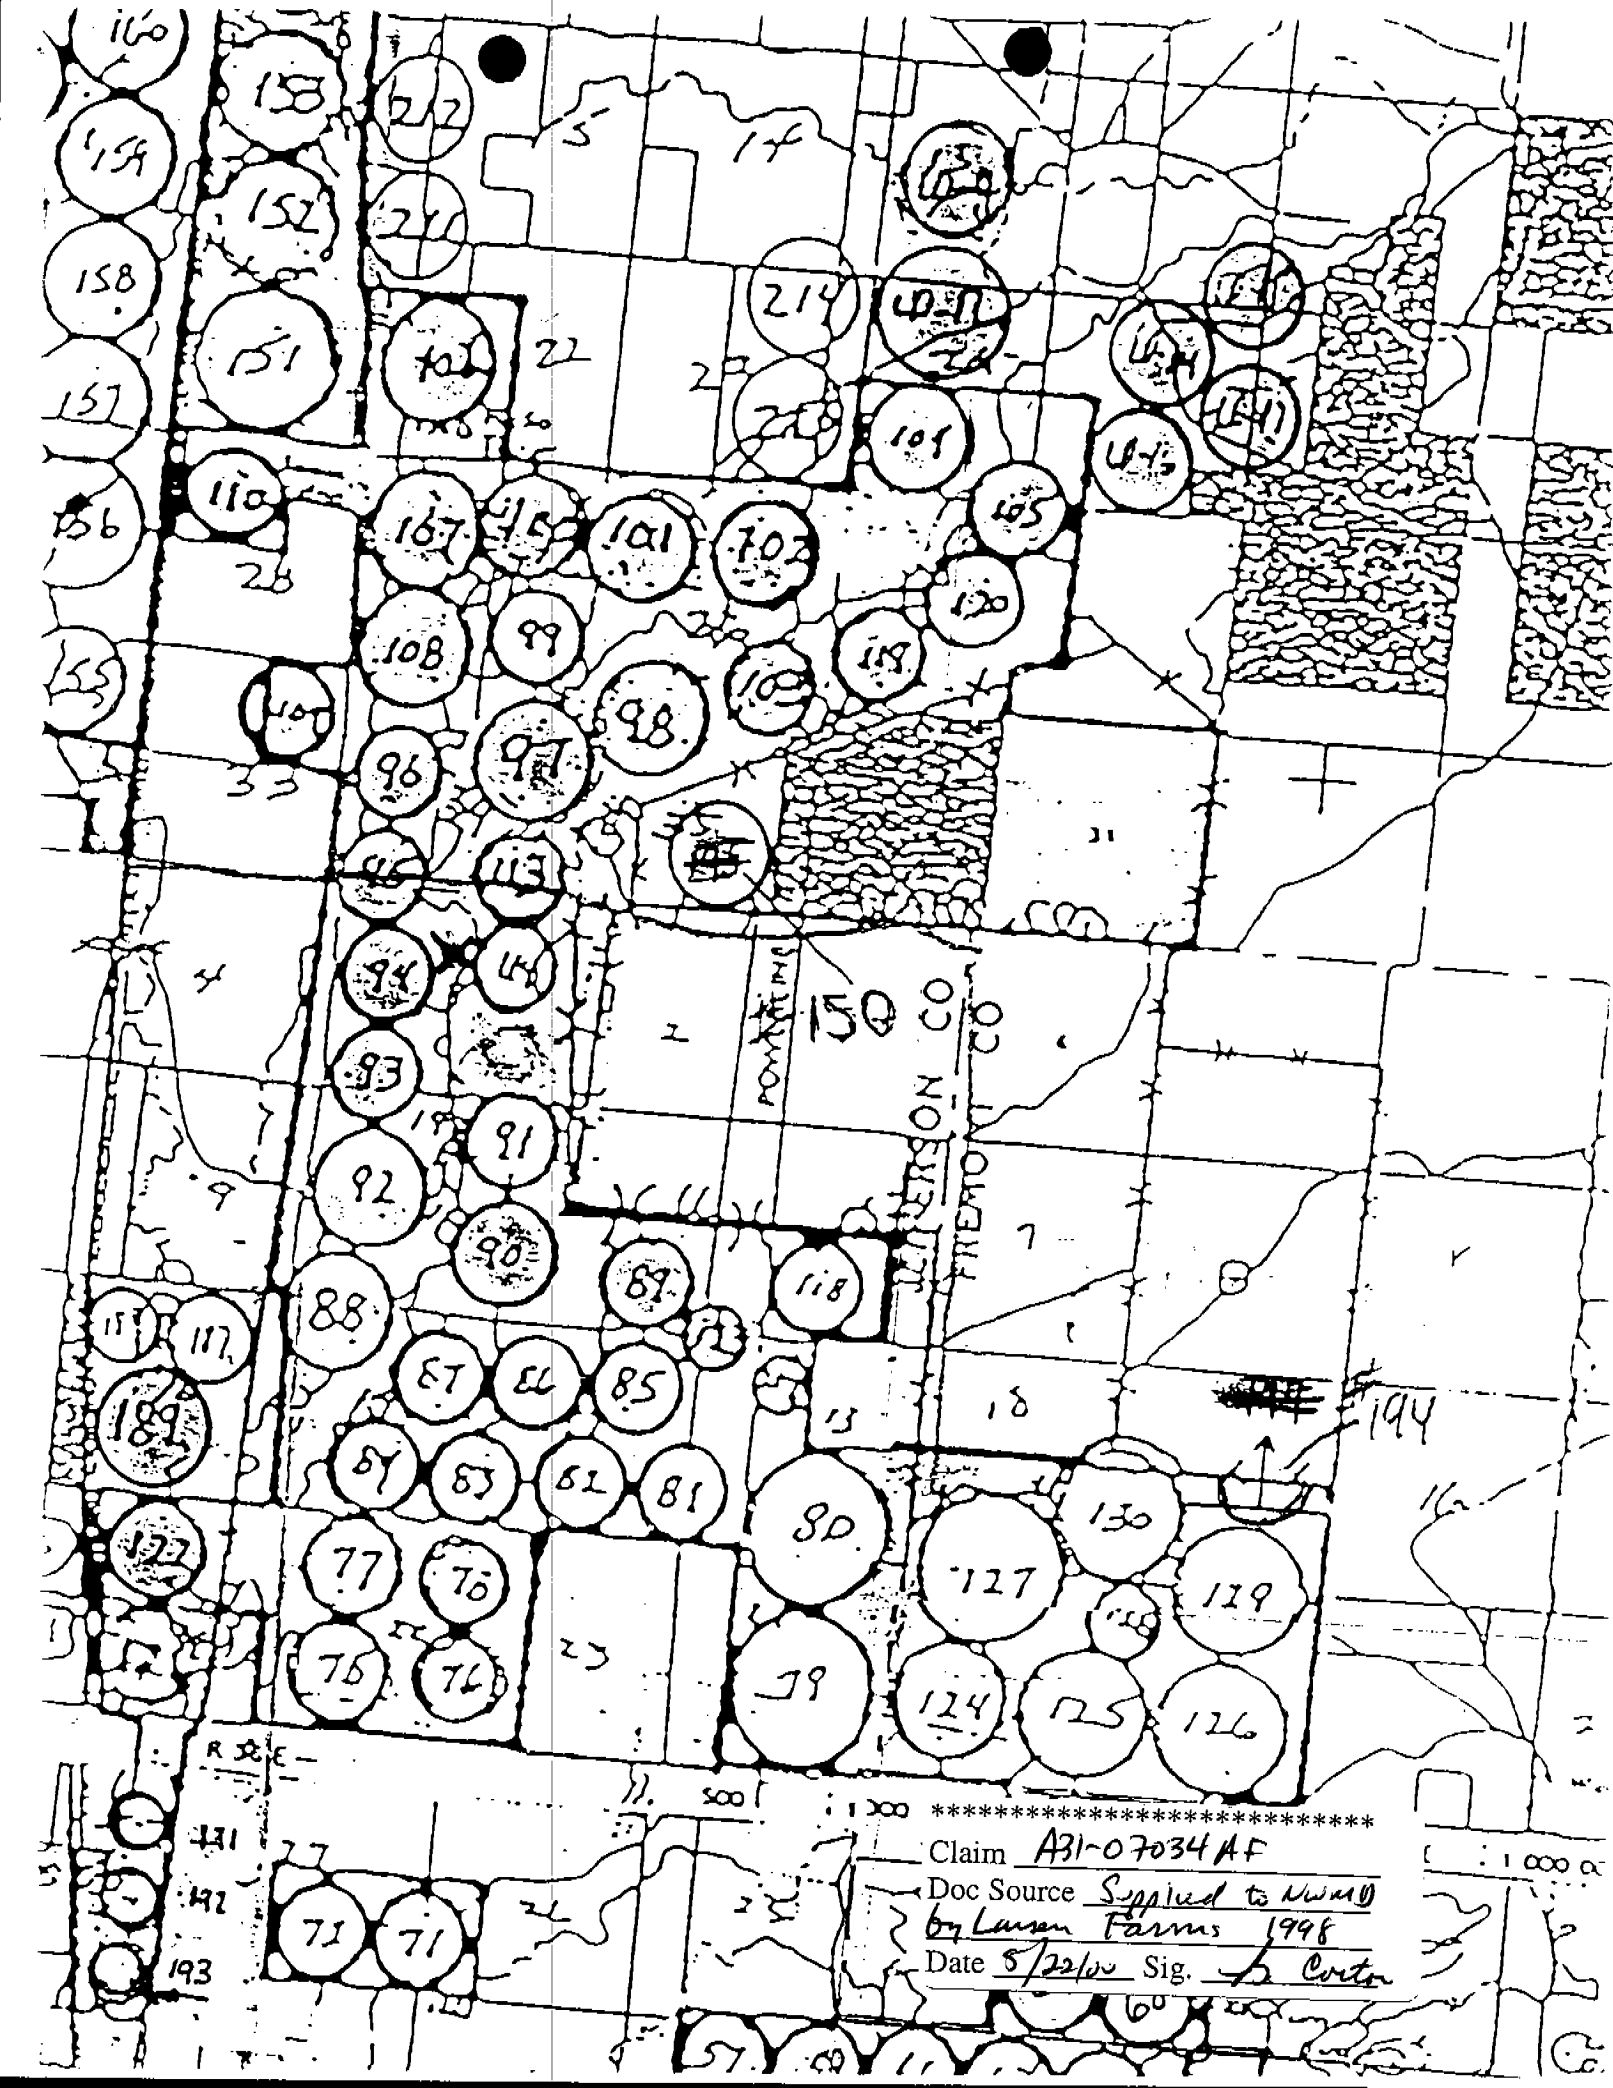

The maps supplied by Larsen (copy attached) to the NWRMD in 1997 seem to match what is on the ground better than does the 1987 NAPP. I will try to get an image from Terra Server, or from the Fremont County Courthouse, to attach to the file.

This inspection confirms that there is no current use of surface water in sections 10 and 15, and no provision to divert surface water to the lands authorized for GW irrigation by T5018 under WR 31-07034 AF.

Re: 31-02040, 31-07034AF

Attached are documents from the files that you won't be able to get easily in Boise.

Note that the photos from the Water Measurement District file can't both be the same POD - compare the location of the red electrical box on the pivot tower, and the length of pipe from the well to the pivot. This is one of the sites that was inspected by a summer temp and not by myself. This isn't too far from my home, I think I'll leave a little early and swing by there tonight on the way home. I'm taking tomorrow off, but Monday I can e-mail you about what I find.

Control: Bryce
To: McHugh, Candice; Carlsen, Ernie

Subject: RE: A31-07034AF Conditions

I don't have the answer. Since it was put on the right as an administrative ruling, it probably should be carried over. However, if it is impossible to irrigate with surface water, I am not sure what we are going to accomplish by putting it on. This looks like one that needs to have a policy decision made on it from higher up. Carter

Happy Monday Morning,

Question about WR condition 065. Do we carry it forward in the AJ remarks and if so how should it be coded?

-----Original Message-----

From: Contor, Bryce
Sent: Tuesday, February 01, 2000 2:25 PM
To: Carlsen, Ernie
Subject: A31-07034AF Conditions

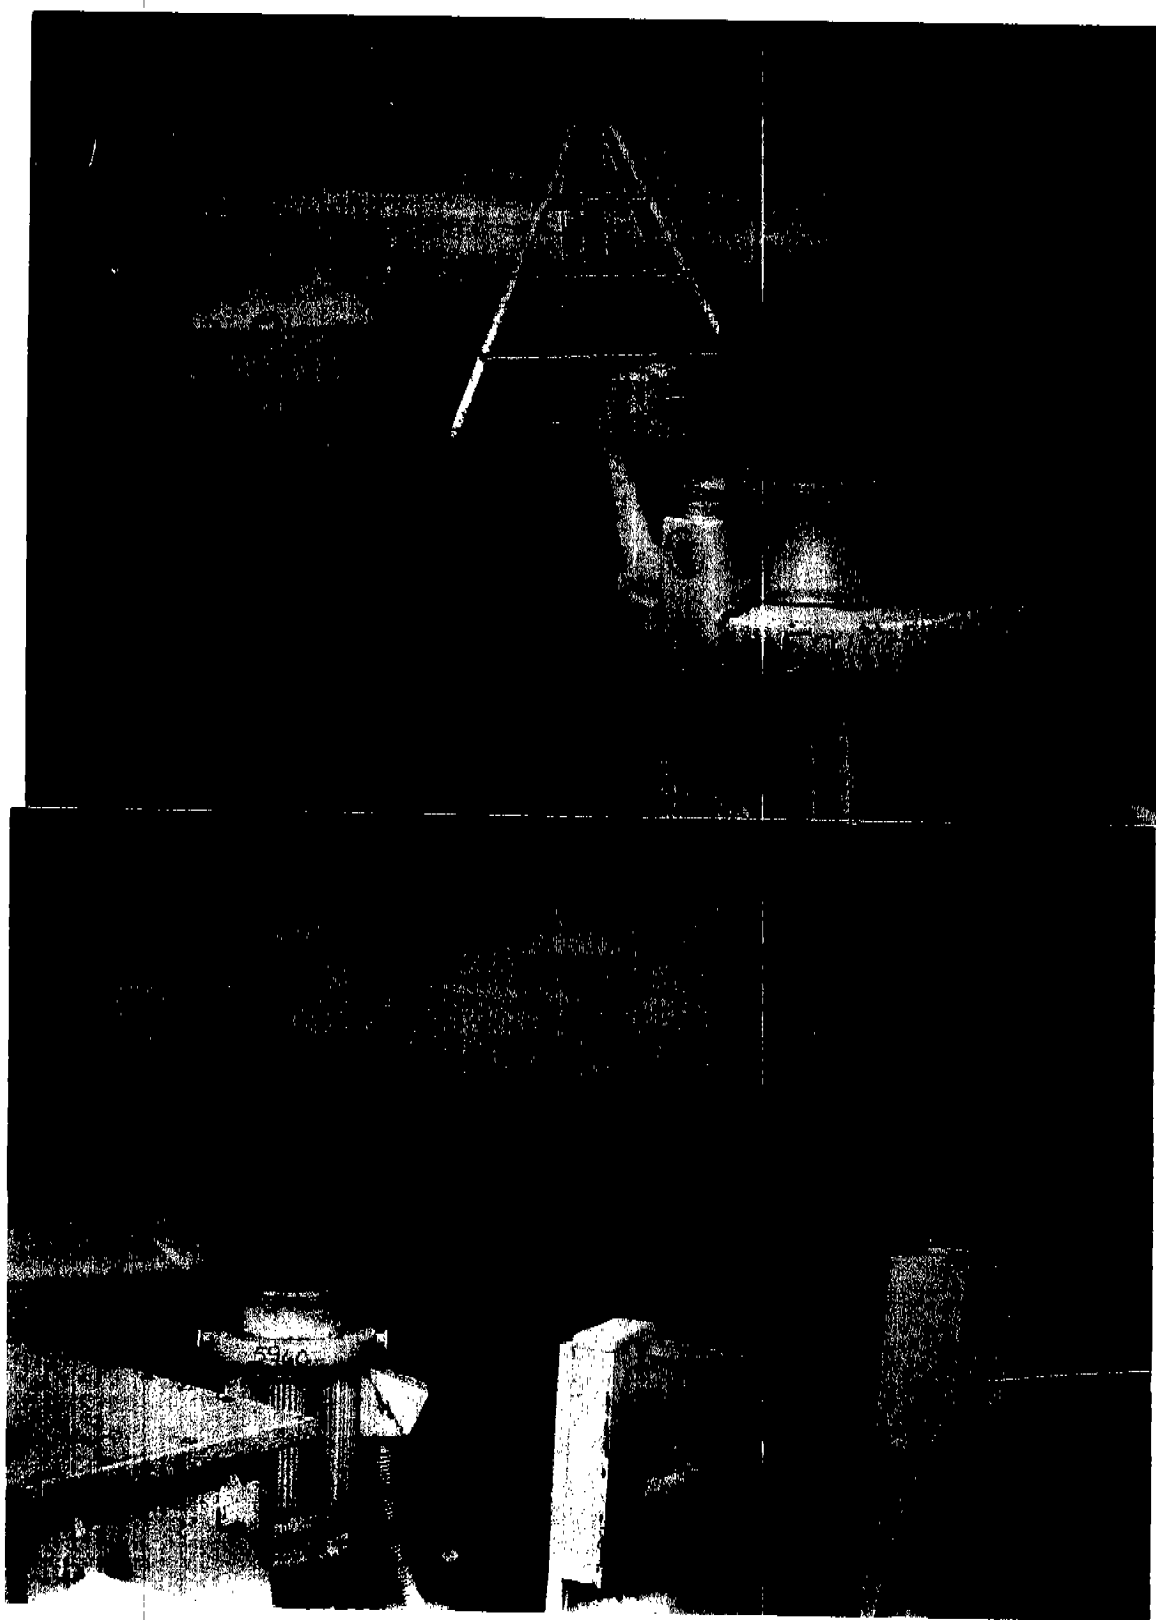

The WR record has condition 065, requiring use of surface water before groundwater. I carried it through to the A record, though I suspect it didn't need to be. I also included the surface right number in "other rights."

I also checked the WMD files and found that the delivery system is not designed to accommodate surface water, and put copies of the photos in the files for the GW and SW rights (A31-07034AF, A31-02040).

SUBJECT: TRANSFER NO. 5018

DATE: May 30, 1997

Transfer No. 5018 changes the point of diversion and place of use of a portion of each of the above referenced water rights, removing end guns from existing pivots. The transfer proposes to cover an existing pivot that was previously irrigated through temporary transfers that have expired.

Recommended conditions include combined conditions where applicable, measuring device/reporting, irrigation overlap and standard transfer conditions.
