RE: Snake River Basin Adjudication (SRBA)
Jefferson County - Jefferson Irrigation Company Claims

Dear Mr. Bare:

This office has been reviewing the Jefferson Irrigation Company notices of claim and water right files while trying to sort out the wells by number and location.

I would appreciate any information you might have on the current well numbering system, the well locations to the nearest 10-acre tract. and the pump and motor information.

I am enclosing a form that shows the information we have been able to assemble from the claims and water right files. There are blanks for you to fill in from your records if they are different than what we have.

Any help you can give us would be greatly appreciated. If you have any questions, please contact me at 208/327-7935 or leave a message for me at 1/800-451-4129 in Boise.

Sincerely,

Erik Norquest

Dear Mr. Harn:

At the time inspection was made on the above numbered permits we were advised by the Directors of the Company that they wanted all the wells made appurtenant to all the land. Accordingly, these permits and proofs have been carefully checked and amendment partially prepared in order to get their rights established the way they desire.

There will be but one charge for beneficial use inspection of two dollars per each forty-acre subdivision or $278 \times 2 = \$556$. minus $89 \times 2 = \$178$.-- paid under License #17374 leaving \$378, plus fees for Certificates of Completion of Works under Permits G-23077 - \$8.00; G-23079 - \$9.50; G-23080 - \$9.50; total payment \$405.00.

Permits No. 19351:

#2 Completion of works was granted for 16 cubic feet per second, with point of diversion in the $SE\frac{1}{4}SE\frac{1}{4}$ of Section 4, Township 7 North, Range 34 East, B.M. After amendment of land list, it can be so licensed.

No. 19353:

#3 Completion of works was granted for 15 c.f.s., which is 2 c.f.s. more than the well is producing. The point of diversion needs to be amended to show the well in the $NE\frac{1}{4}NE\frac{1}{4}$ of Section 9, Township 7 North, Range 34 East, B.M. All lands are covered and it can be licensed for 13 c.f.s.

No. G-23077

#1 Completion of works and beneficial use can be granted for 20 c.f.s. which is the capacity of the well, There needs to be an amendment to the land list.

Not a single well has been drilled in connection with this permit. The sole claim for proof of completion of works lies in the fact that a large dike canal $1\frac{1}{2}$ miles long along the South side of Sections 26 and 27, Township 7 North, Range 33 East, B.M., has been constructed at a cost of approximately \$9,000.00, and will be used to convey water to the tract of land described in this permit. This construction was made upon the advice of the company's attorney when they saw they were approaching the time limit for completion of works without having complied with the terms of the permit. The Jefferson Irrigation Company has a rather ambitious program, but apparently has been struggling along without adequate financing to complete their plans.
