Re: Adjudication Claims A31-02423, A31-07098

RECEIVED
AUG 01 2000
Department of Water Resources

Dear Water User:

From the claims and the original licenses, it appears that these two water rights are part of the same system, diverted from the same point of diversion.

With your permission, I'd like to recommend these rights on a "permissible place of use" basis. This means that both rights will be appurtenant to the entire place of use, rather than one right covering some forty-acre tracts and the other right covering other forty-acre tracts.

This will give you more flexibility in the use of the water under the current system. In particular, should there ever come a time when only the older-priority right (31-02423) could be diverted, this would allow you to apply it to whatever part of the permissible place of use was most advantageous to you.

However, should you ever decide to split off part of this property, the "permissible place of use" would make splitting the water rights a little more complex, particularly if you contemplated keeping the older-priority rights on one part of the property and assigning the junior rights to another part.

The attached map shows the approximate permissible place of use that I would recommend. Also attached is a copy of the map you submitted with claim A31-02423.

Please review this carefully and return this letter with a signature, if you approve of recommending these two rights on a permissible place of use basis. Please call me at 525-7161 or 553-4853 if you have questions.

Sincerely,

Bryce A. Contor
Senior Water Resource Agent

I approve of the "Permissible Place of Use" recommendation:
