Re: Enlargement

In Notice of Error process Mr. Wood informed me that the entire NWNW of 35 is irrigated, along with the north part of the SWNW. This aerial photo was difficult to interpret. The land is irrigated pasture, which will appear different from tilled land in a photo.

The original license clearly included the NWNW, and it is currently irrigated, so it may be recommended.

In making the recommendations, I asserted an accomplished transfer to lands in the SWNE which were not licensed but clearly were irrigated in the aerial photo.

With the new information provided at NOE, I will recommend the NWNW based on the license and current use, and the SWNE as an enlargement per the aerial photo. This will bring the total to 292 acres.

Re: Diversion rate

1) A31-2327 Was split into A & B by change of ownership in 1996. The original diversion rate & acres were apportioned as follows:

A31-2327A	4.00 cfs on 190 acres, Lynn Wood
A31-2327B	1.20 cfs on 70 acres, Bryce

The combined use limitation of 5.51 cfs w/ 31-2371 was not apportioned.

2) Transfer 5210 changed POE slightly and added a second PO to 31-2327B and 31-7080 on a PHE basis in 1998. This transfer applies the 5.51 cfs limitation to both splits of 31-2327 & 31-2371 w/o assigning to

Diversion rate p2

individual rights or owners, the apportionment of that limitation.

- 3) E. Carlsen in a March 19, 1997 letter implies that the split authorizes Borge to divert a full 1.20 cfs under 31-2327B, and assigns the full burden of the limitation to 31-2327A & 31-2321.
- 4) The approach of the transfer seems to disagree w/ Carlsen's assumption. As the transfer is later in time, I use the transfer interpretation that the limitation applies to all three rights.
- 5) Because the rights are now under different ownership / management, it is necessary to apportion this limitation to the two owners.
- 6) The original license and exam for 31-2371 are not on the microfiche. License 31-2327 is on the microfiche, but the exam is not. Therefore I assume (w/o certain no overlap of pole in the one common Q2 (6N 35E 26 SE SW), giving total irr acreage of $207 + 260 = 467$ acres. $5.51 \text{ cfs} / 467 \approx 0.0118 / \text{acre}$. $0.0118 \times 70 = 1.32 \text{ cfs}$ of limitation applies to 31-2427B. As this exceeds the transferred Q for this WR, the limitation is meaningless for that right & will not be recommended.

- 7) This leaves $5.51 - 1.20 = 4.31$ cfs of original limitation to be applied to the Wood rights, 31-2327 A & 31-2371.
- 8) While this duplicates the result of Carlsons' analysis it is based on the transfer condition intending for the limitation to apply to all three rights.
- 9) 31-2327B is diverted from the same PD as 31-7080, and 31-2327A, 31-2327B are diverted from the same PD as 31-7204. Additional combined use limitations per transfer and/or licenses may also be recommended.
- 10) POU analyses will be ^{done} separately.
